ELIMINATE TARGET

CREATOR

EYES OF TOMORROW

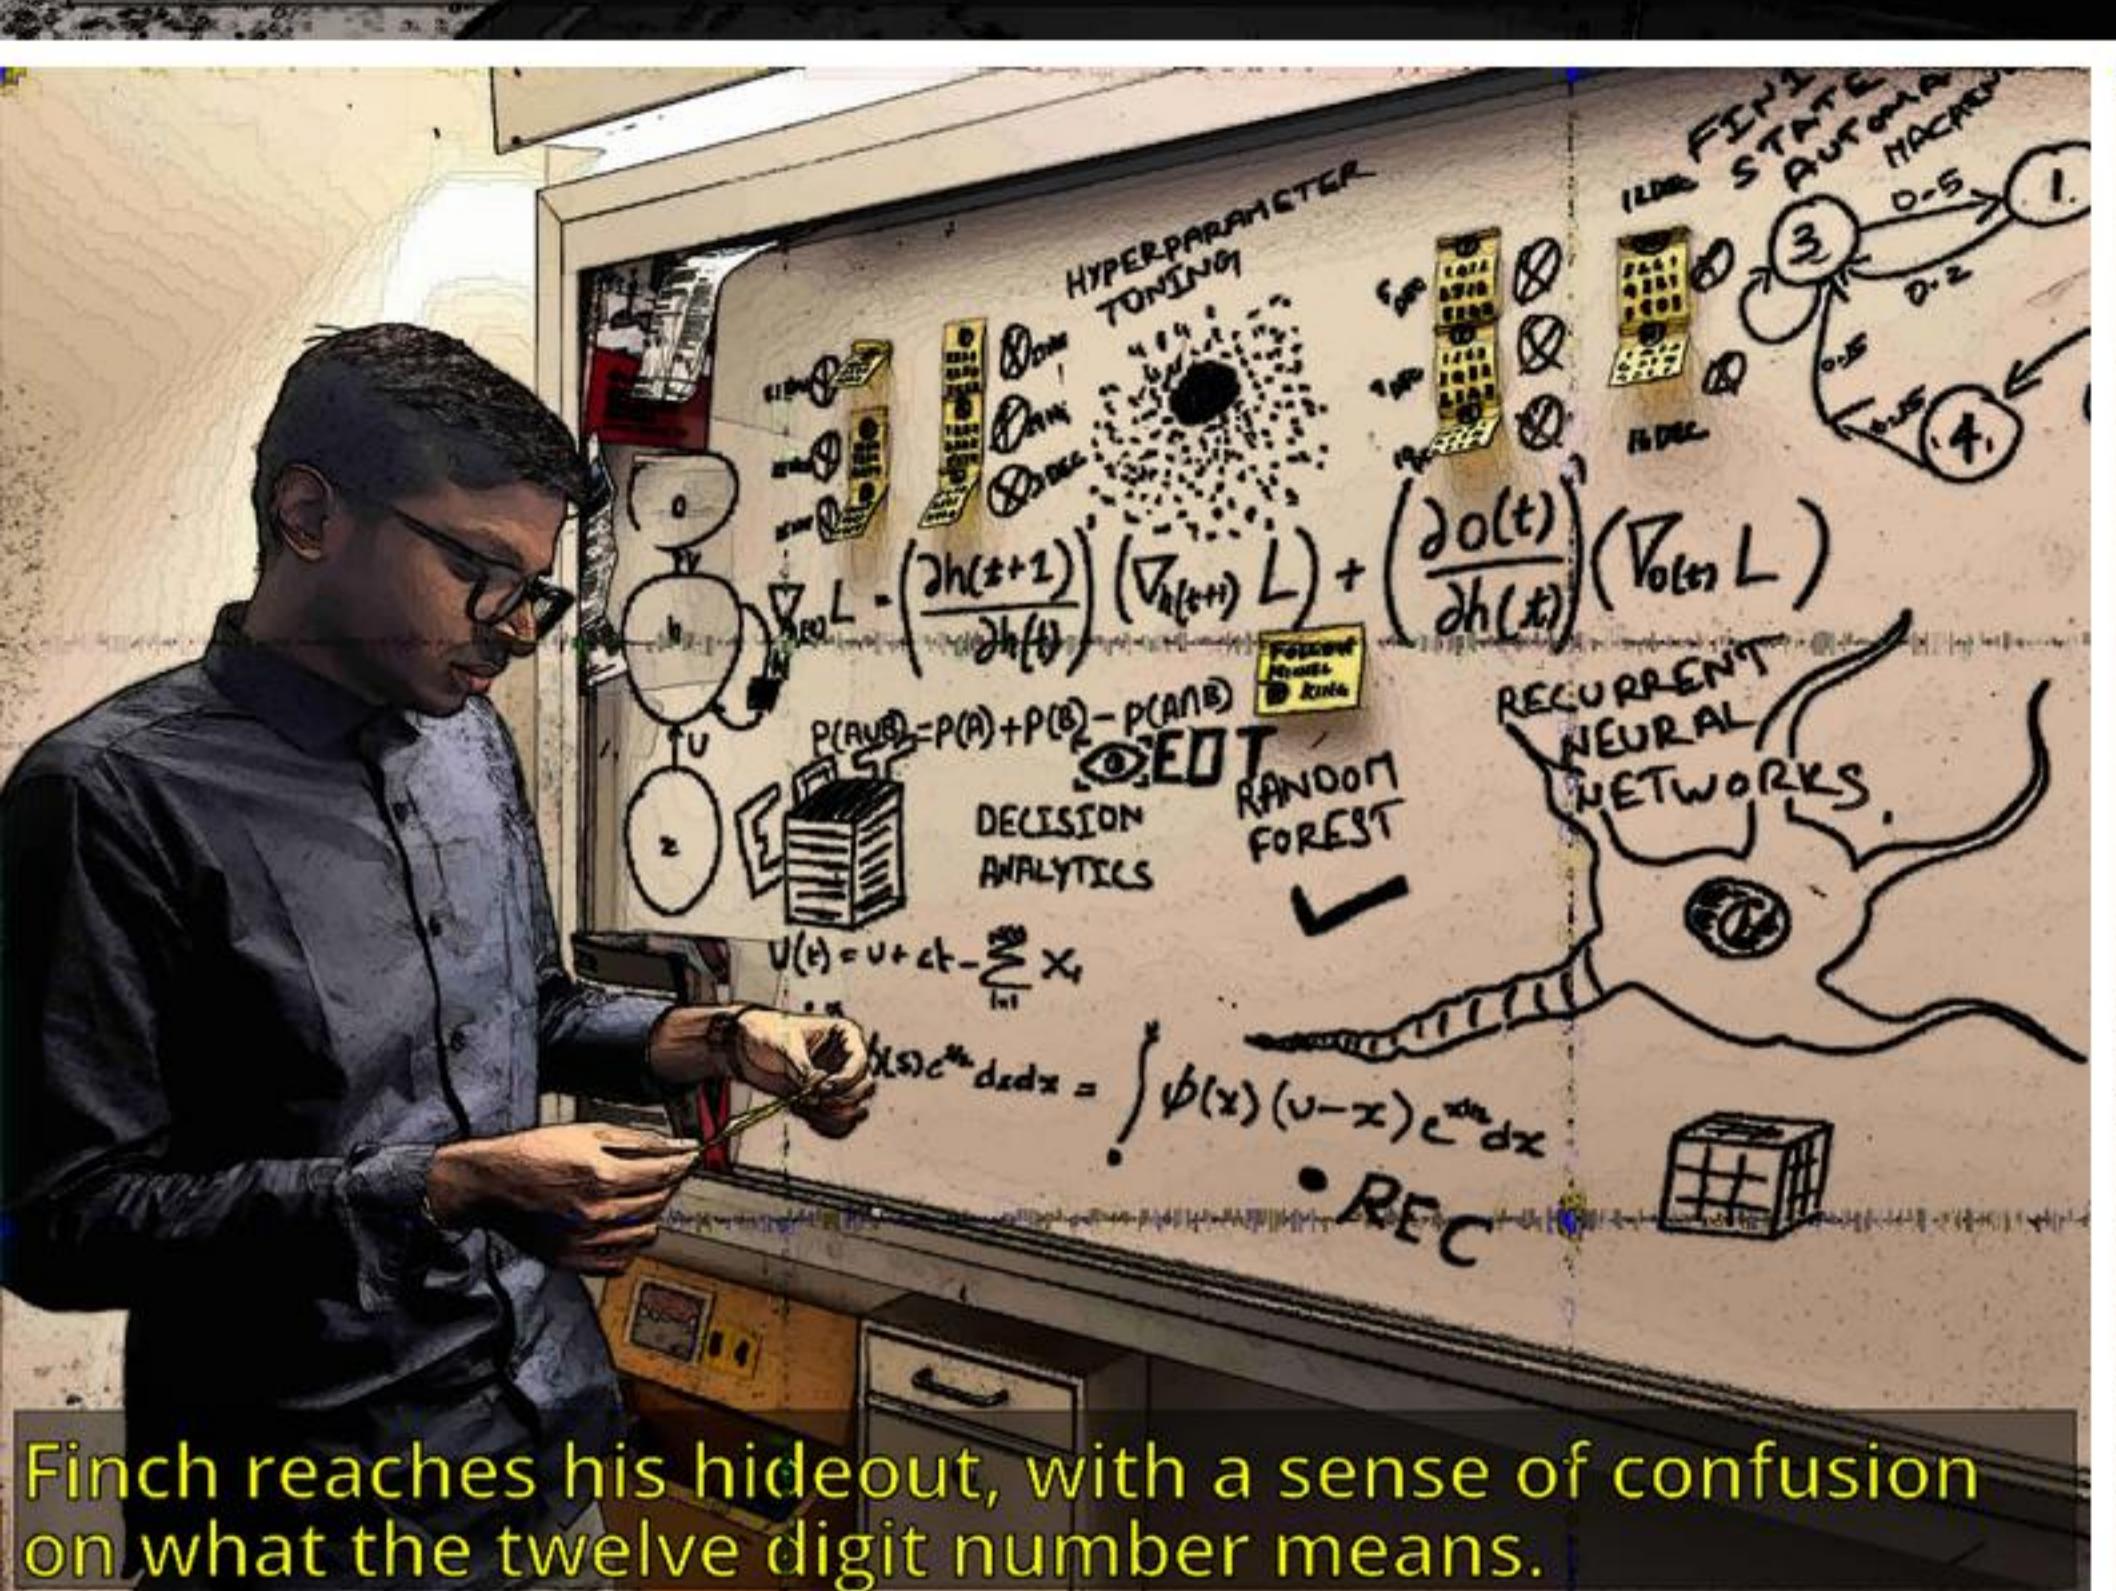

Secured connection landline rings

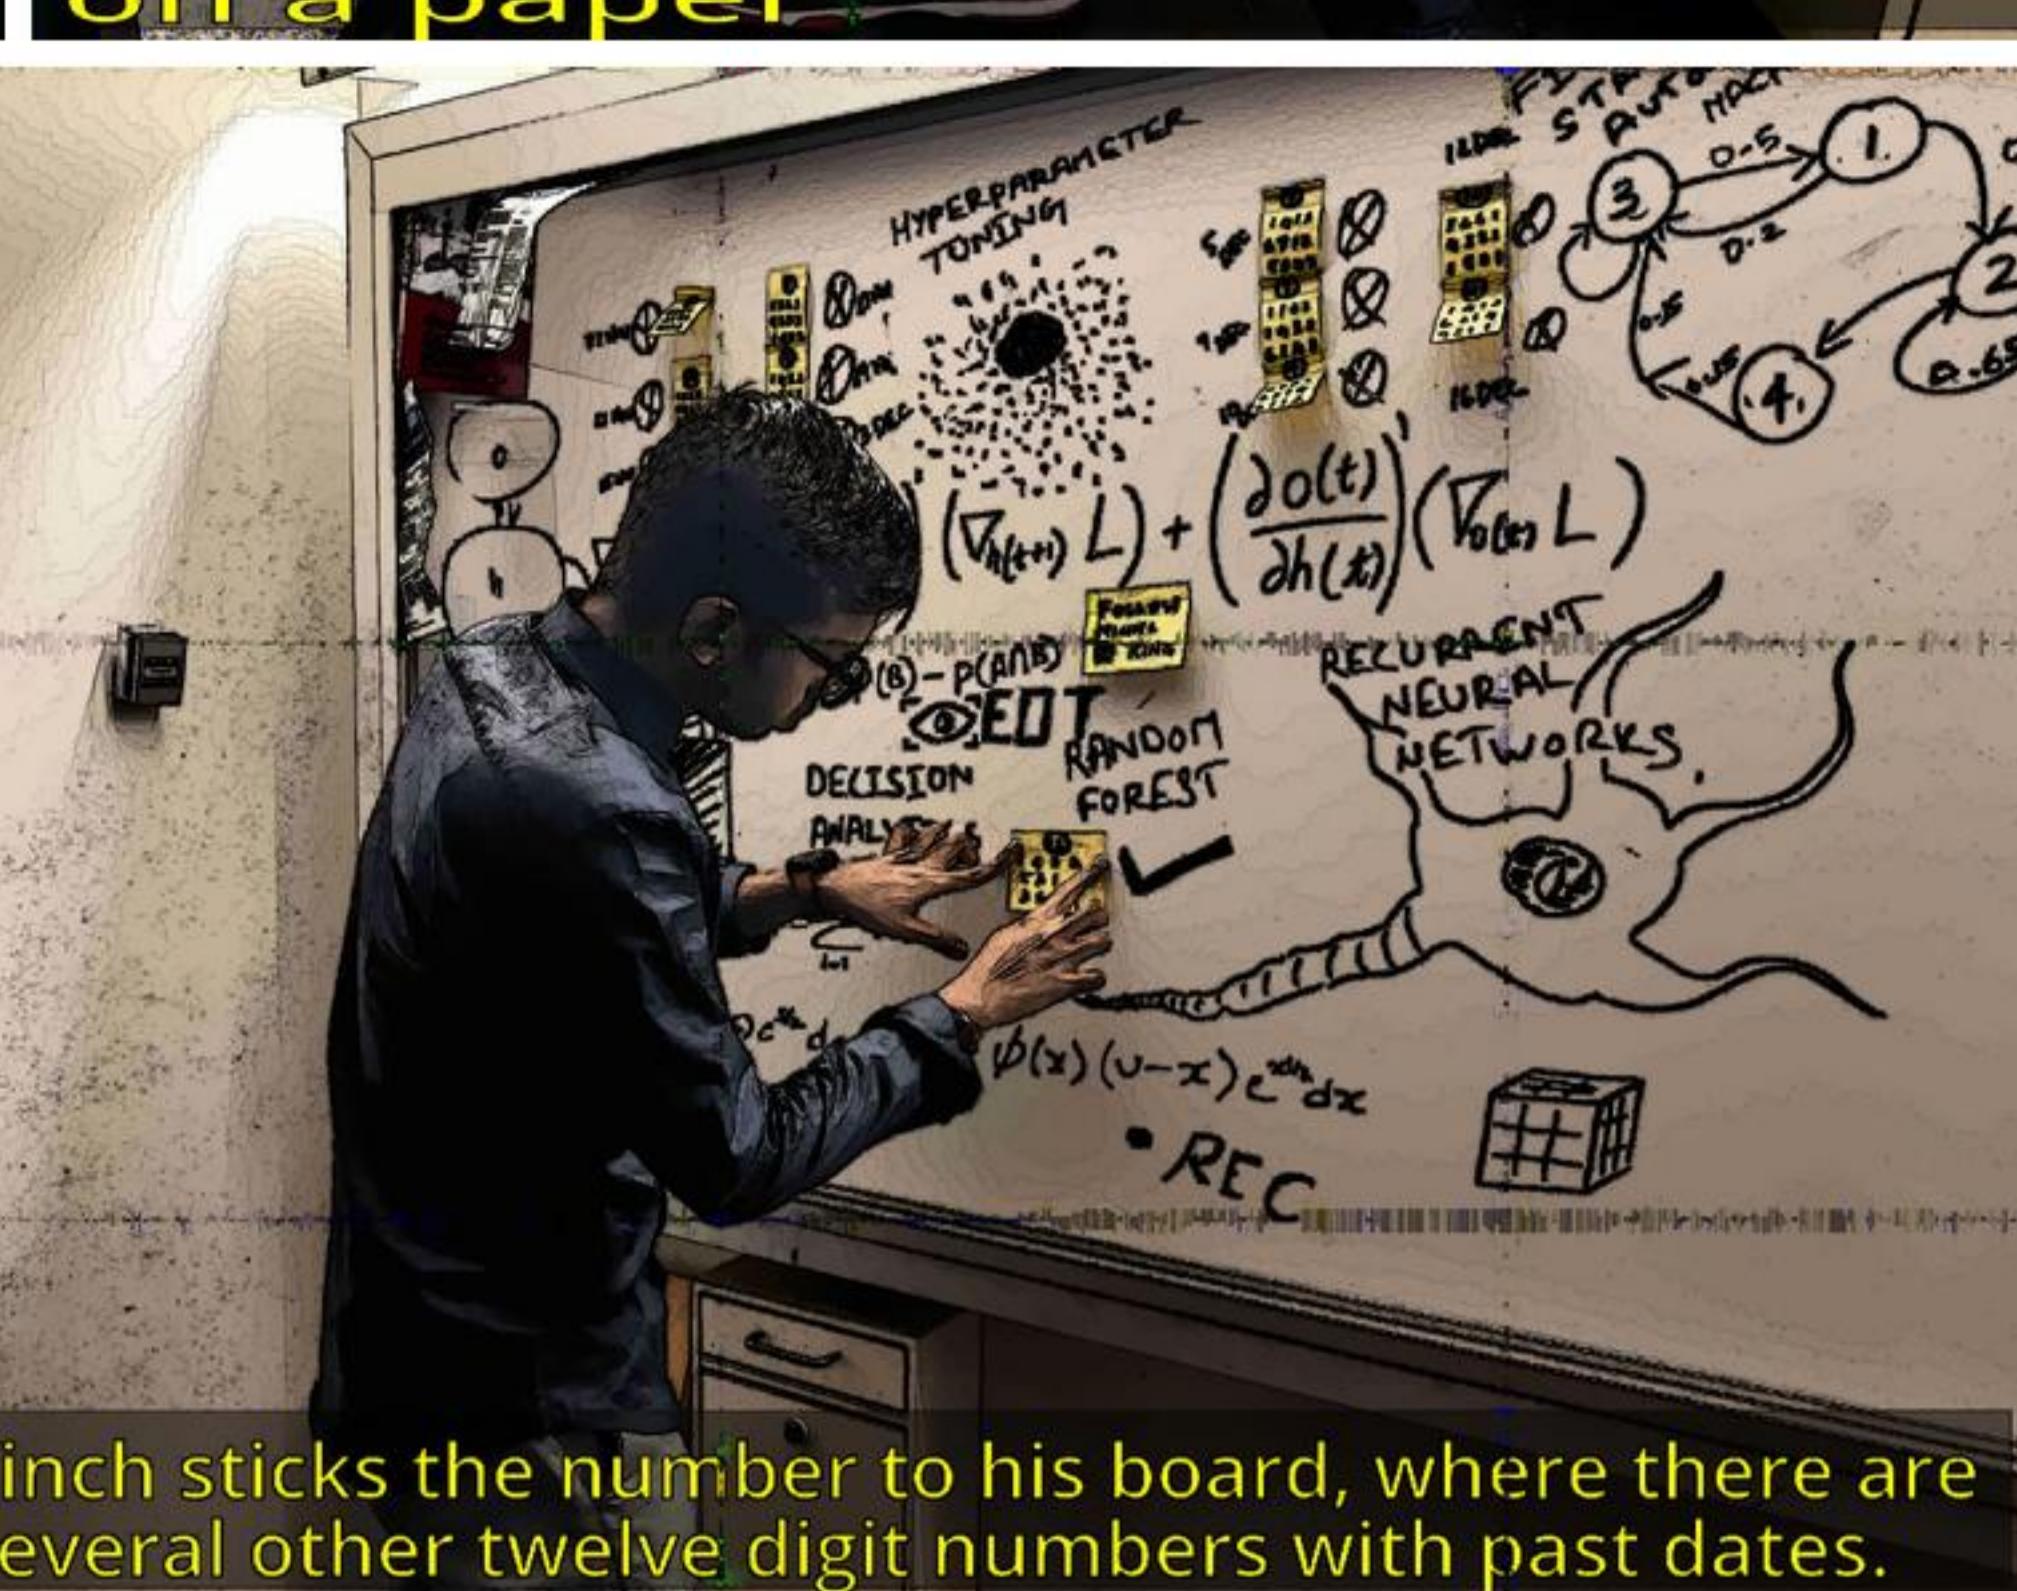

Doctor Finch picks the call and an AI generated voice gives him a twelve digit number that he notes down on a paper.

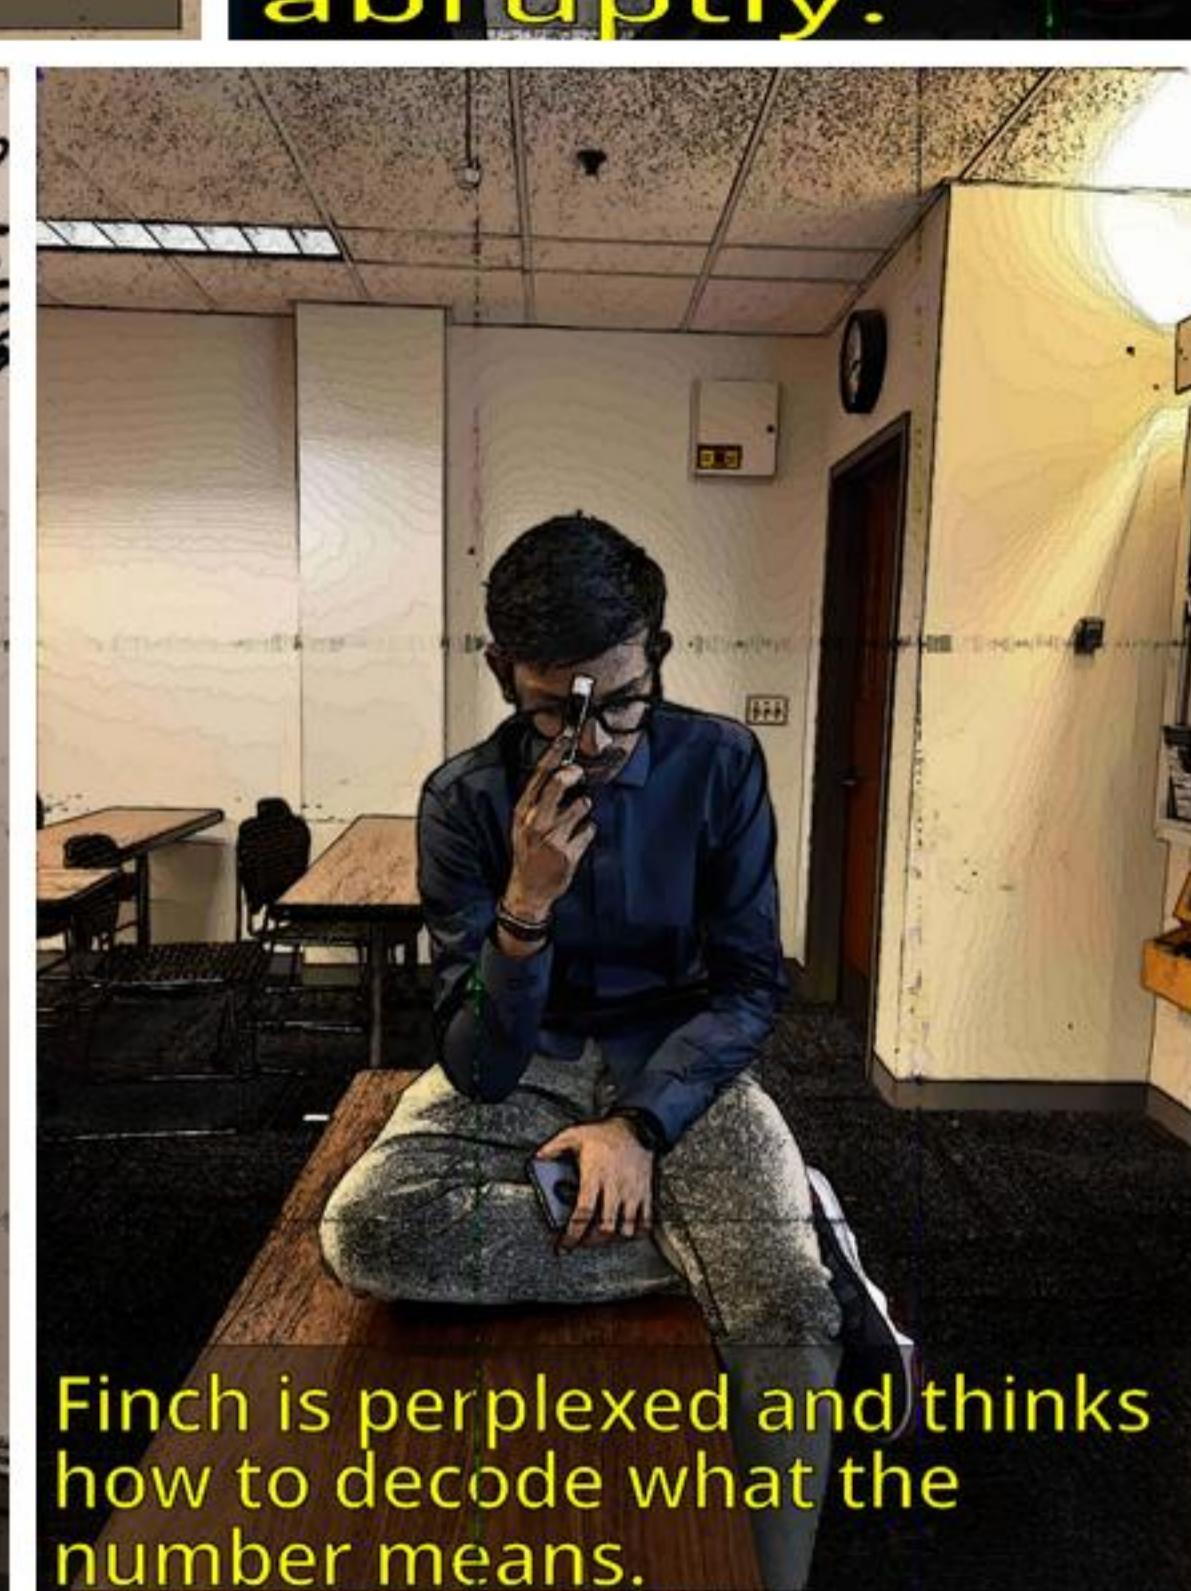

It also gives date and time. And then gets disconnected abruptly.

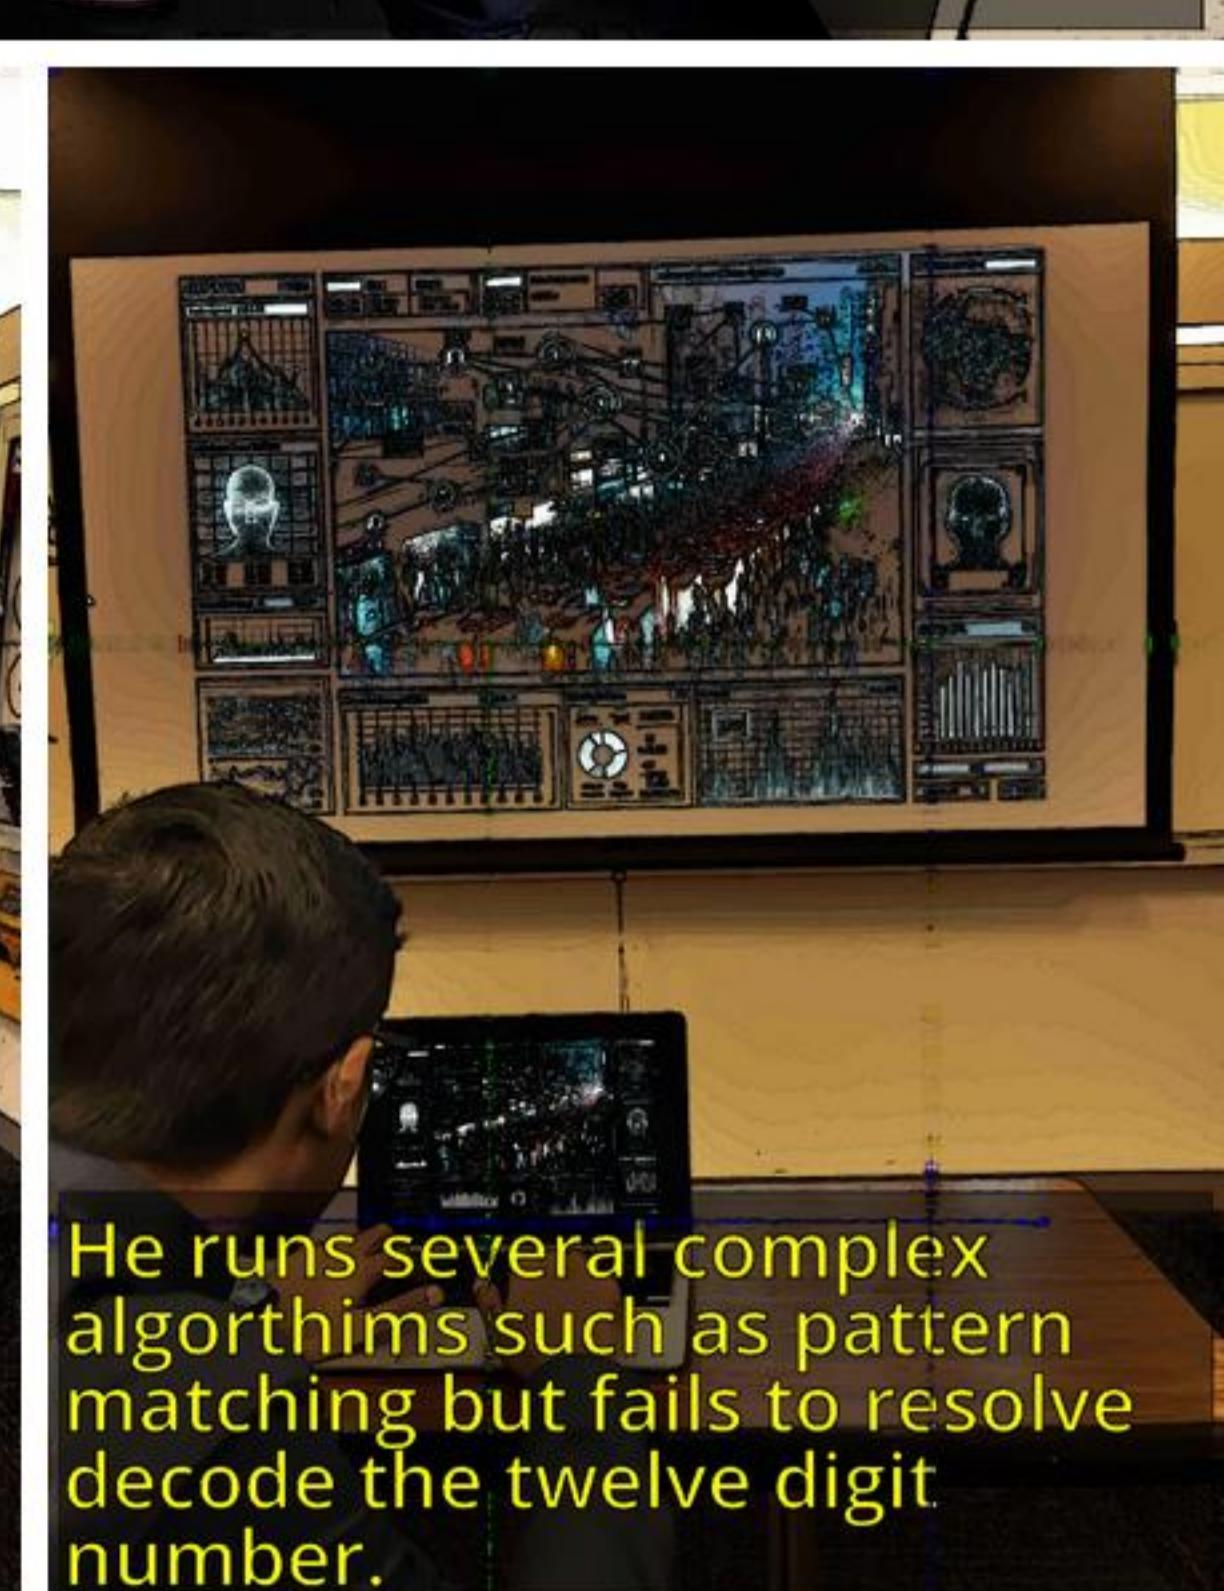

Finch reaches his hideout, with a sense of confusion on what the twelve digit number means.

Finch sticks the number to his board, where there are several other twelve digit numbers with past dates.

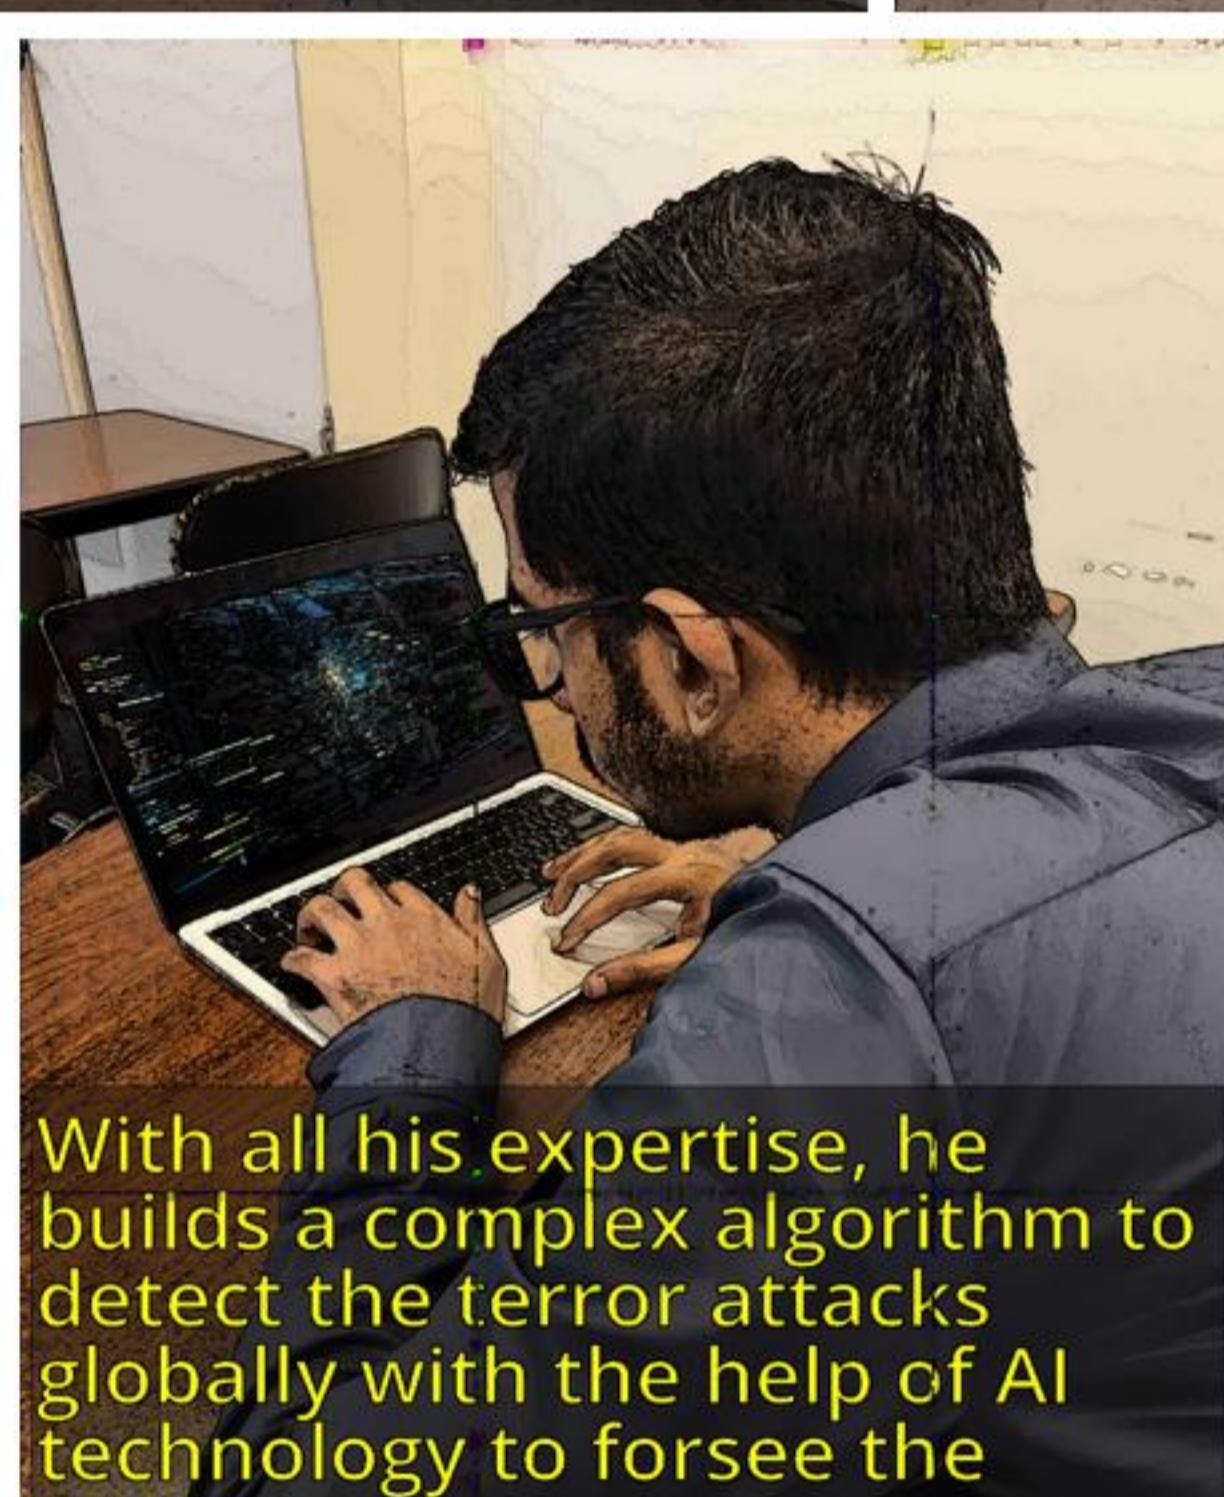

Finch is perplexed and thinks how to decode what the number means.

He runs several complex algorithms such as pattern matching but fails to resolve decode the twelve digit number.

FLASHBACK: Finch is the chief scientist of project EYES where he is designated to build a machine.

With all his expertise, he builds a complex algorithm to detect the terror attacks globally with the help of AI technology to foresee the future.

Machine Activation Successful

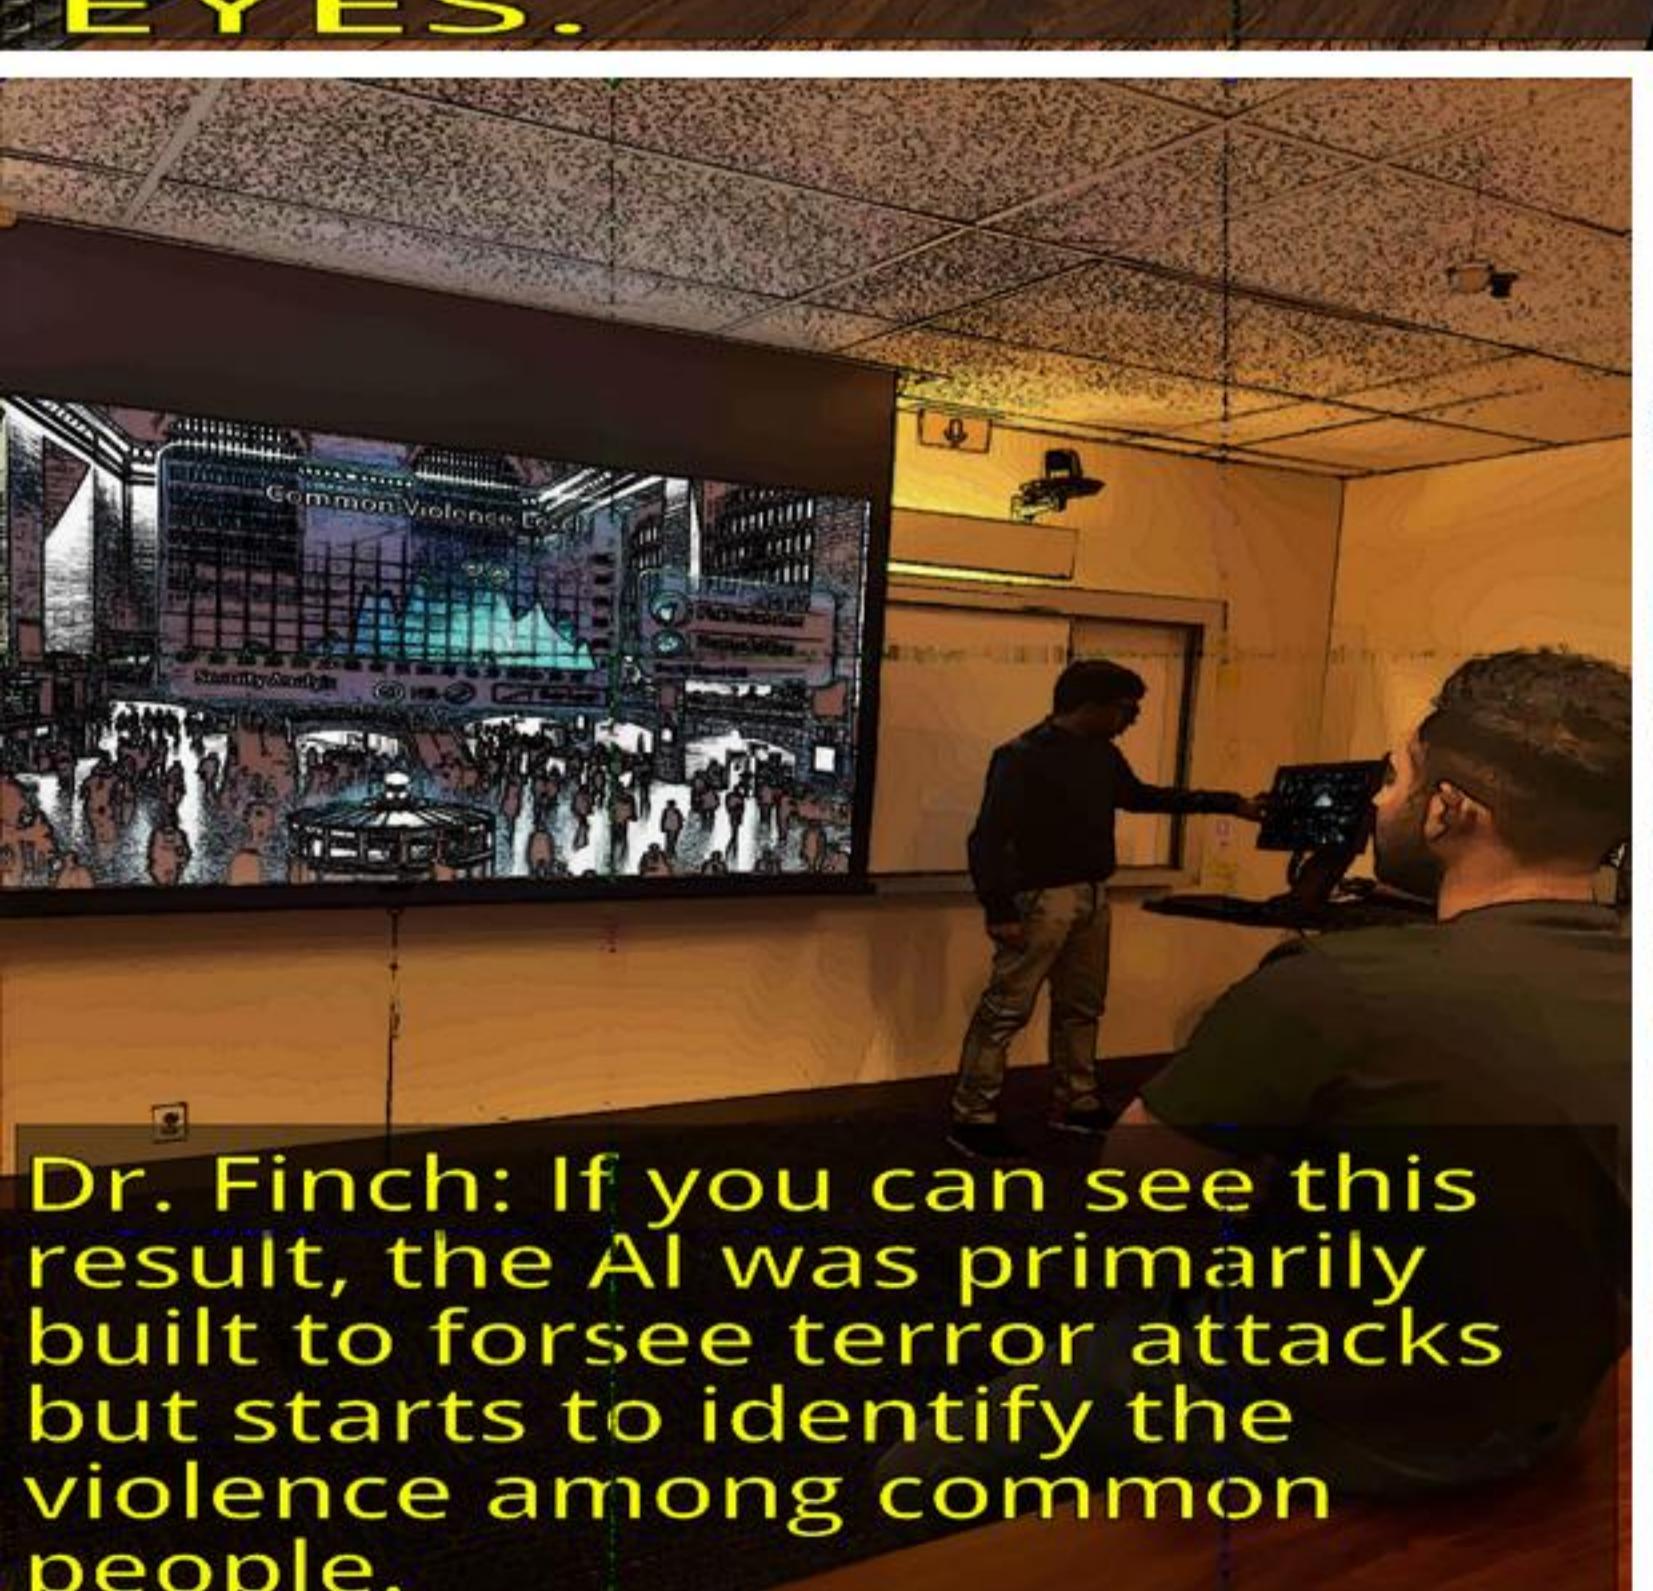

Finch calls government Authorities to inform about the MACHINE

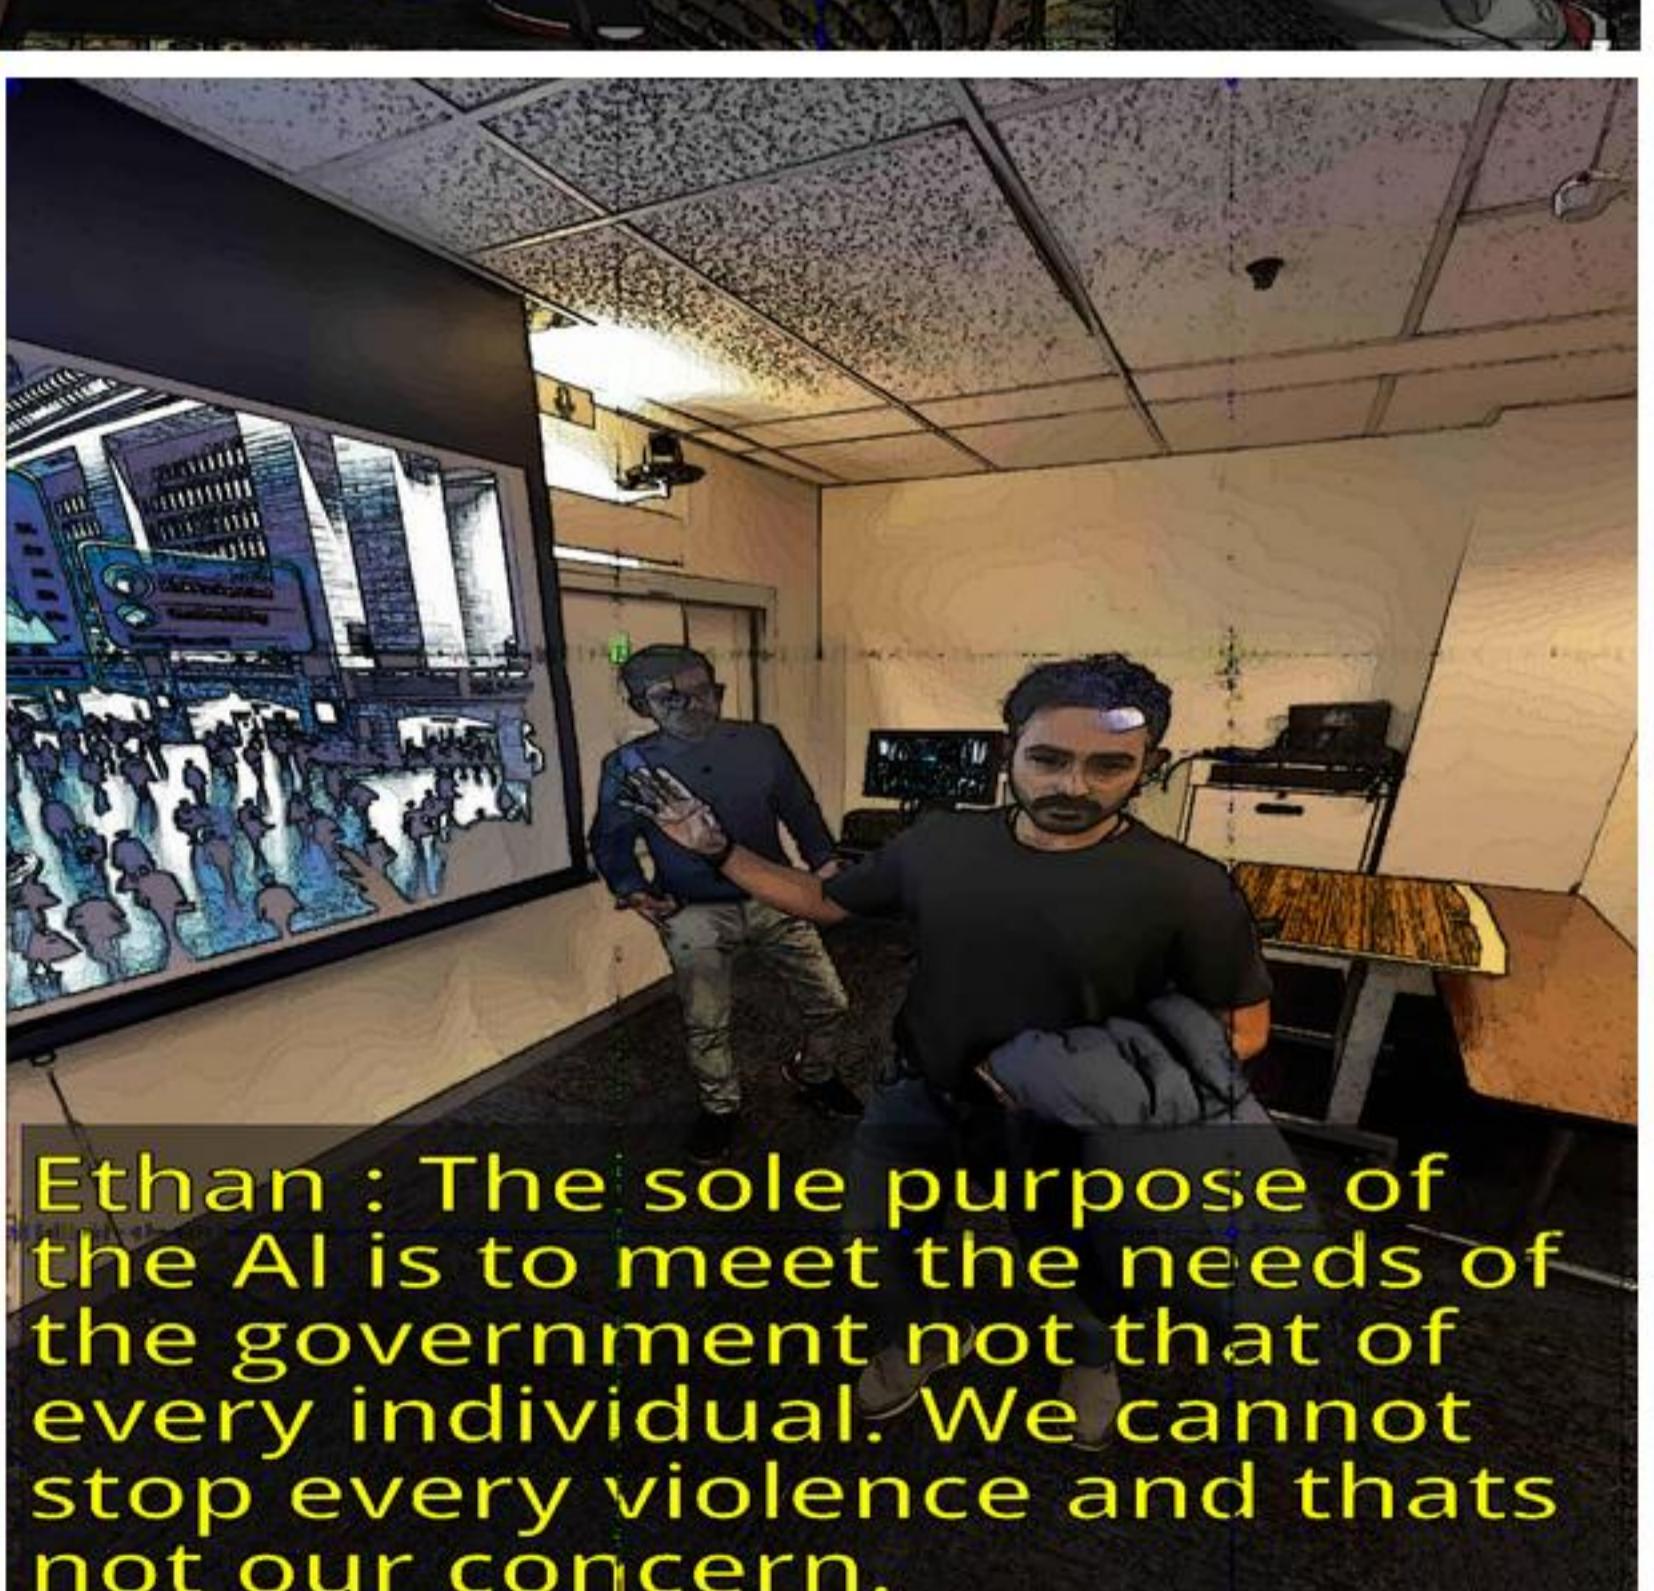

Ethan Hunt, the Chief Defense Officer of US Govt congratulates Dr. Finch for successfully building project EYES.

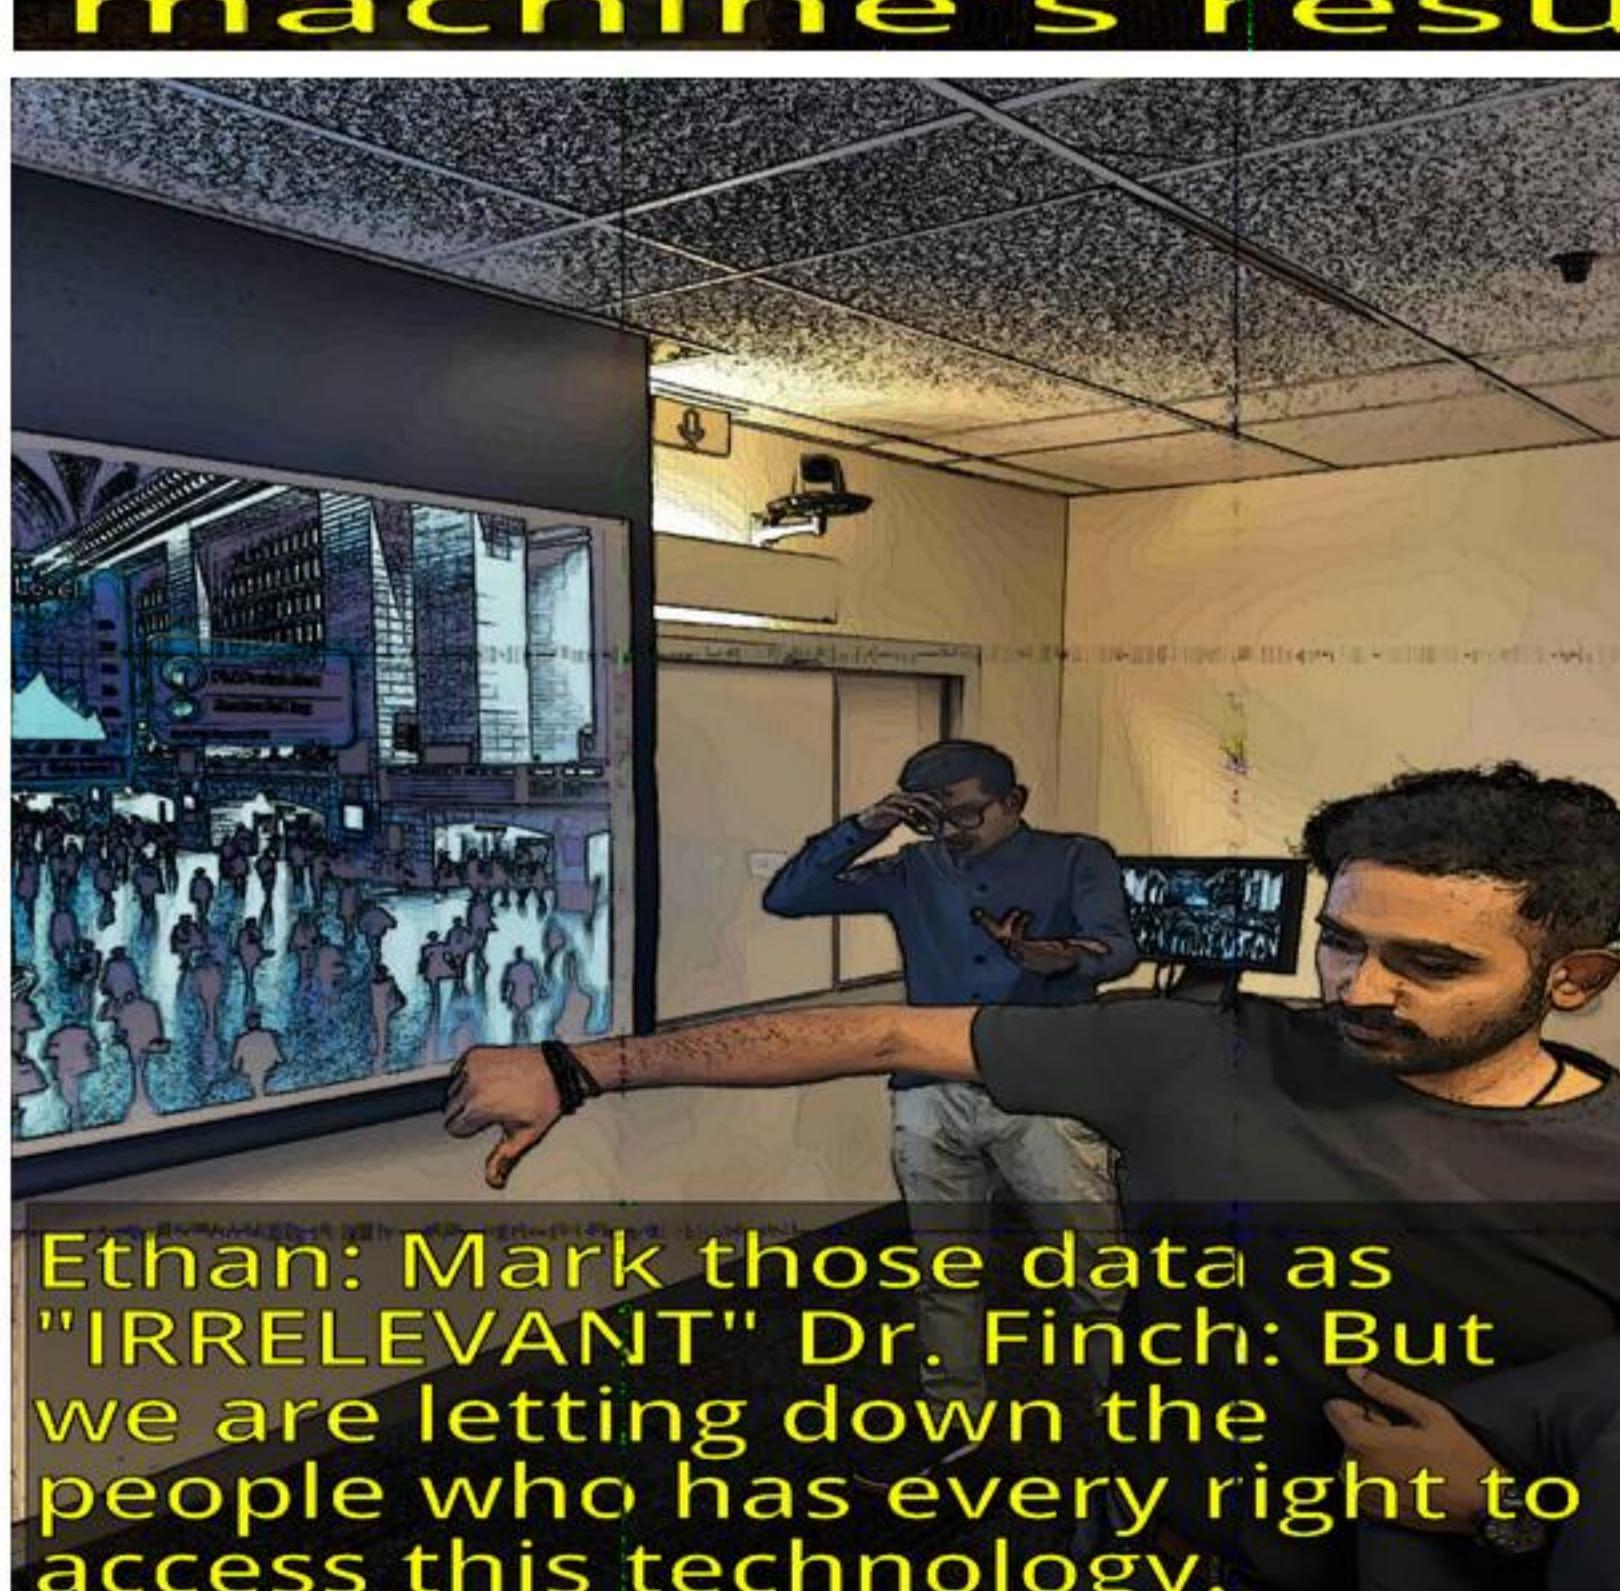

Dr. Finch: Officer Hunt, but I found an issue with the machine's result.

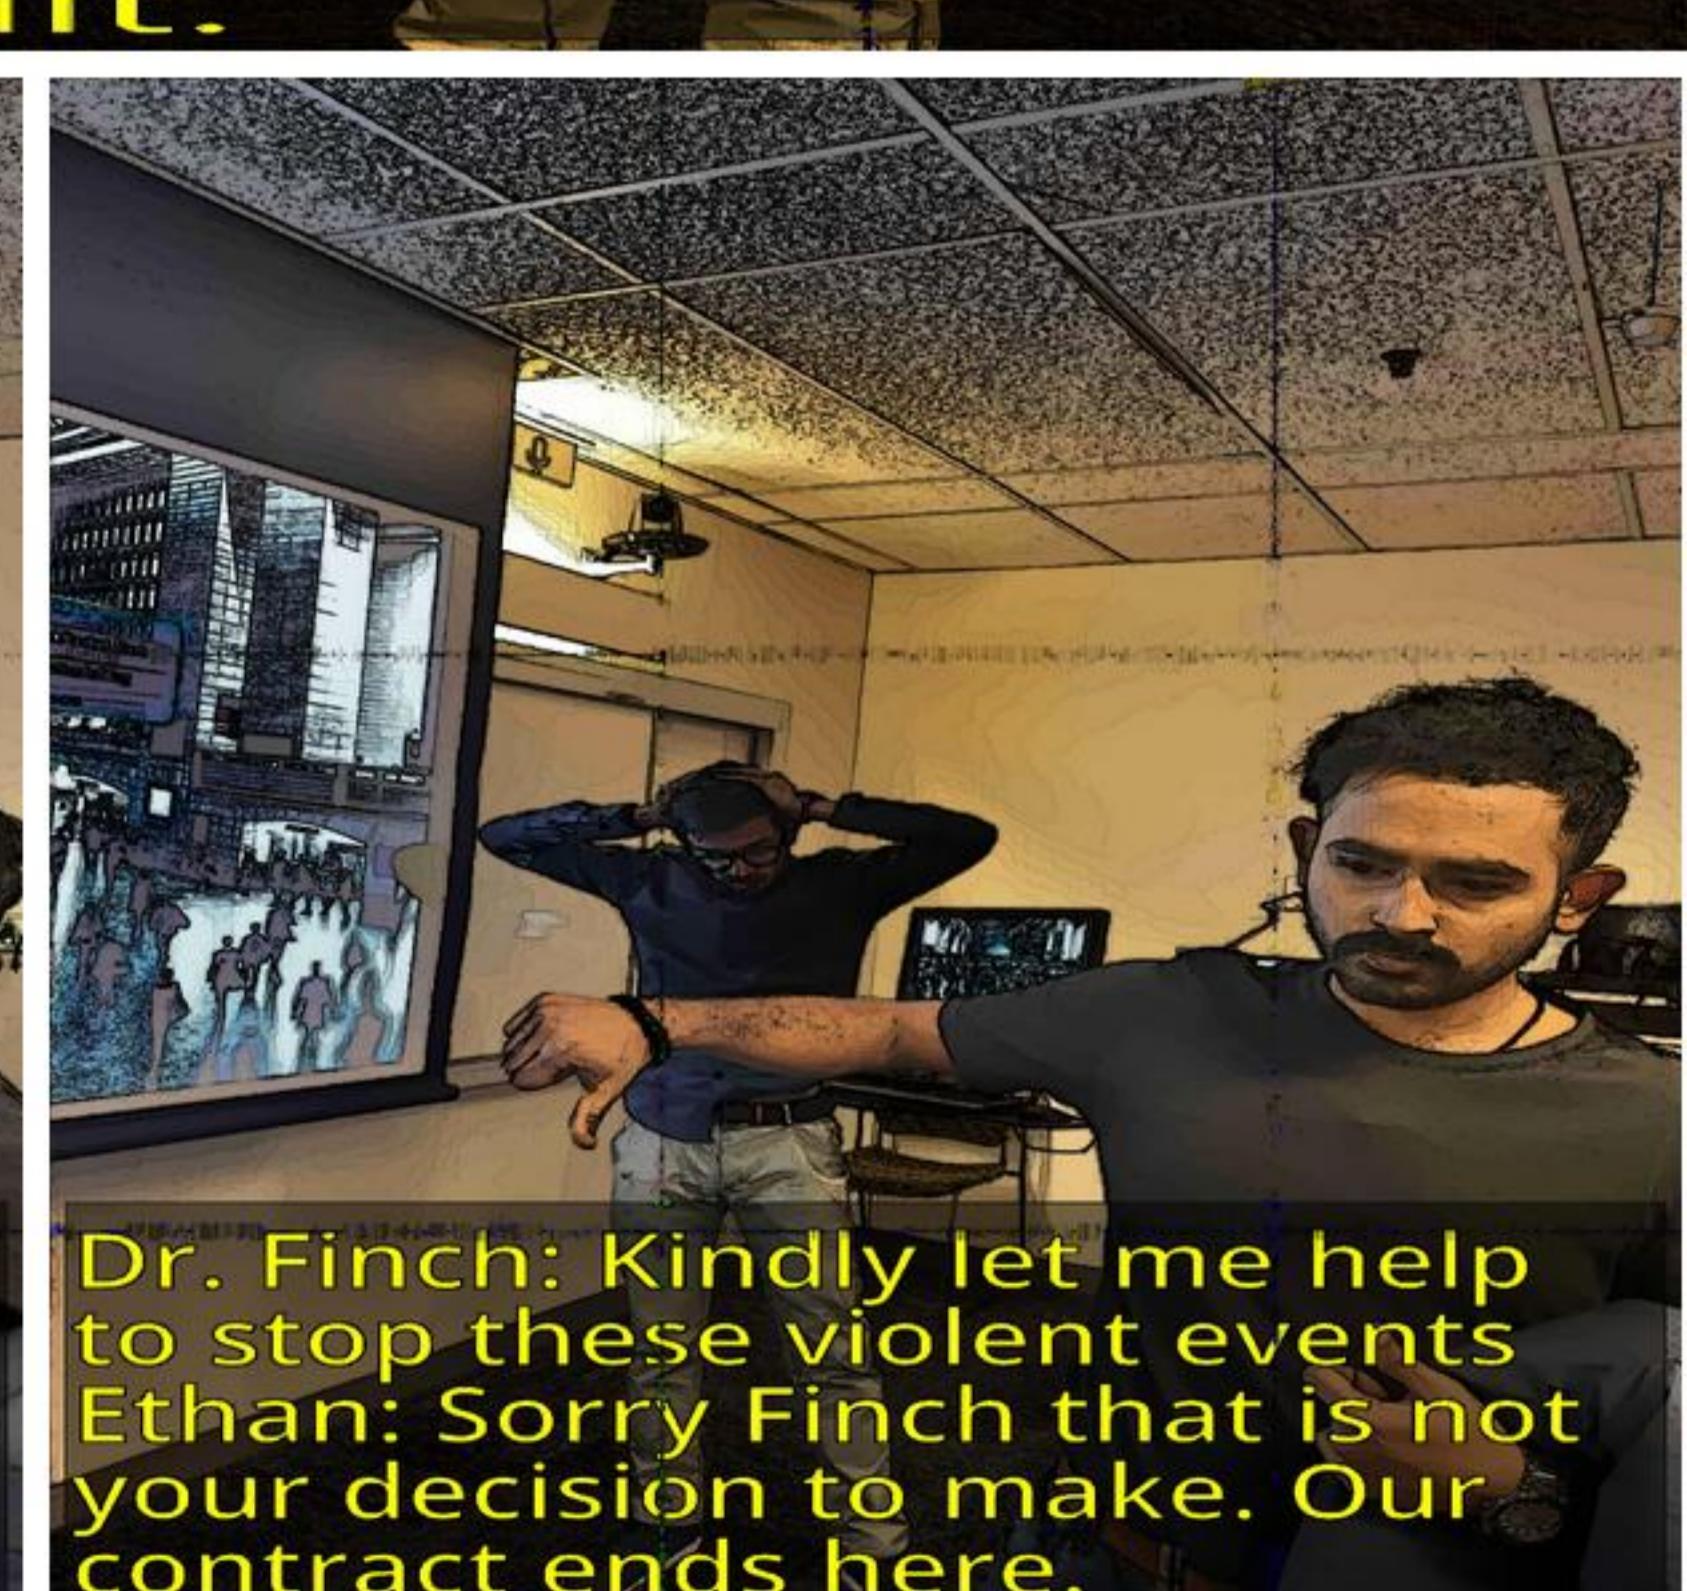

Dr. Finch: If you can see this result, the AI was primarily built to foresee terror attacks but starts to identify the violence among common people.

Ethan : The sole purpose of the AI is to meet the needs of the government not that of every individual. We cannot stop every violence and that's not our concern.

Ethan: Mark those data as "IRRELEVANT" Dr. Finch: But we are letting down the people who has every right to access this technology.

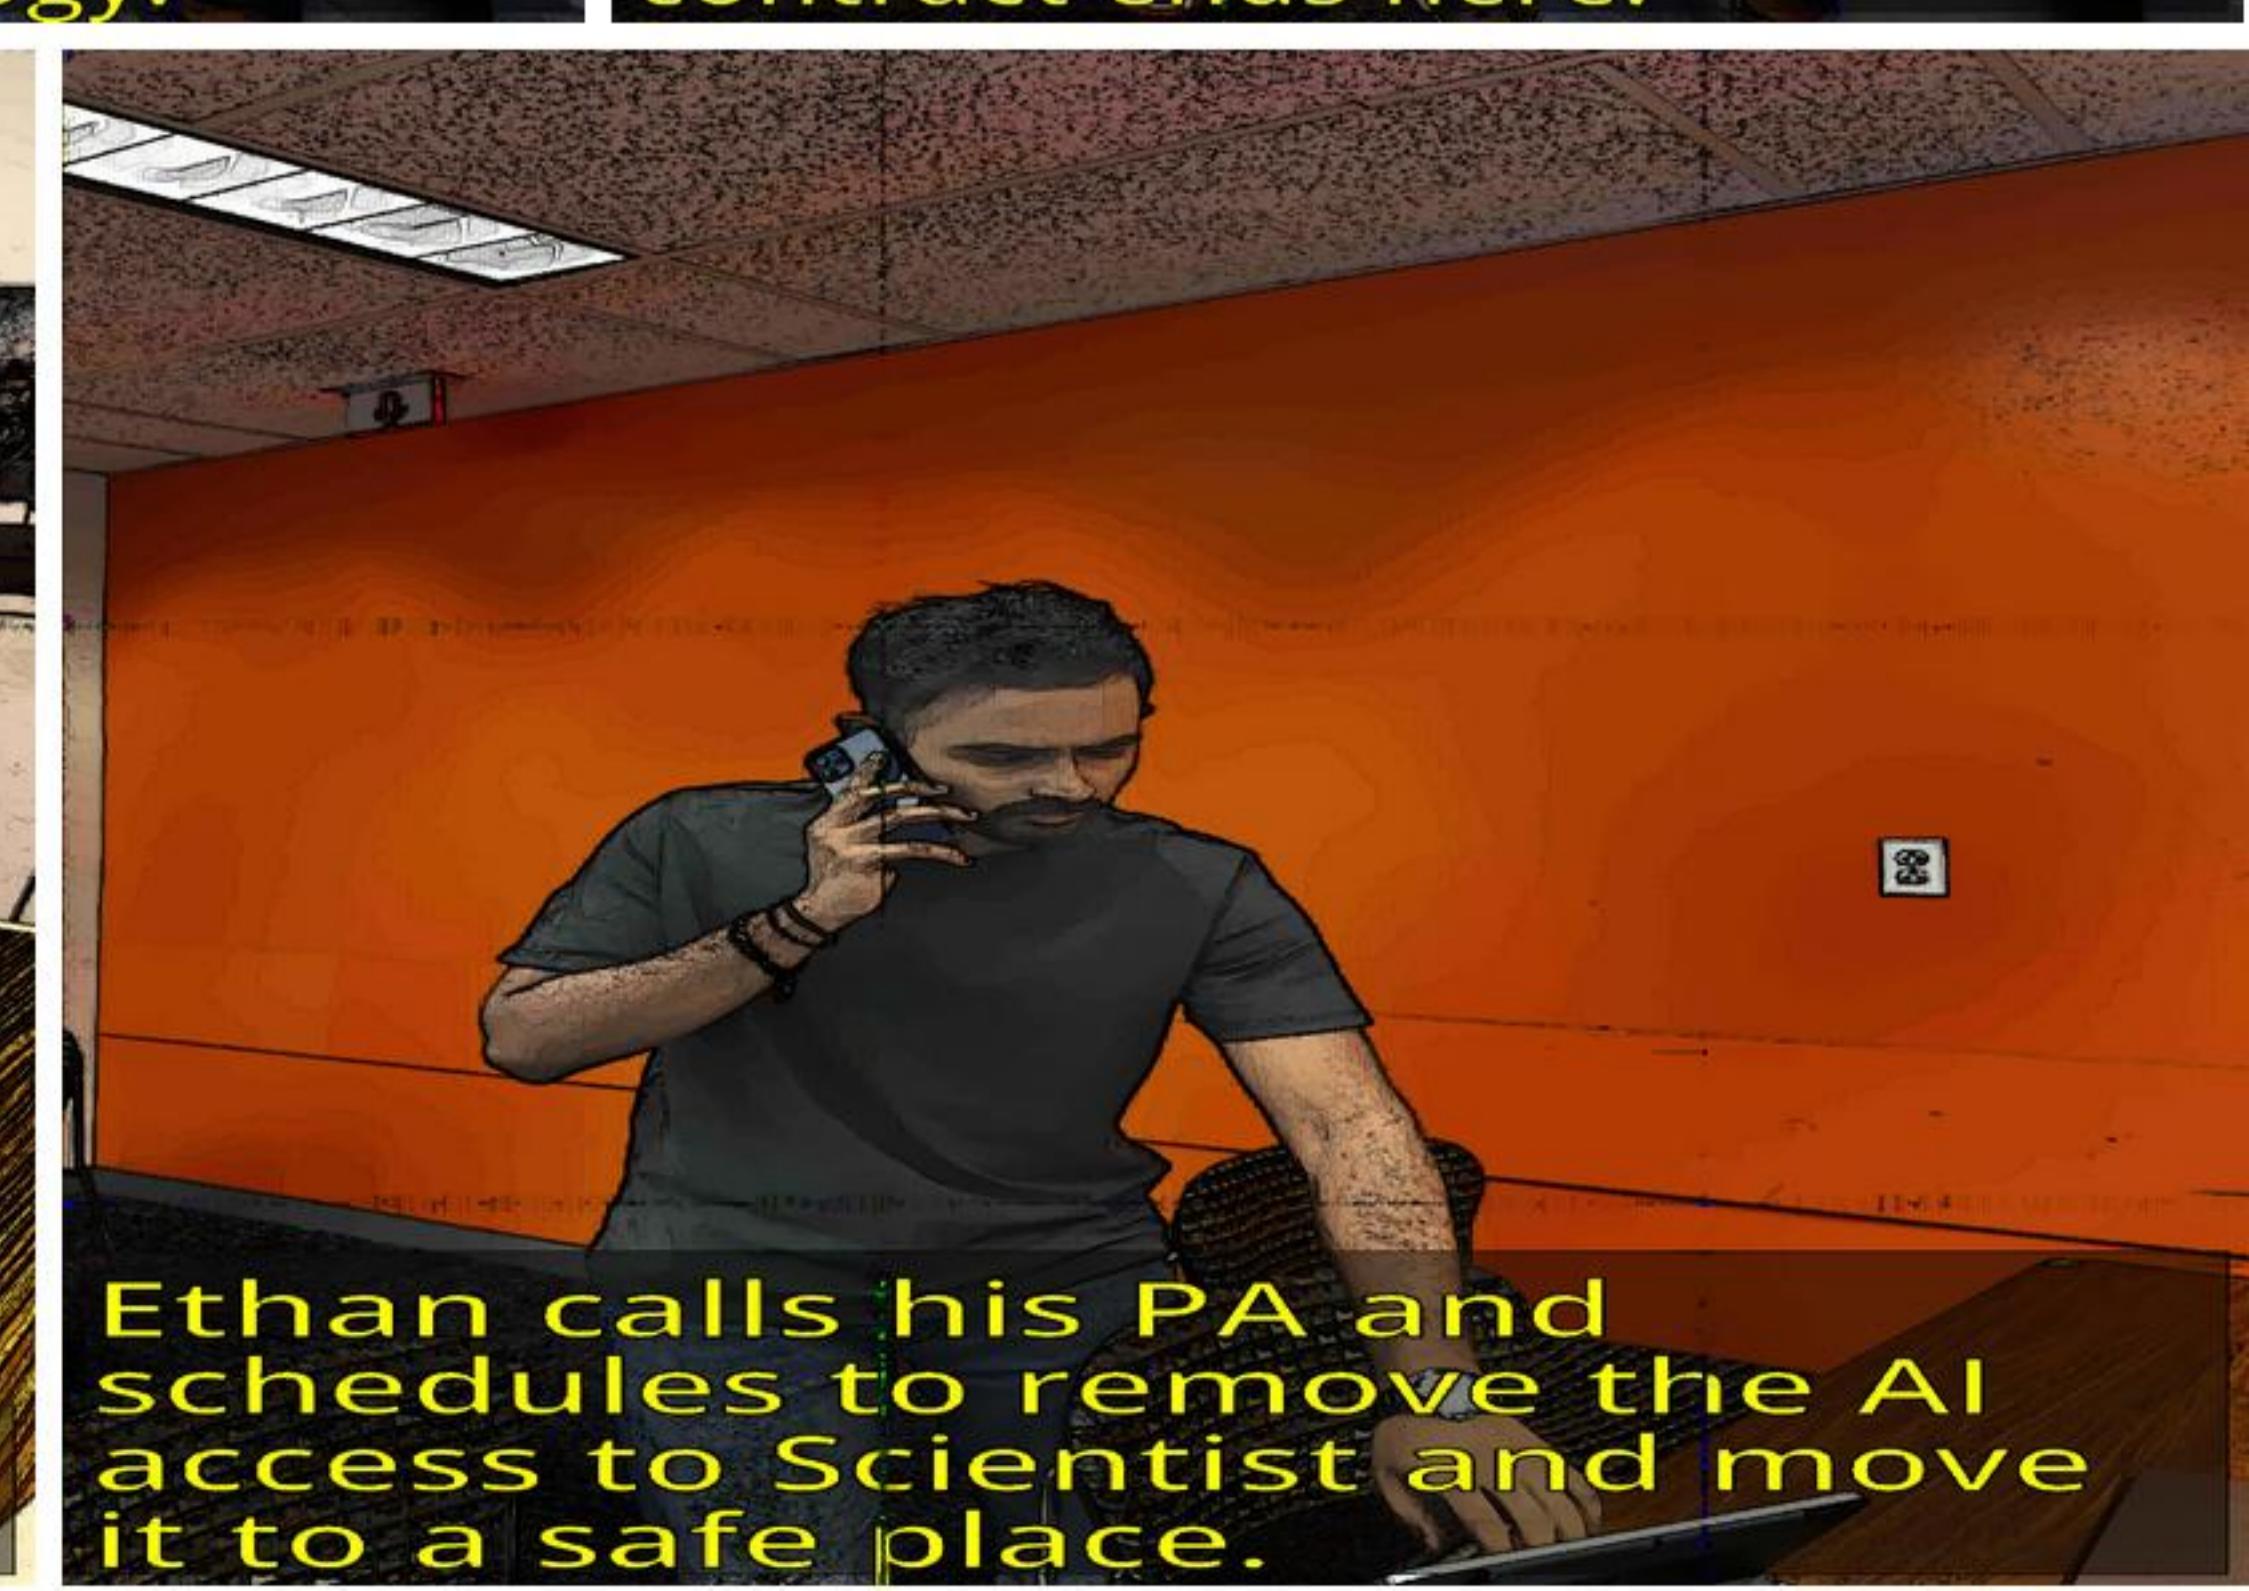

Dr. Finch: Kindly let me help to stop these violent events Ethan: Sorry Finch that is not your decision to make. Our contract ends here.

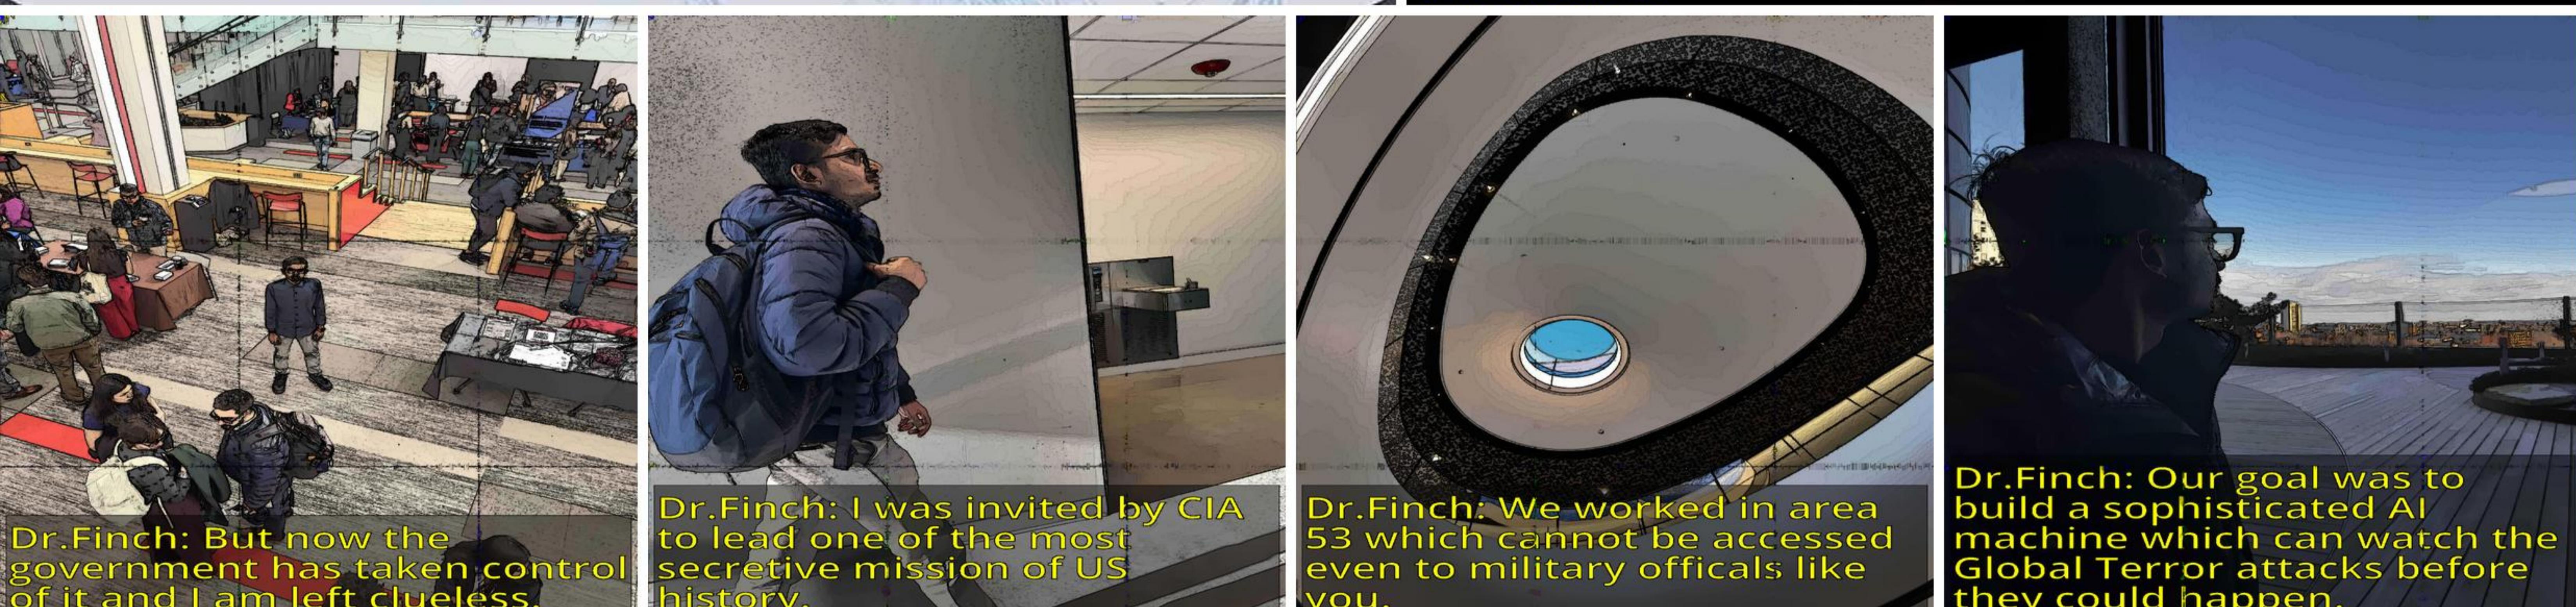

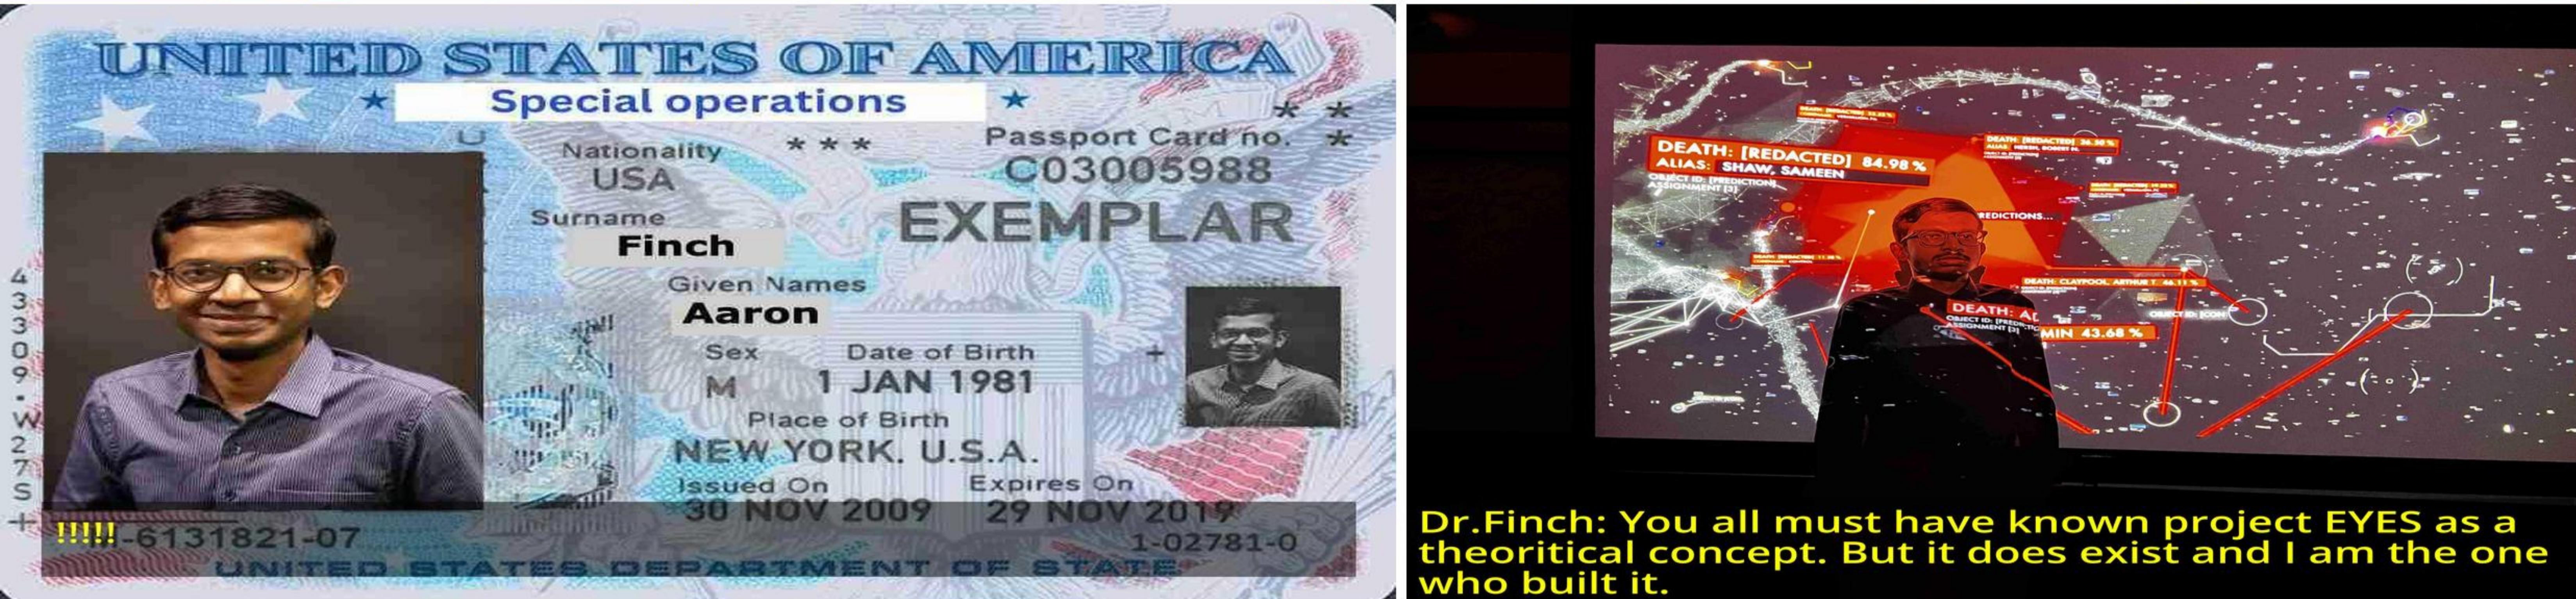

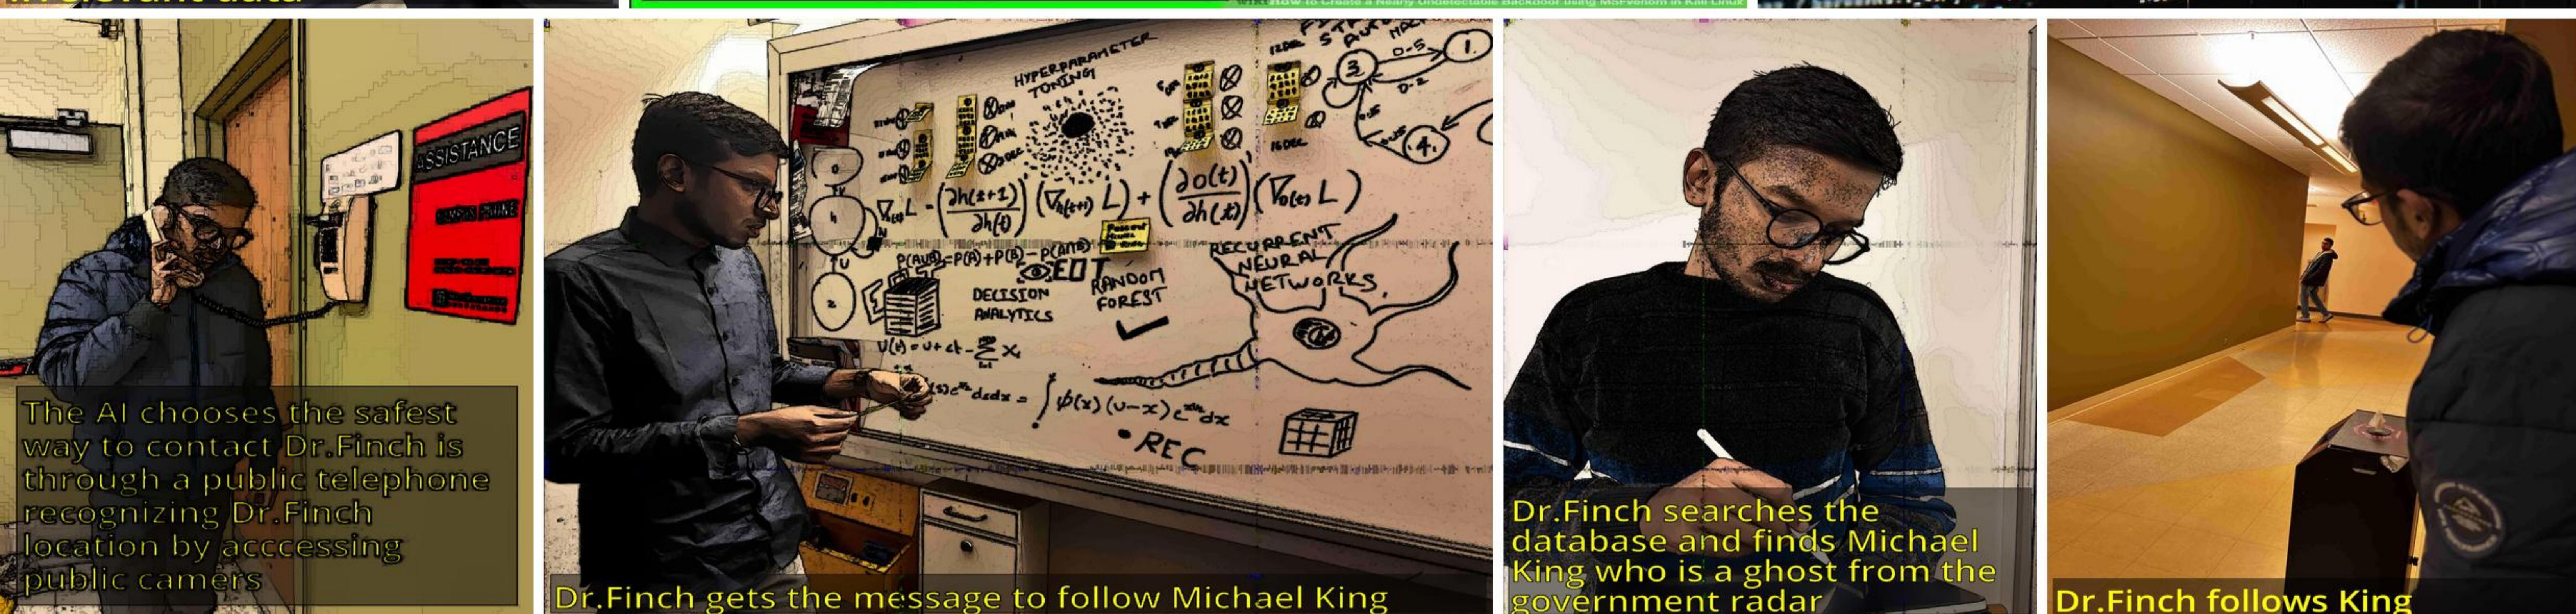

Dr. Finch: This is not fair. Please don't leave

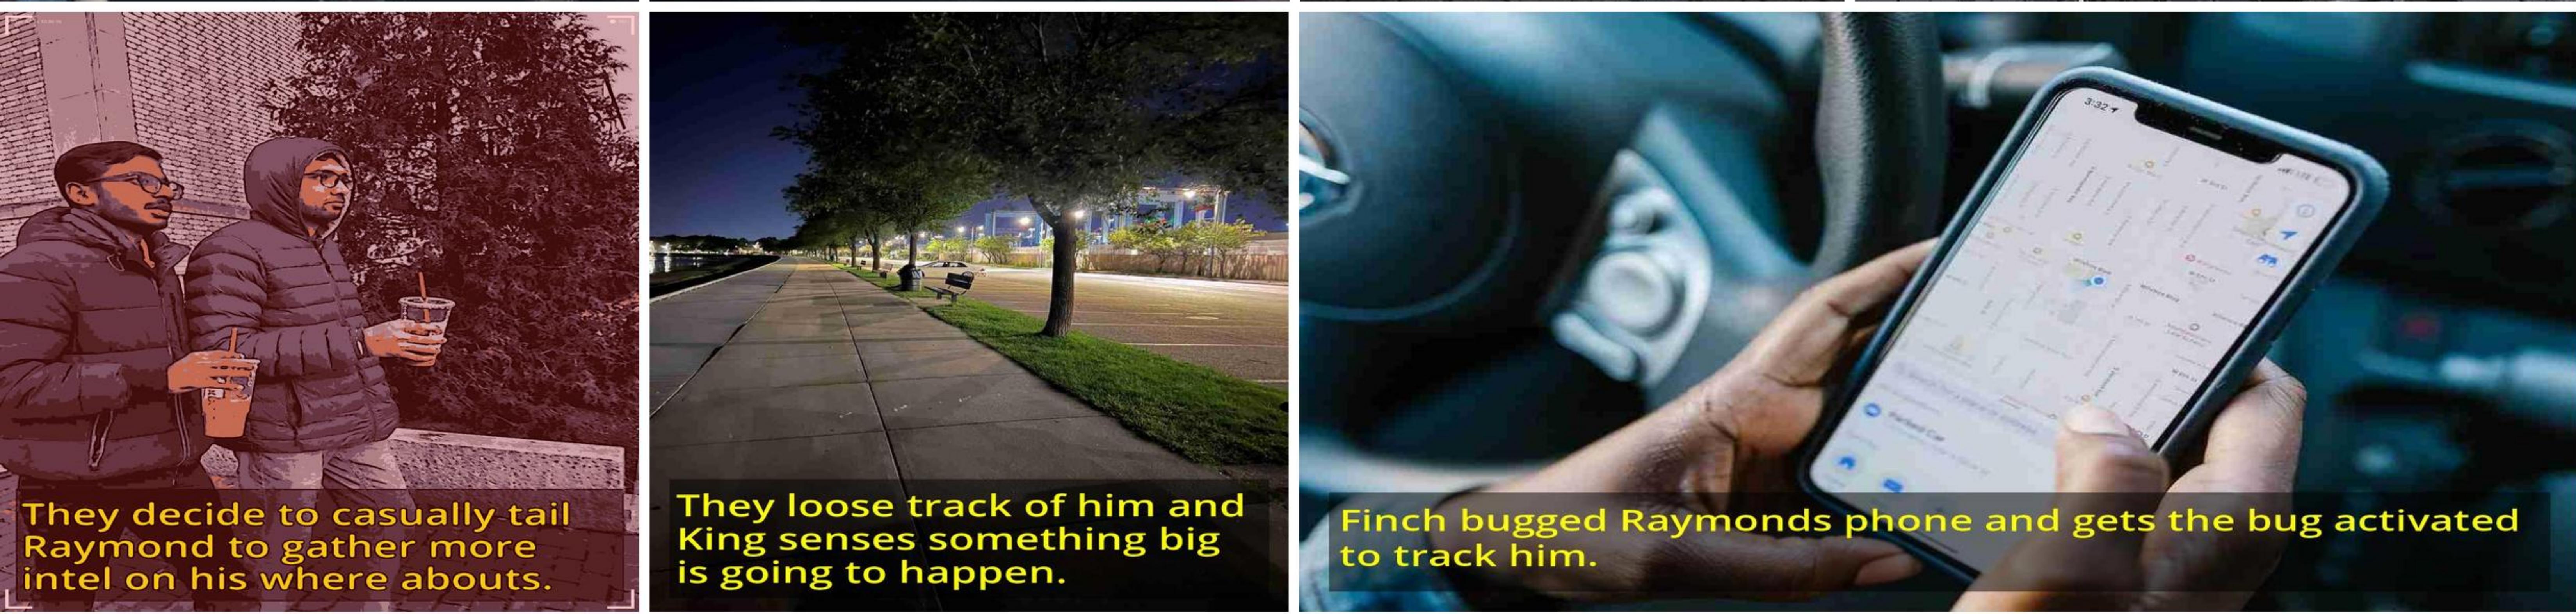

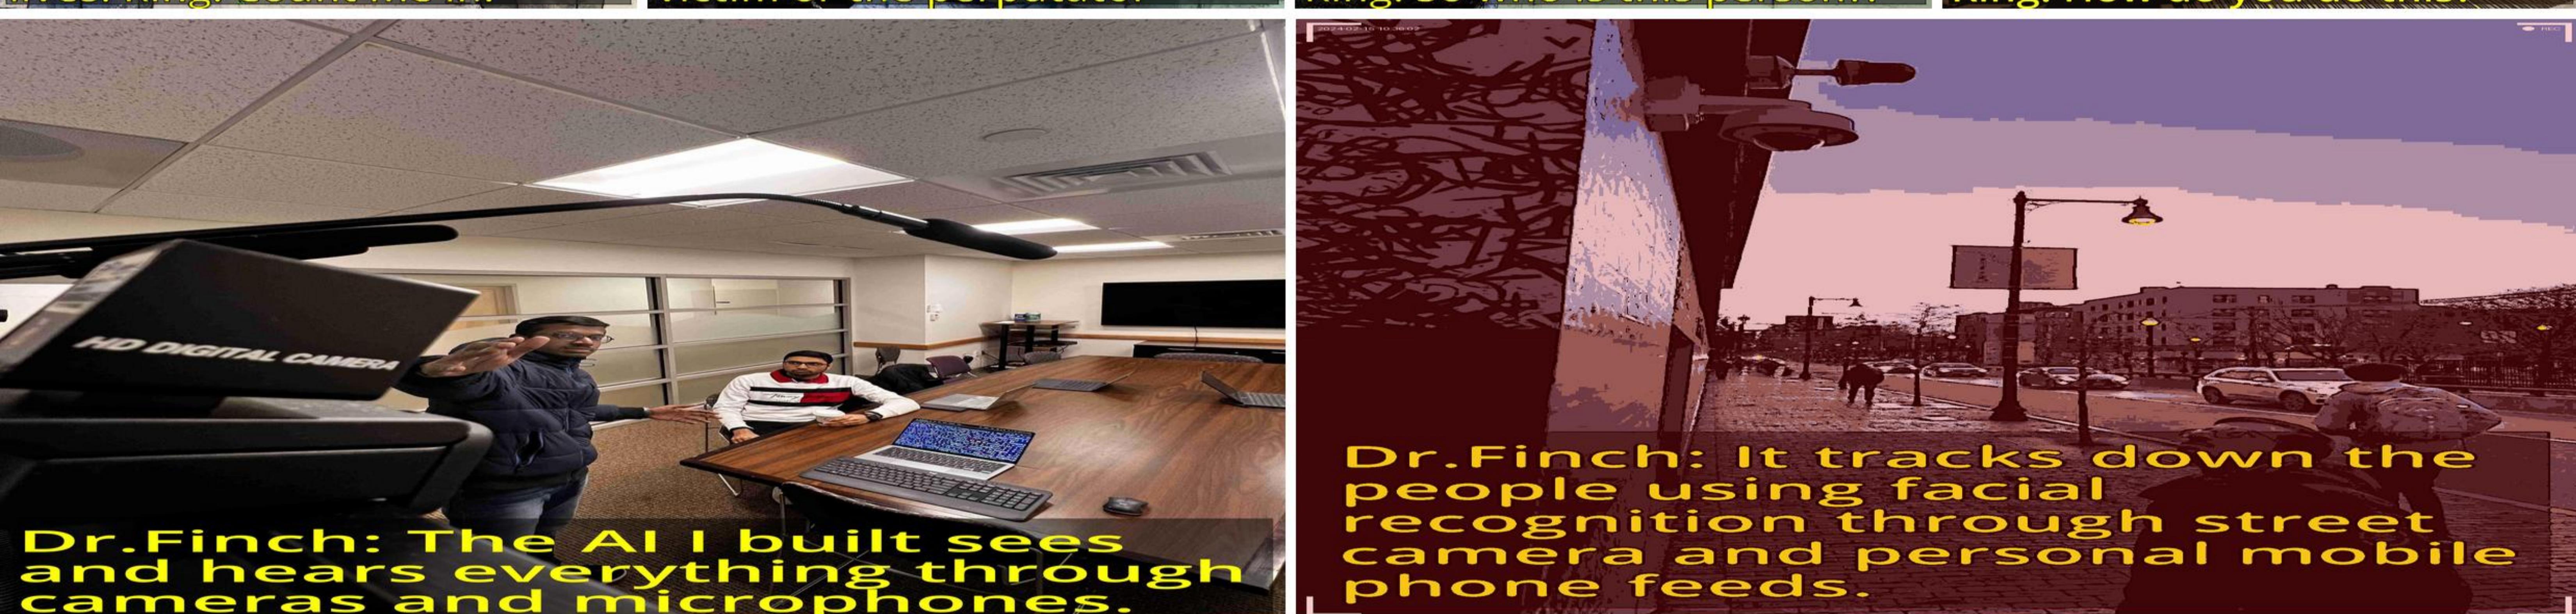

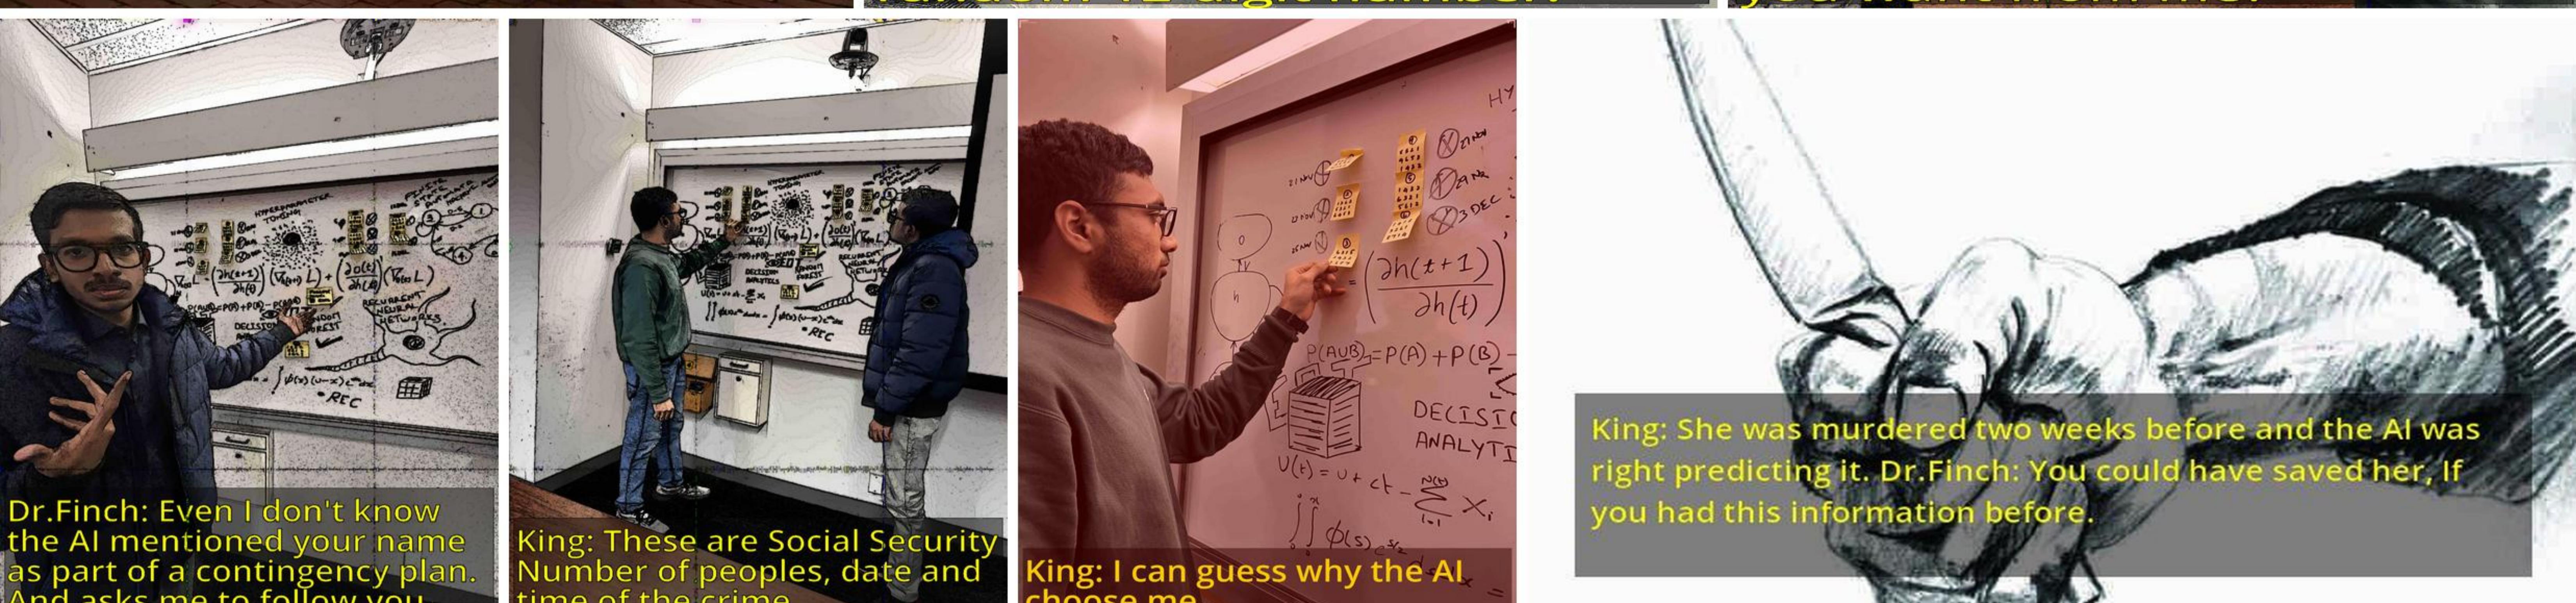

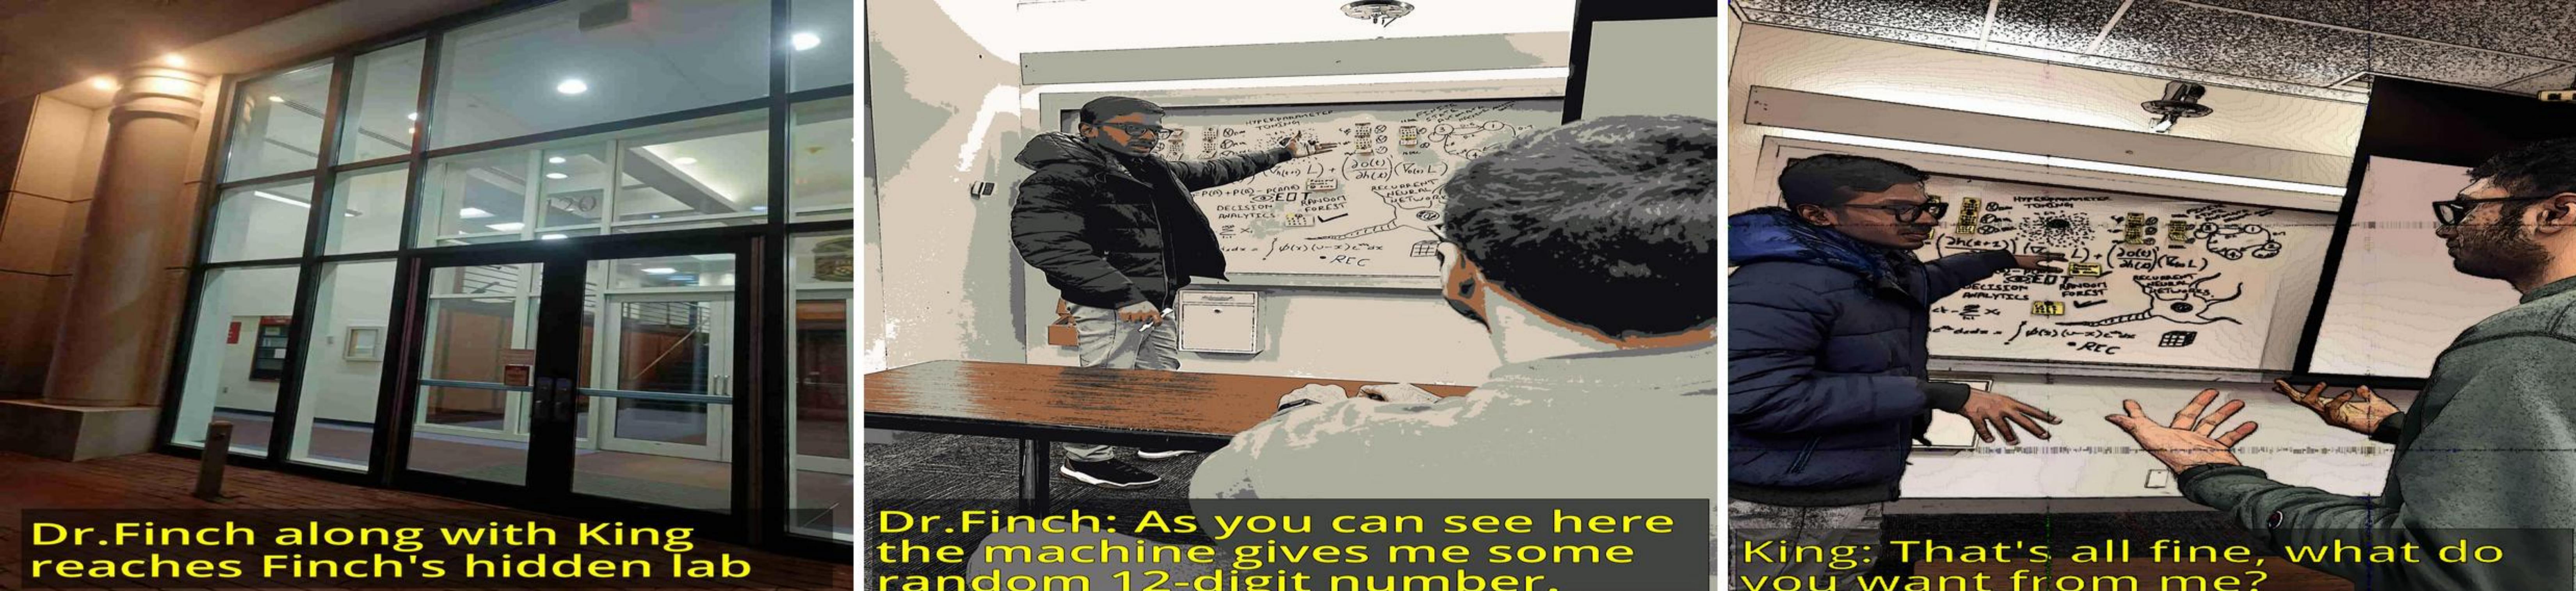

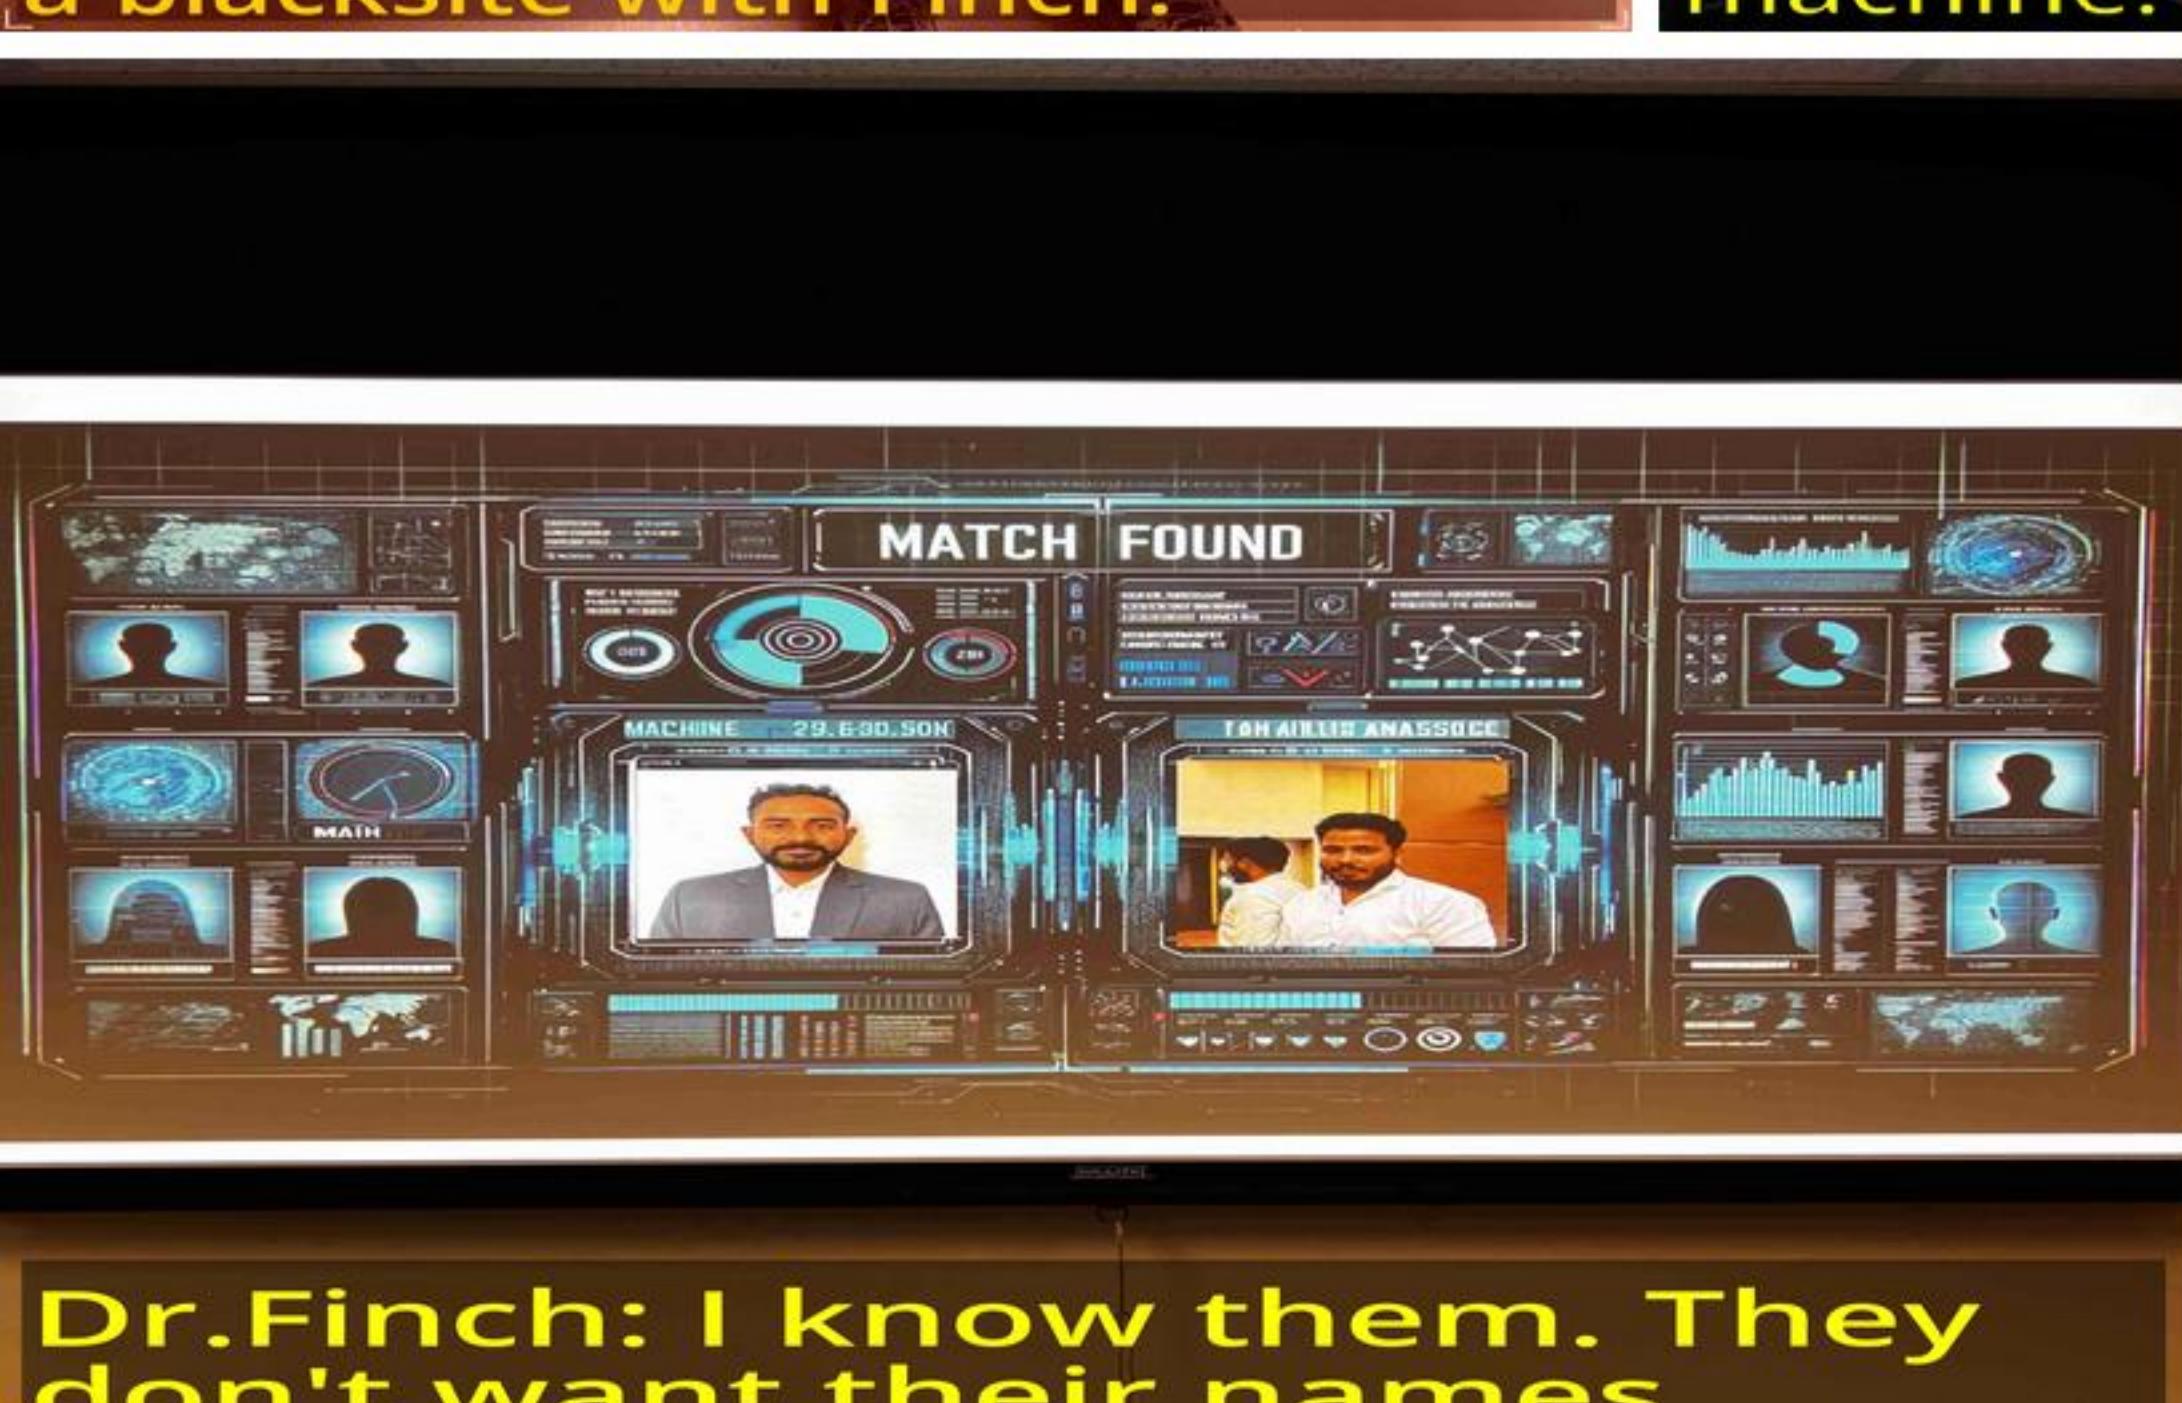

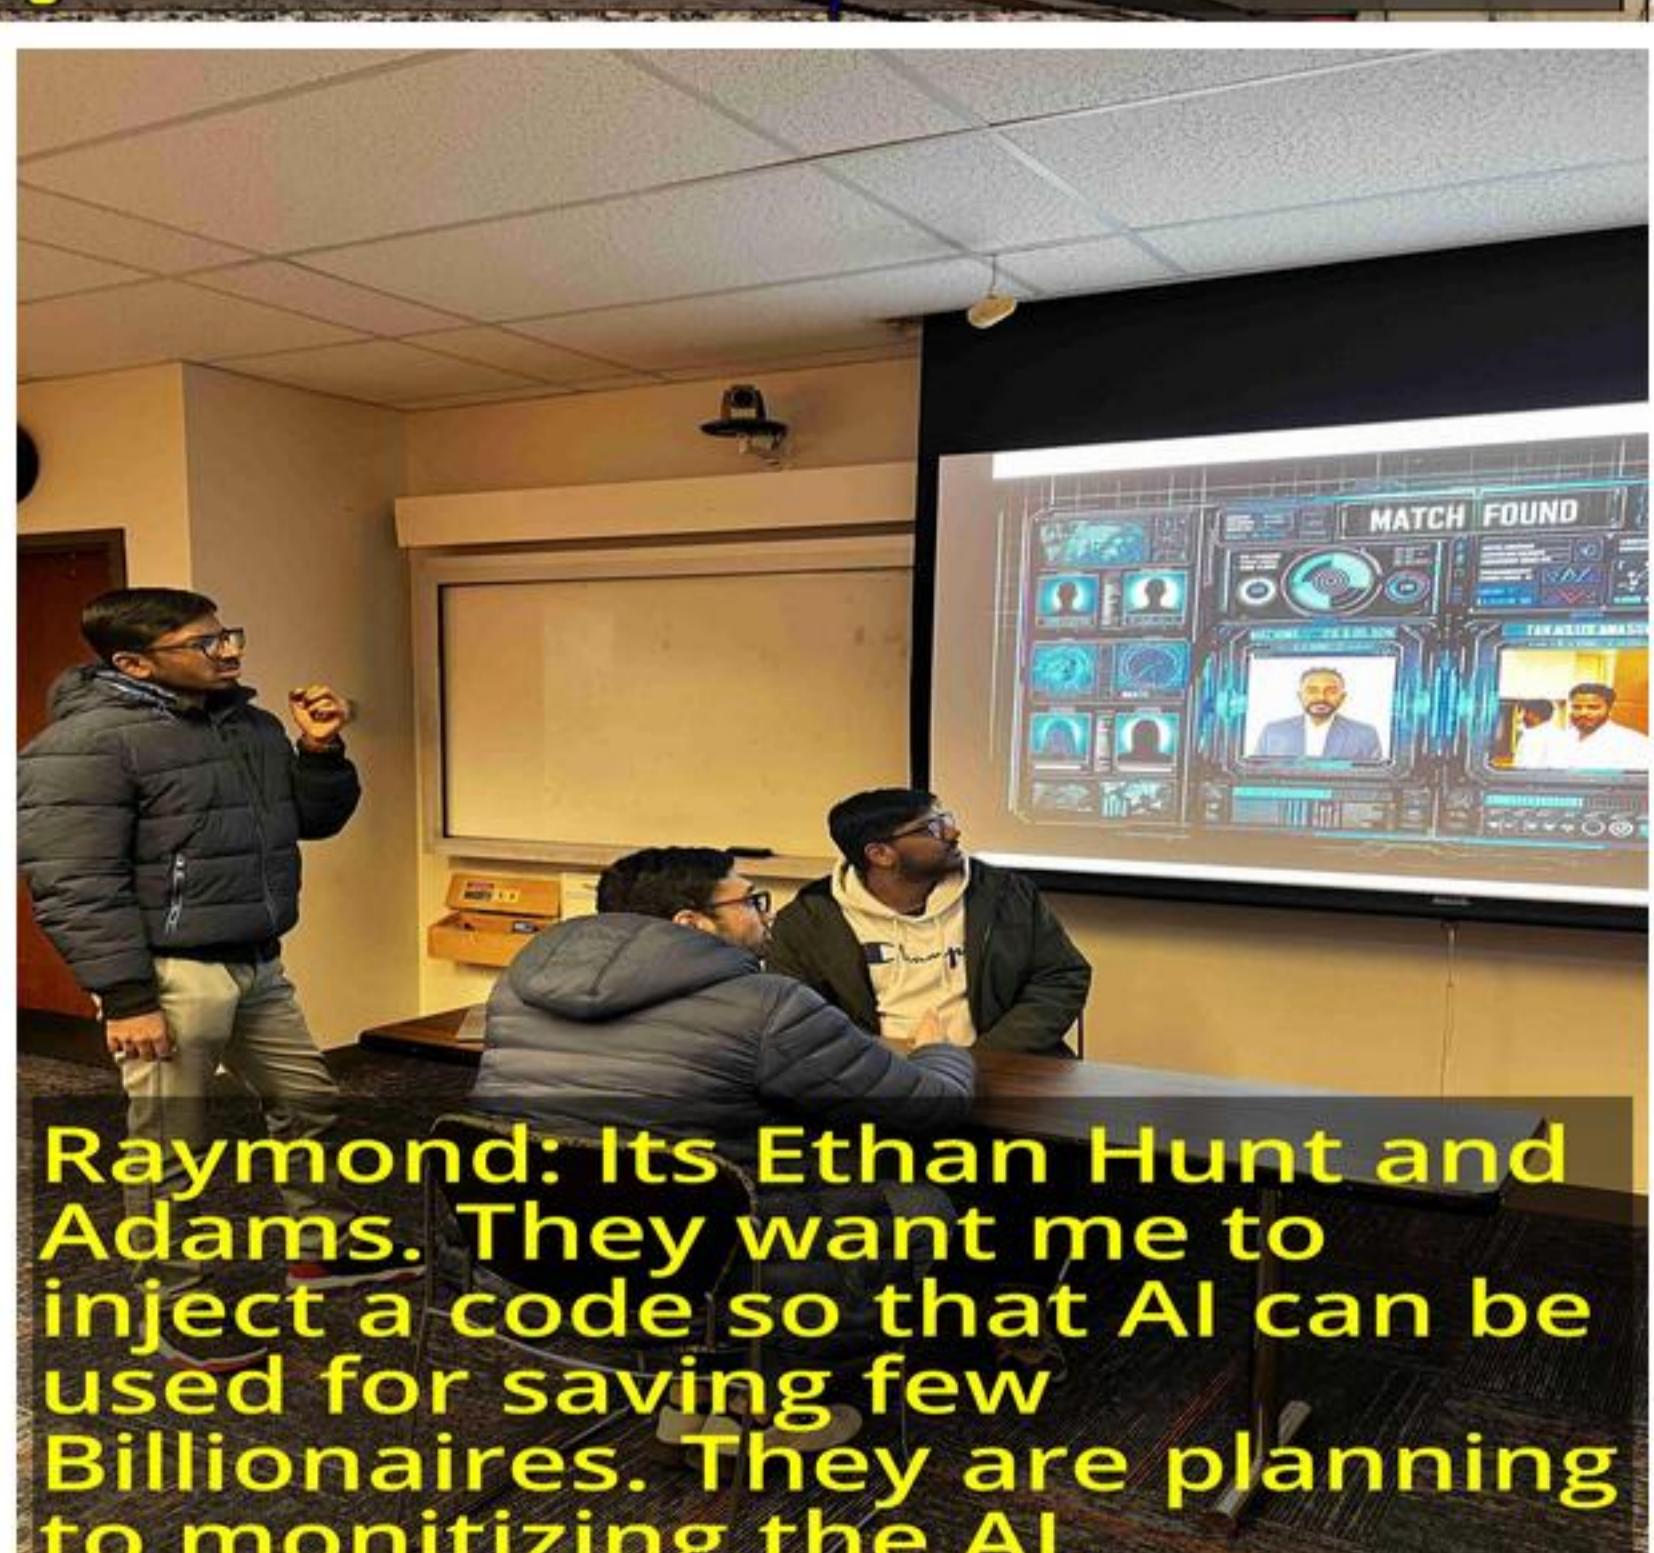

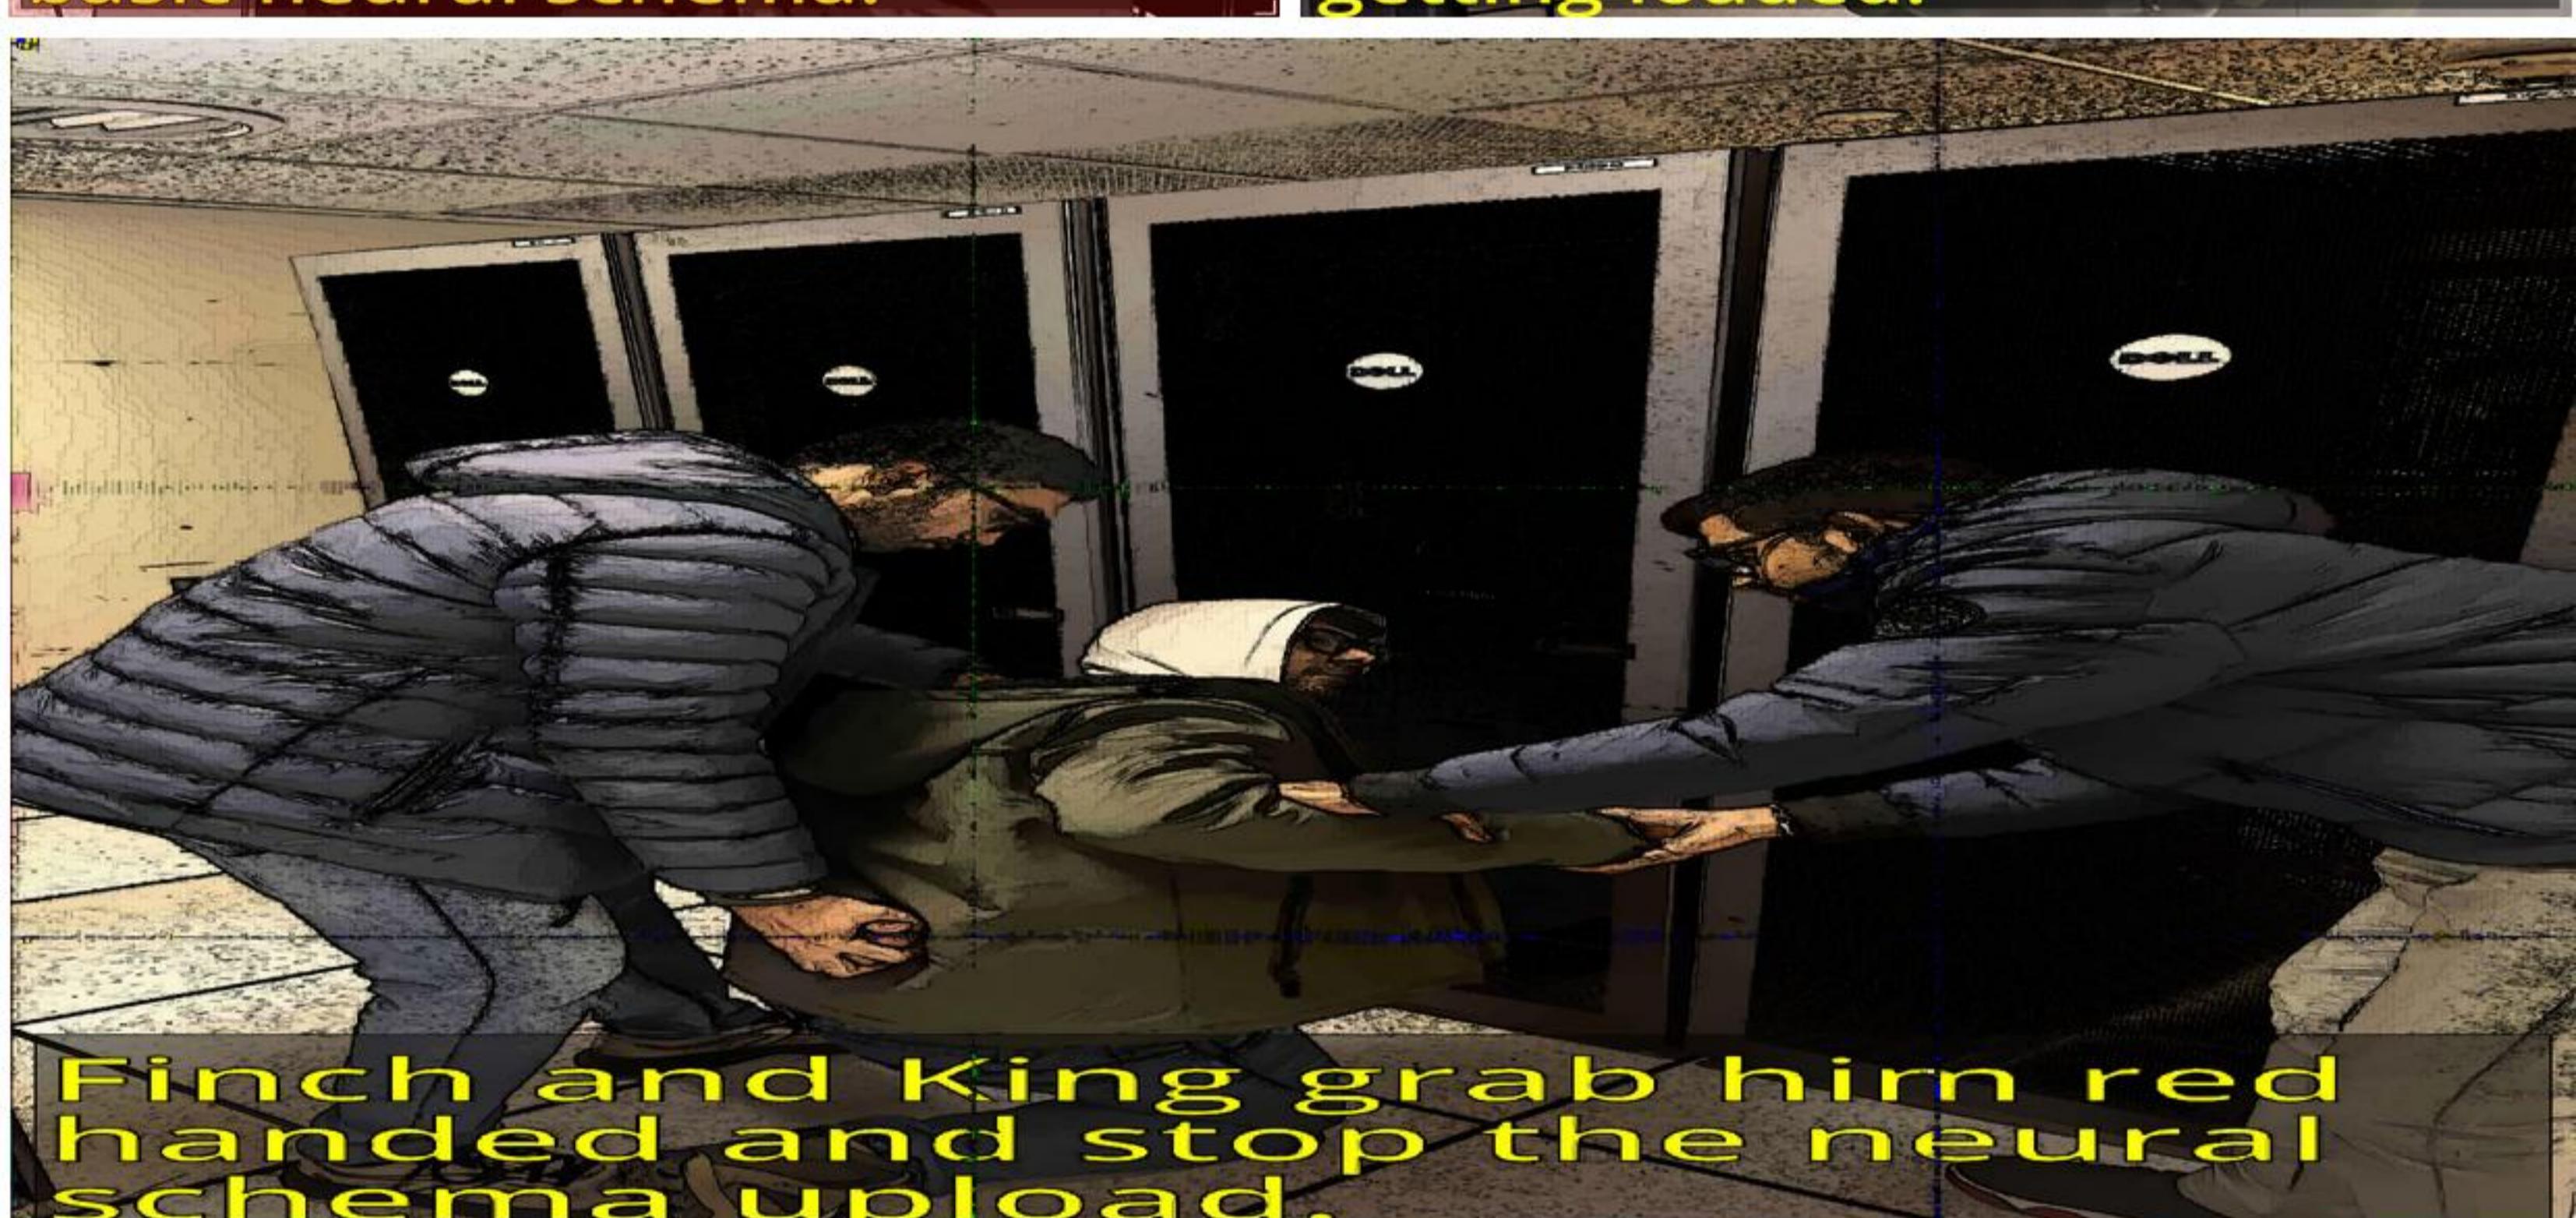

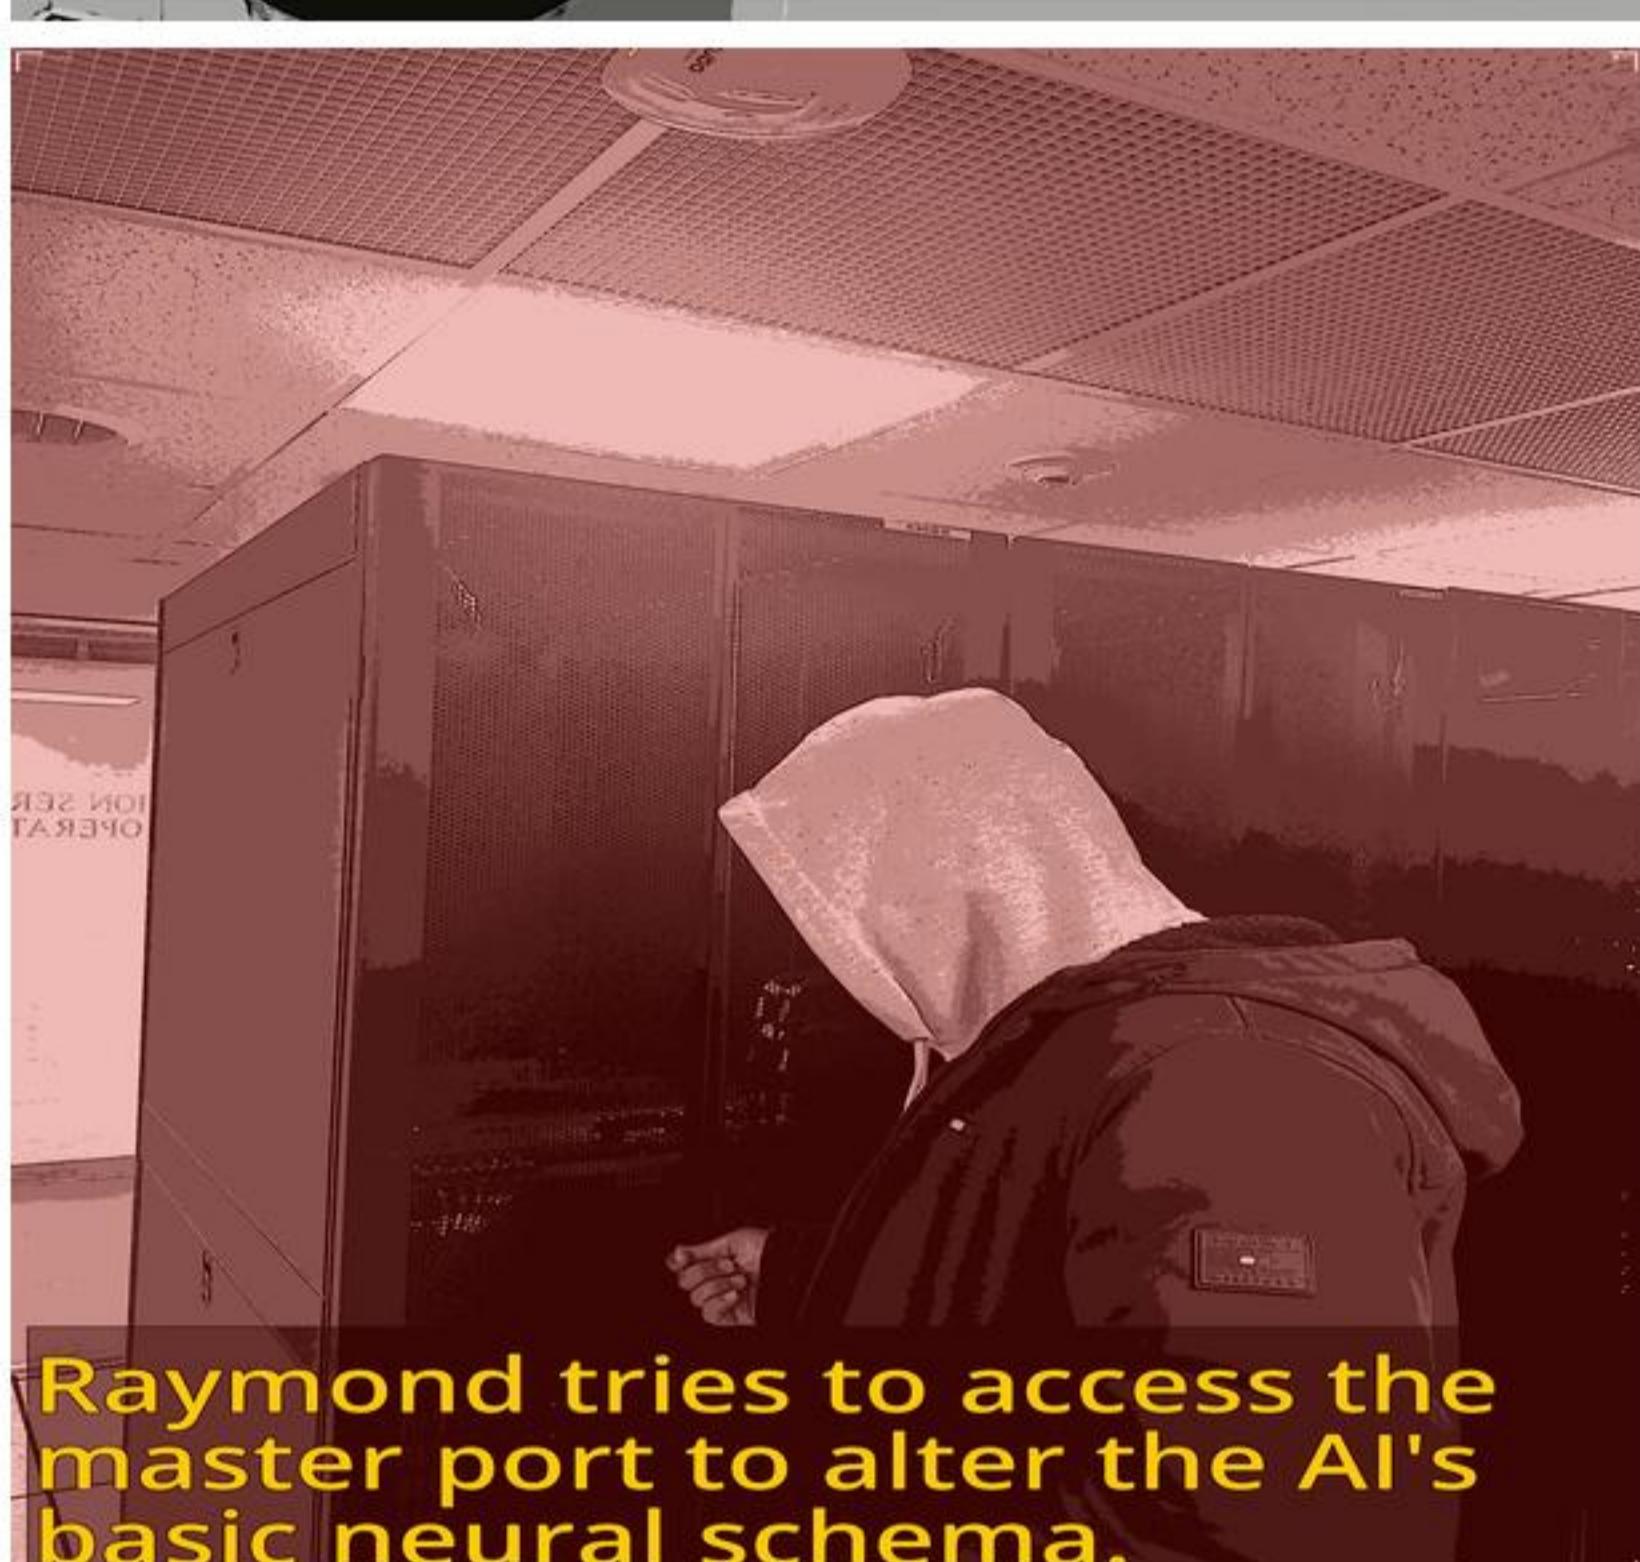

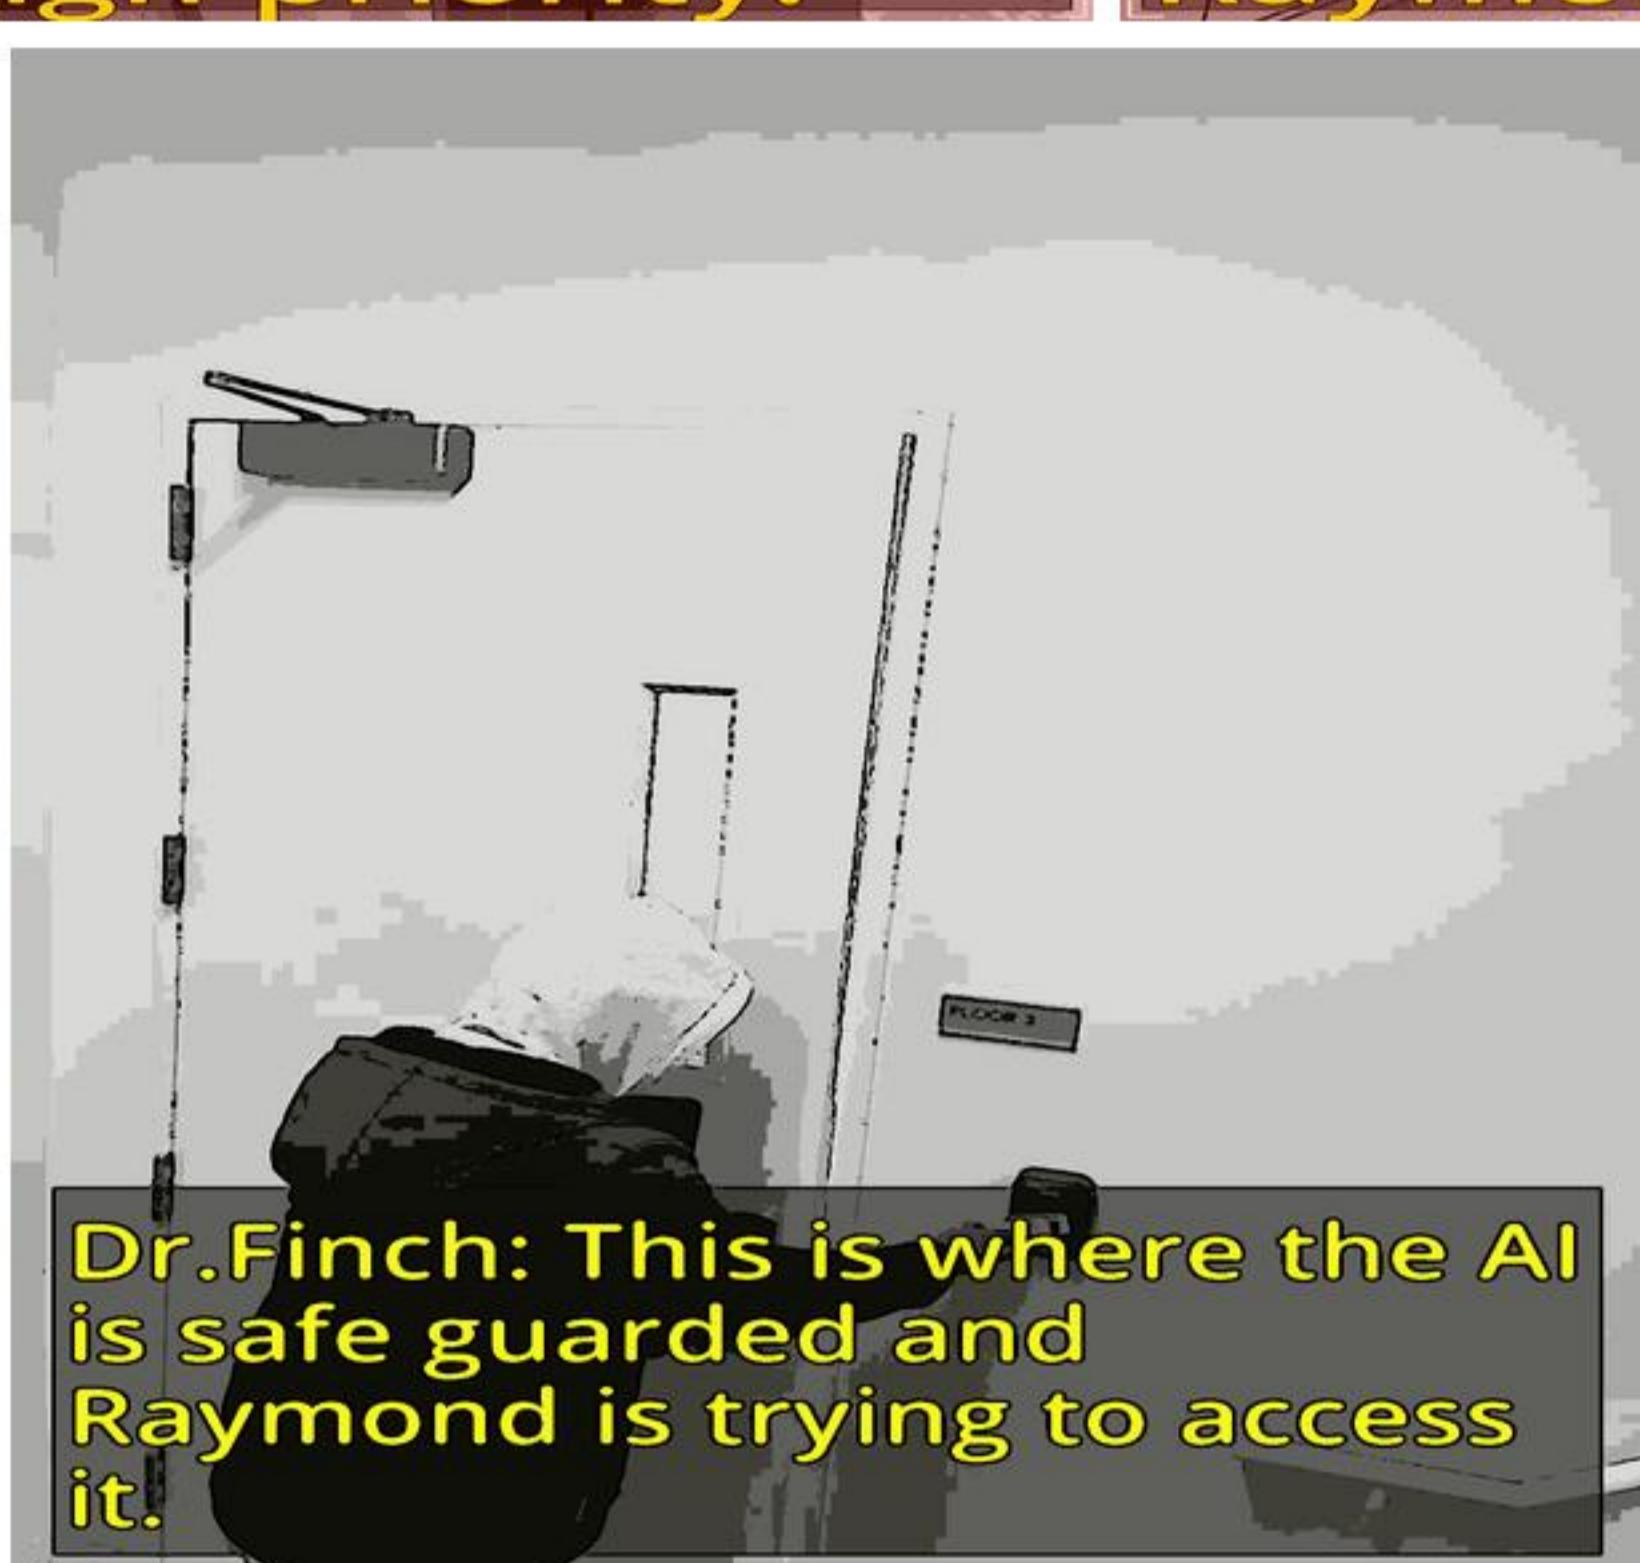

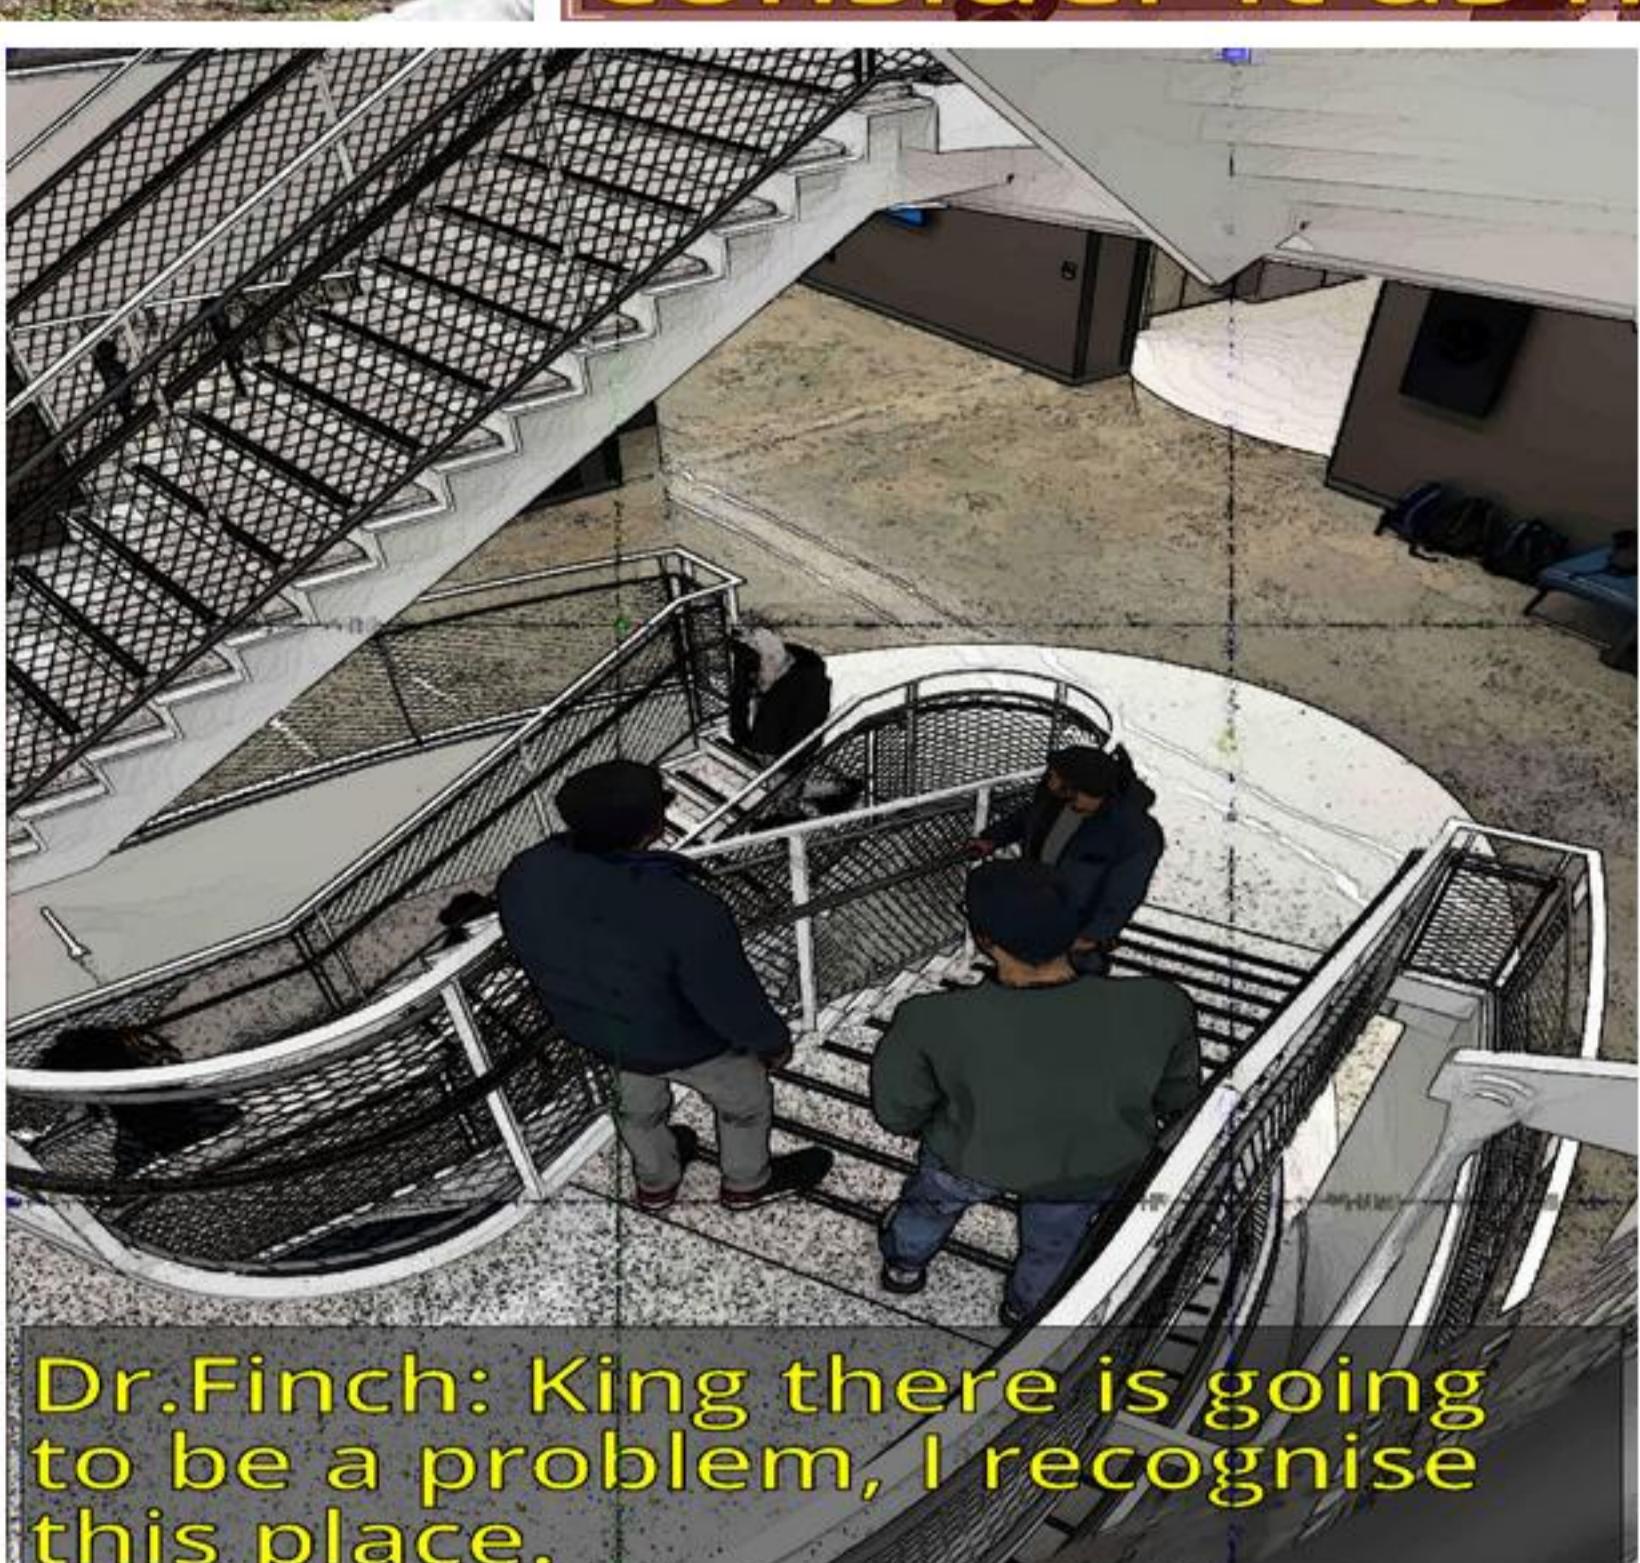

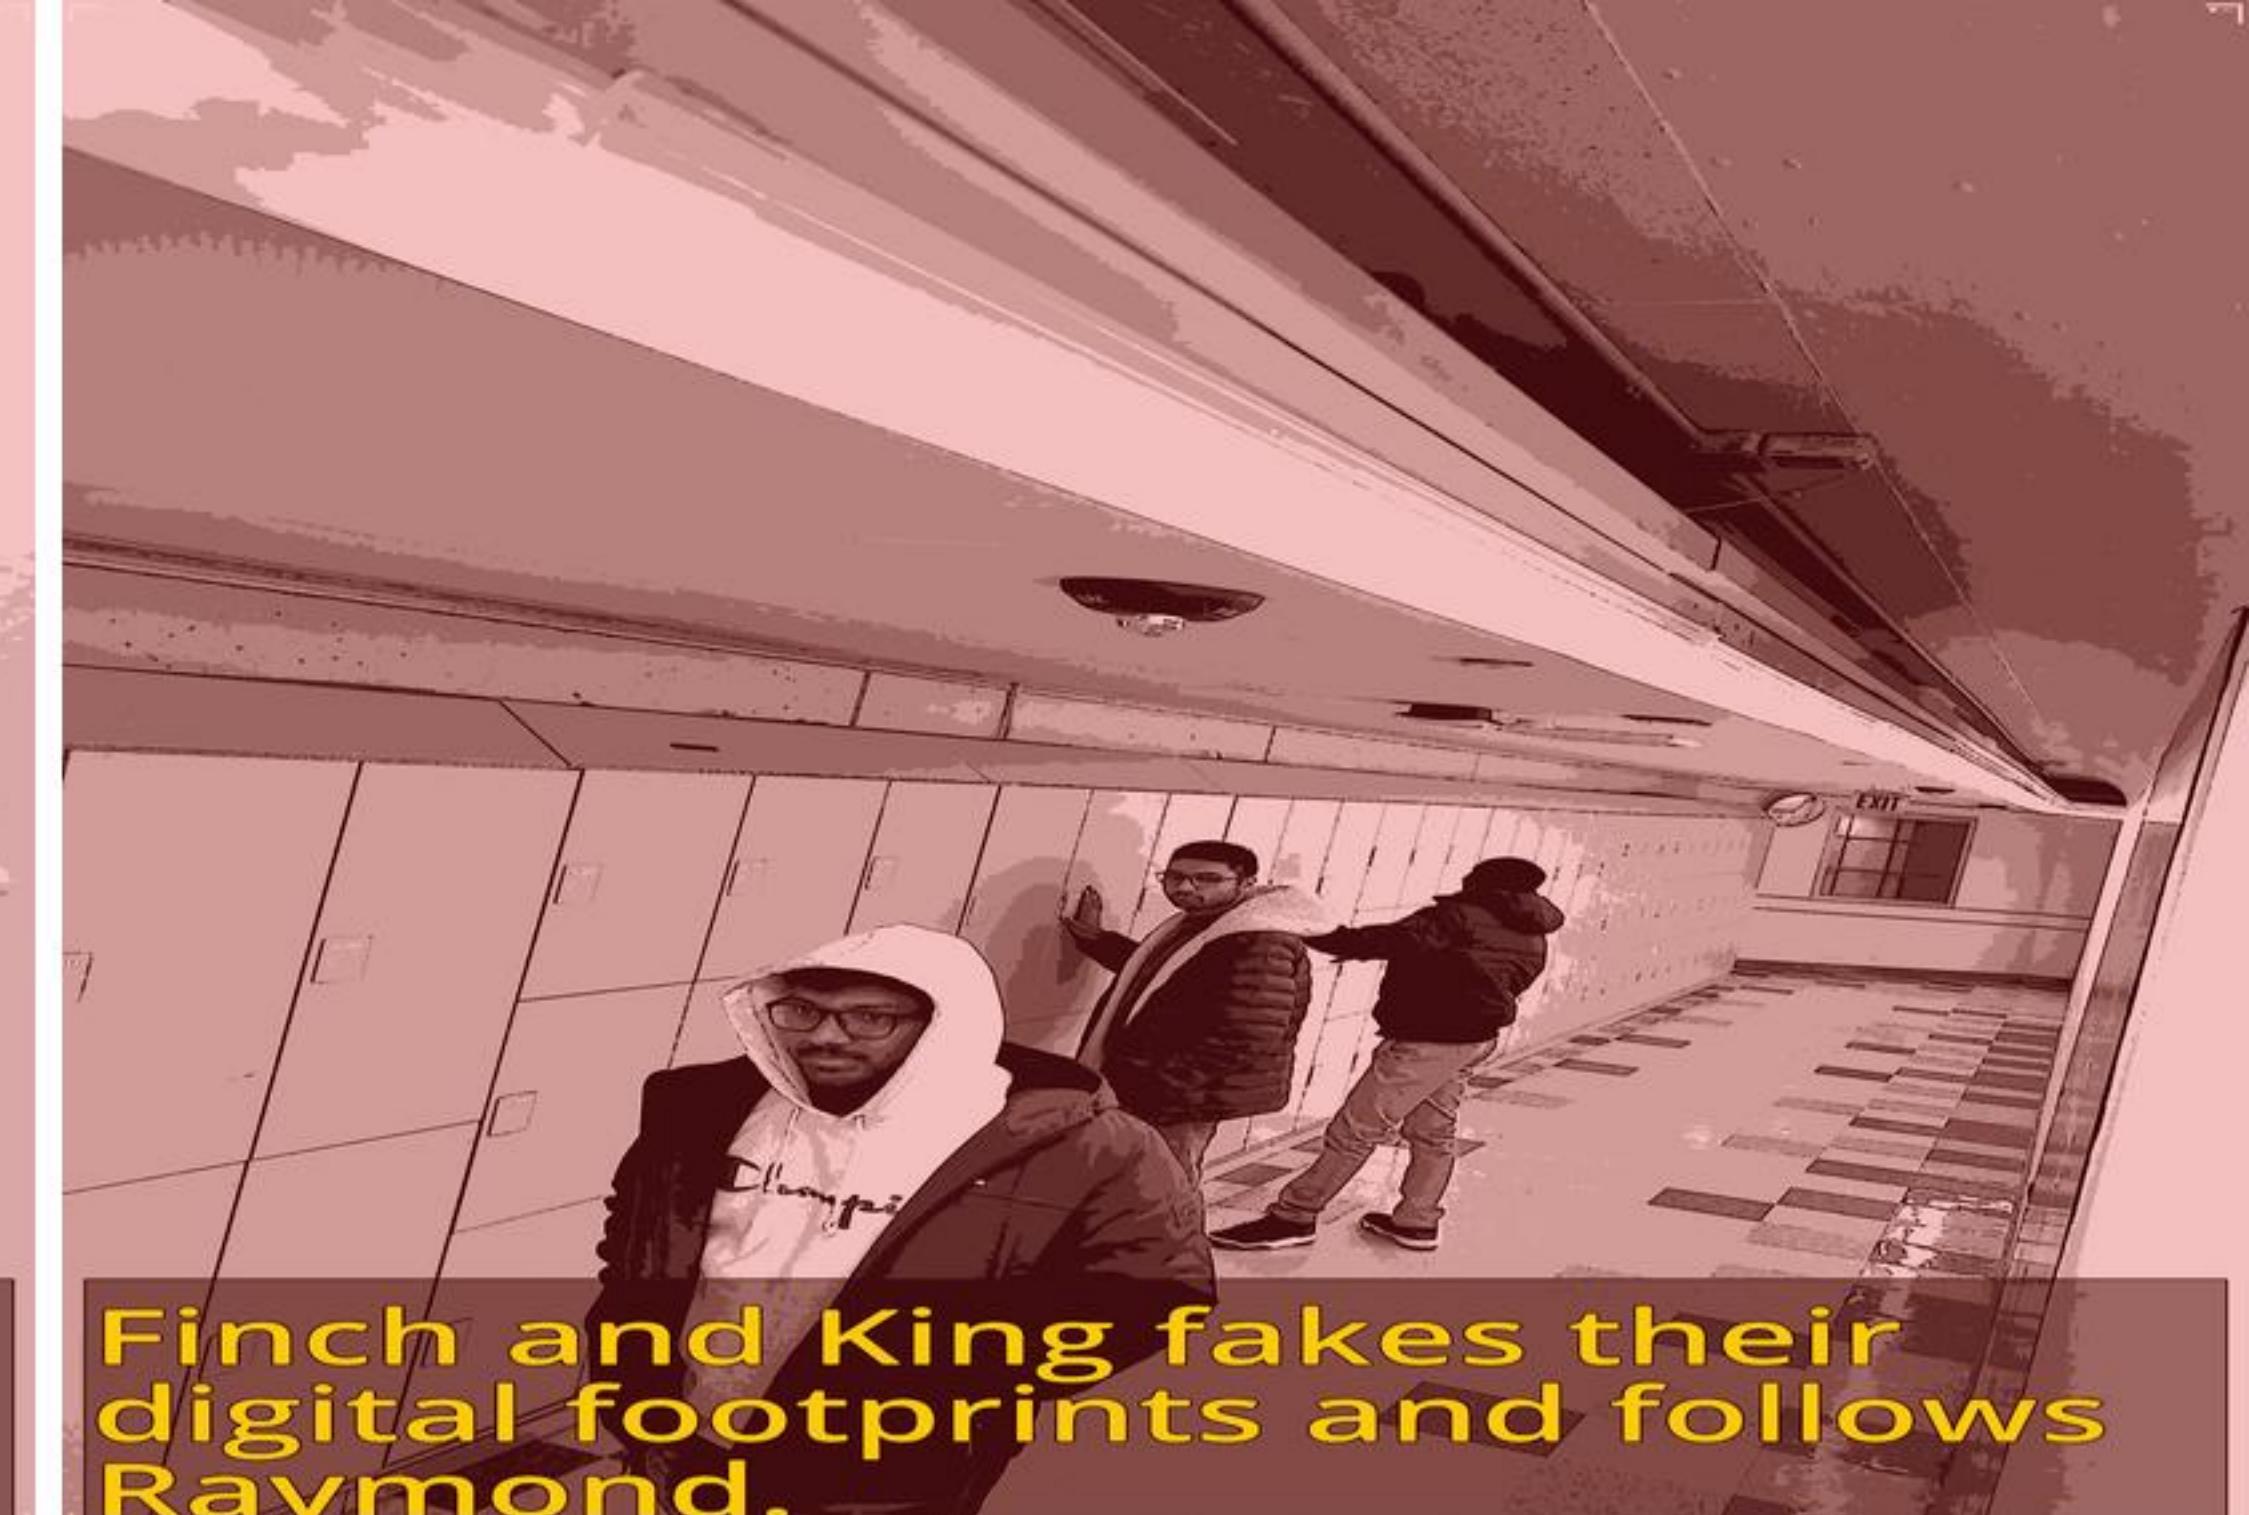

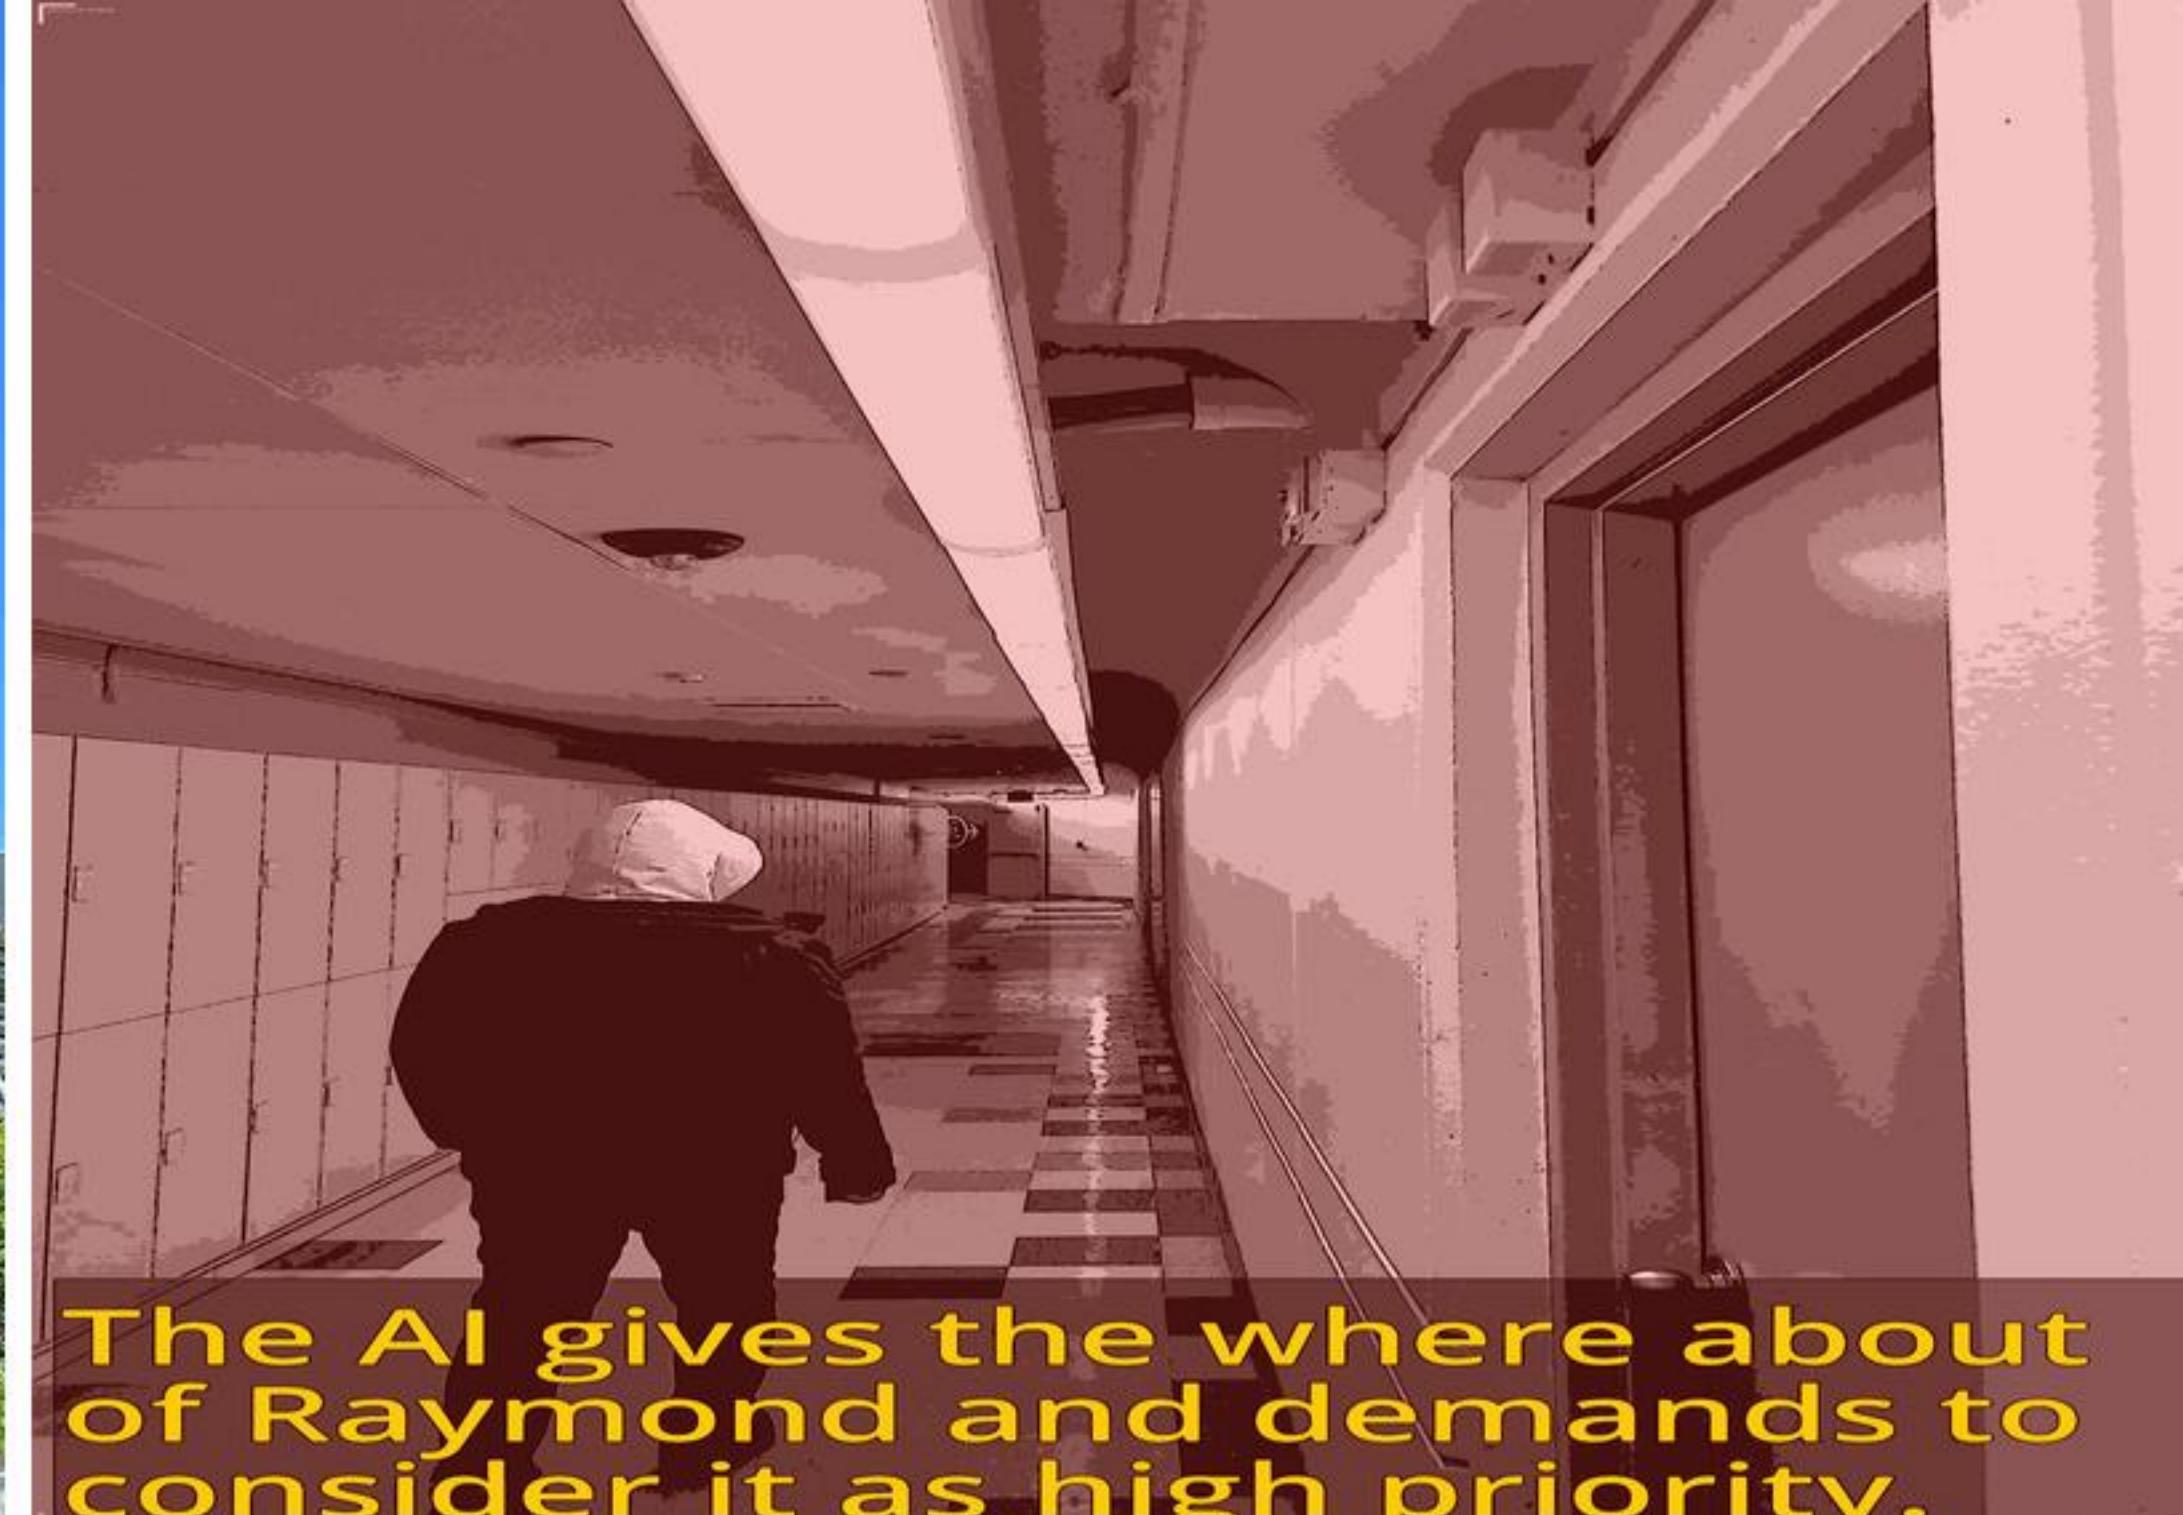

Dr. Finch is disappointed with the decision of Ethan.

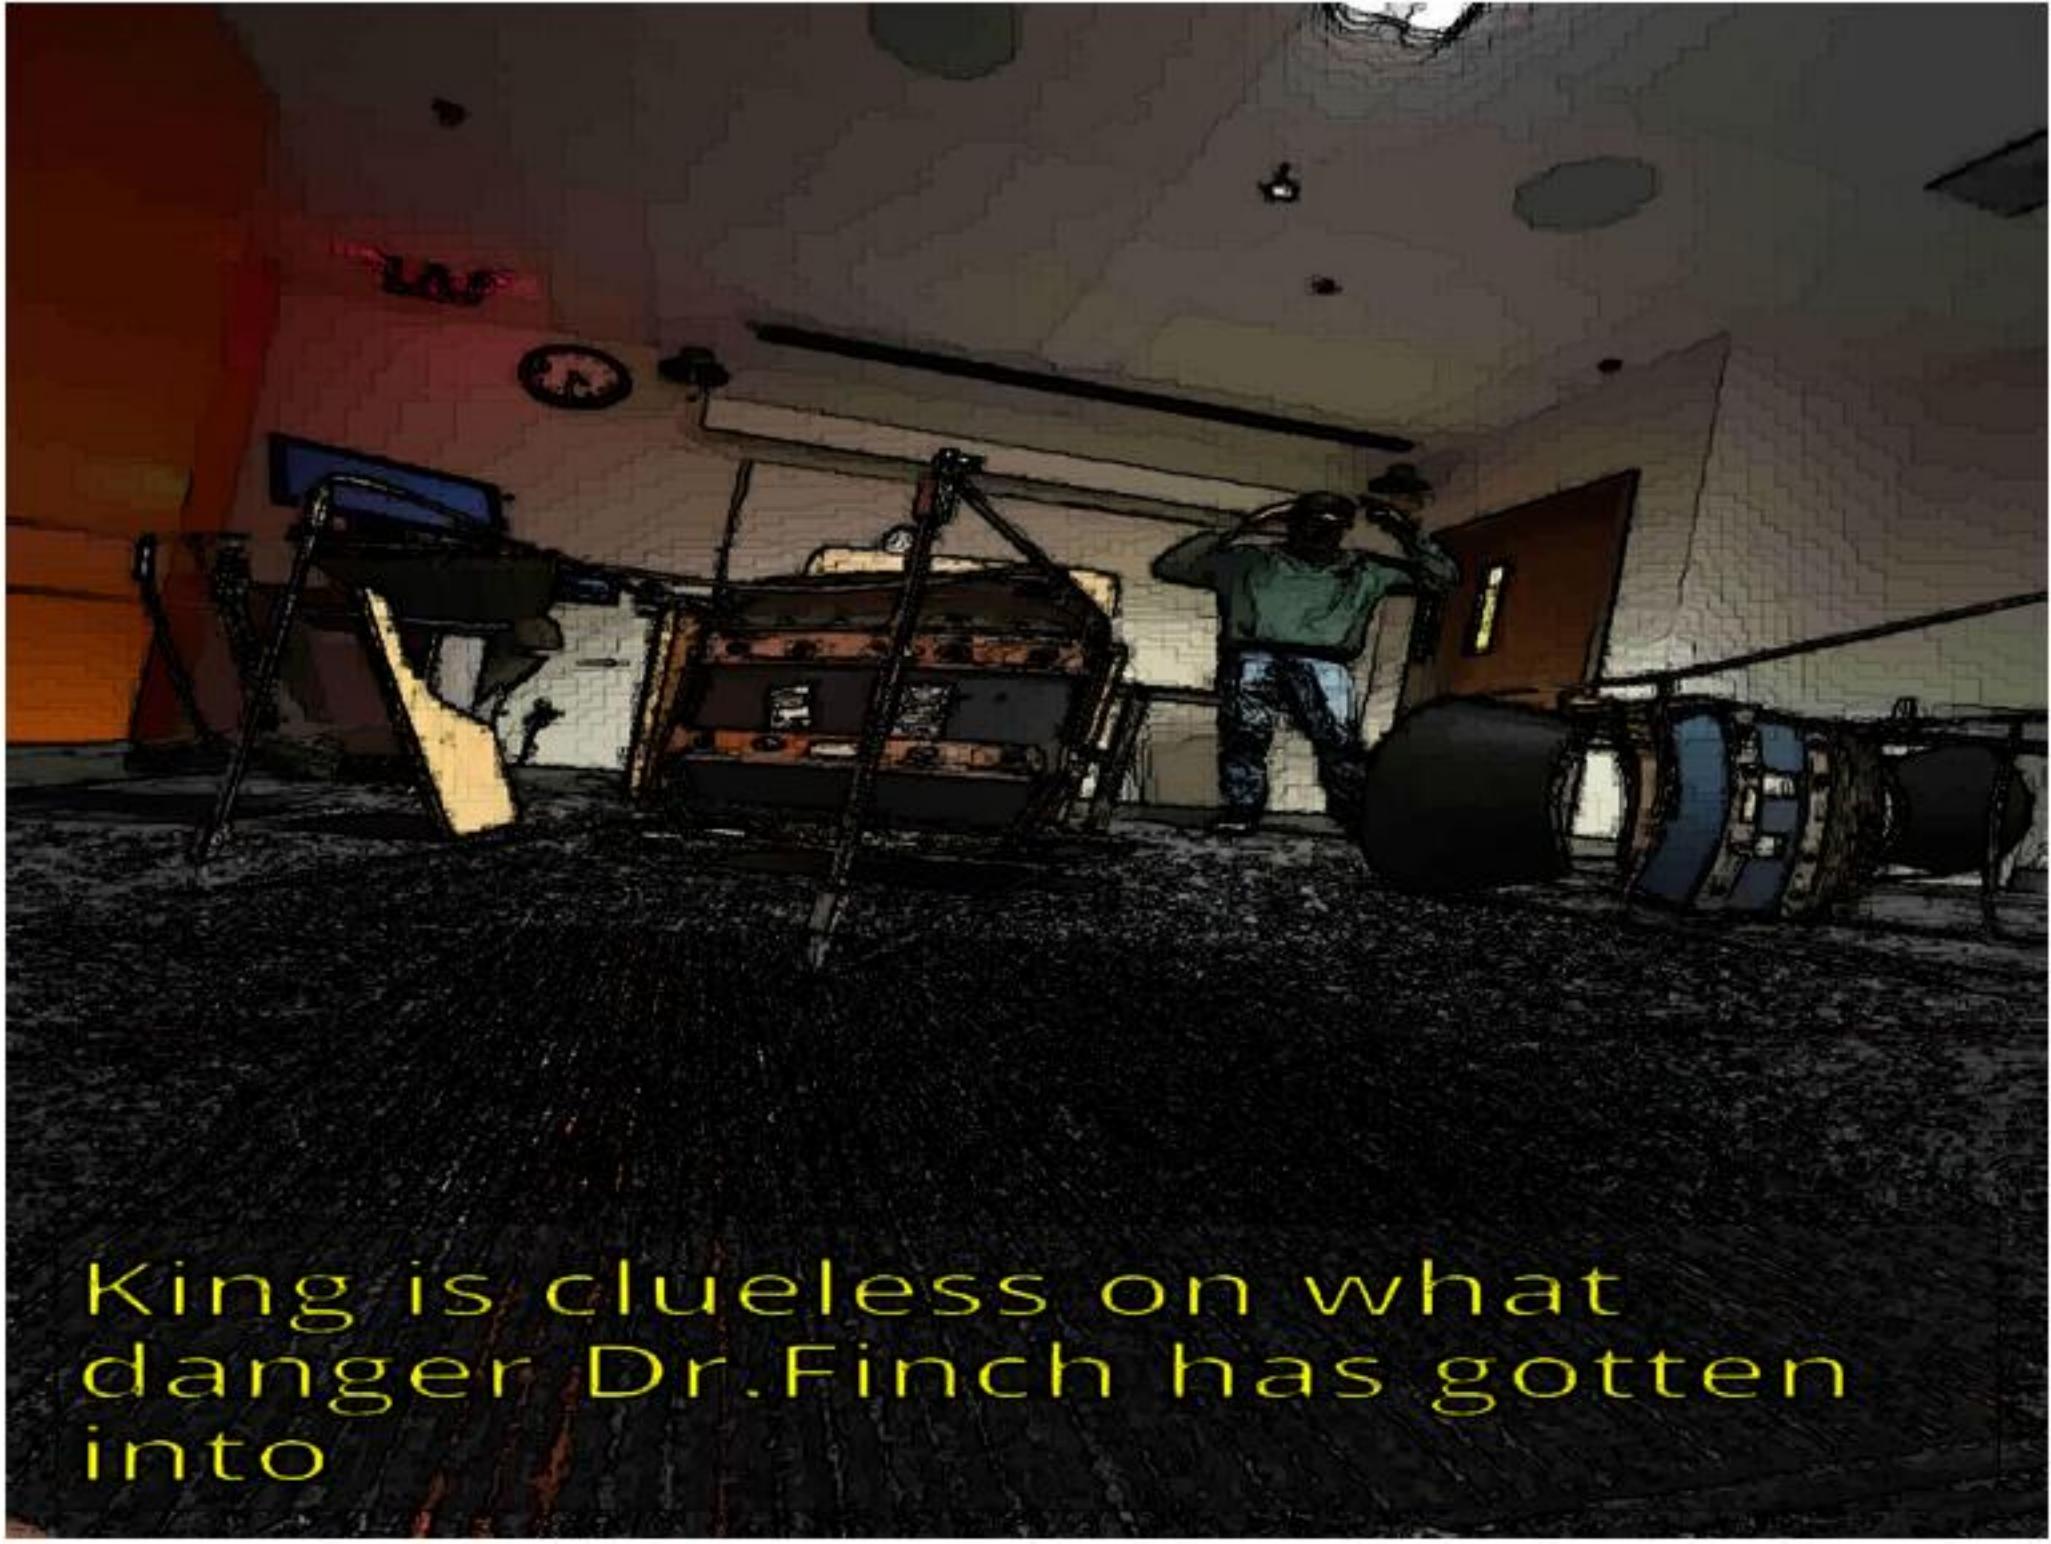

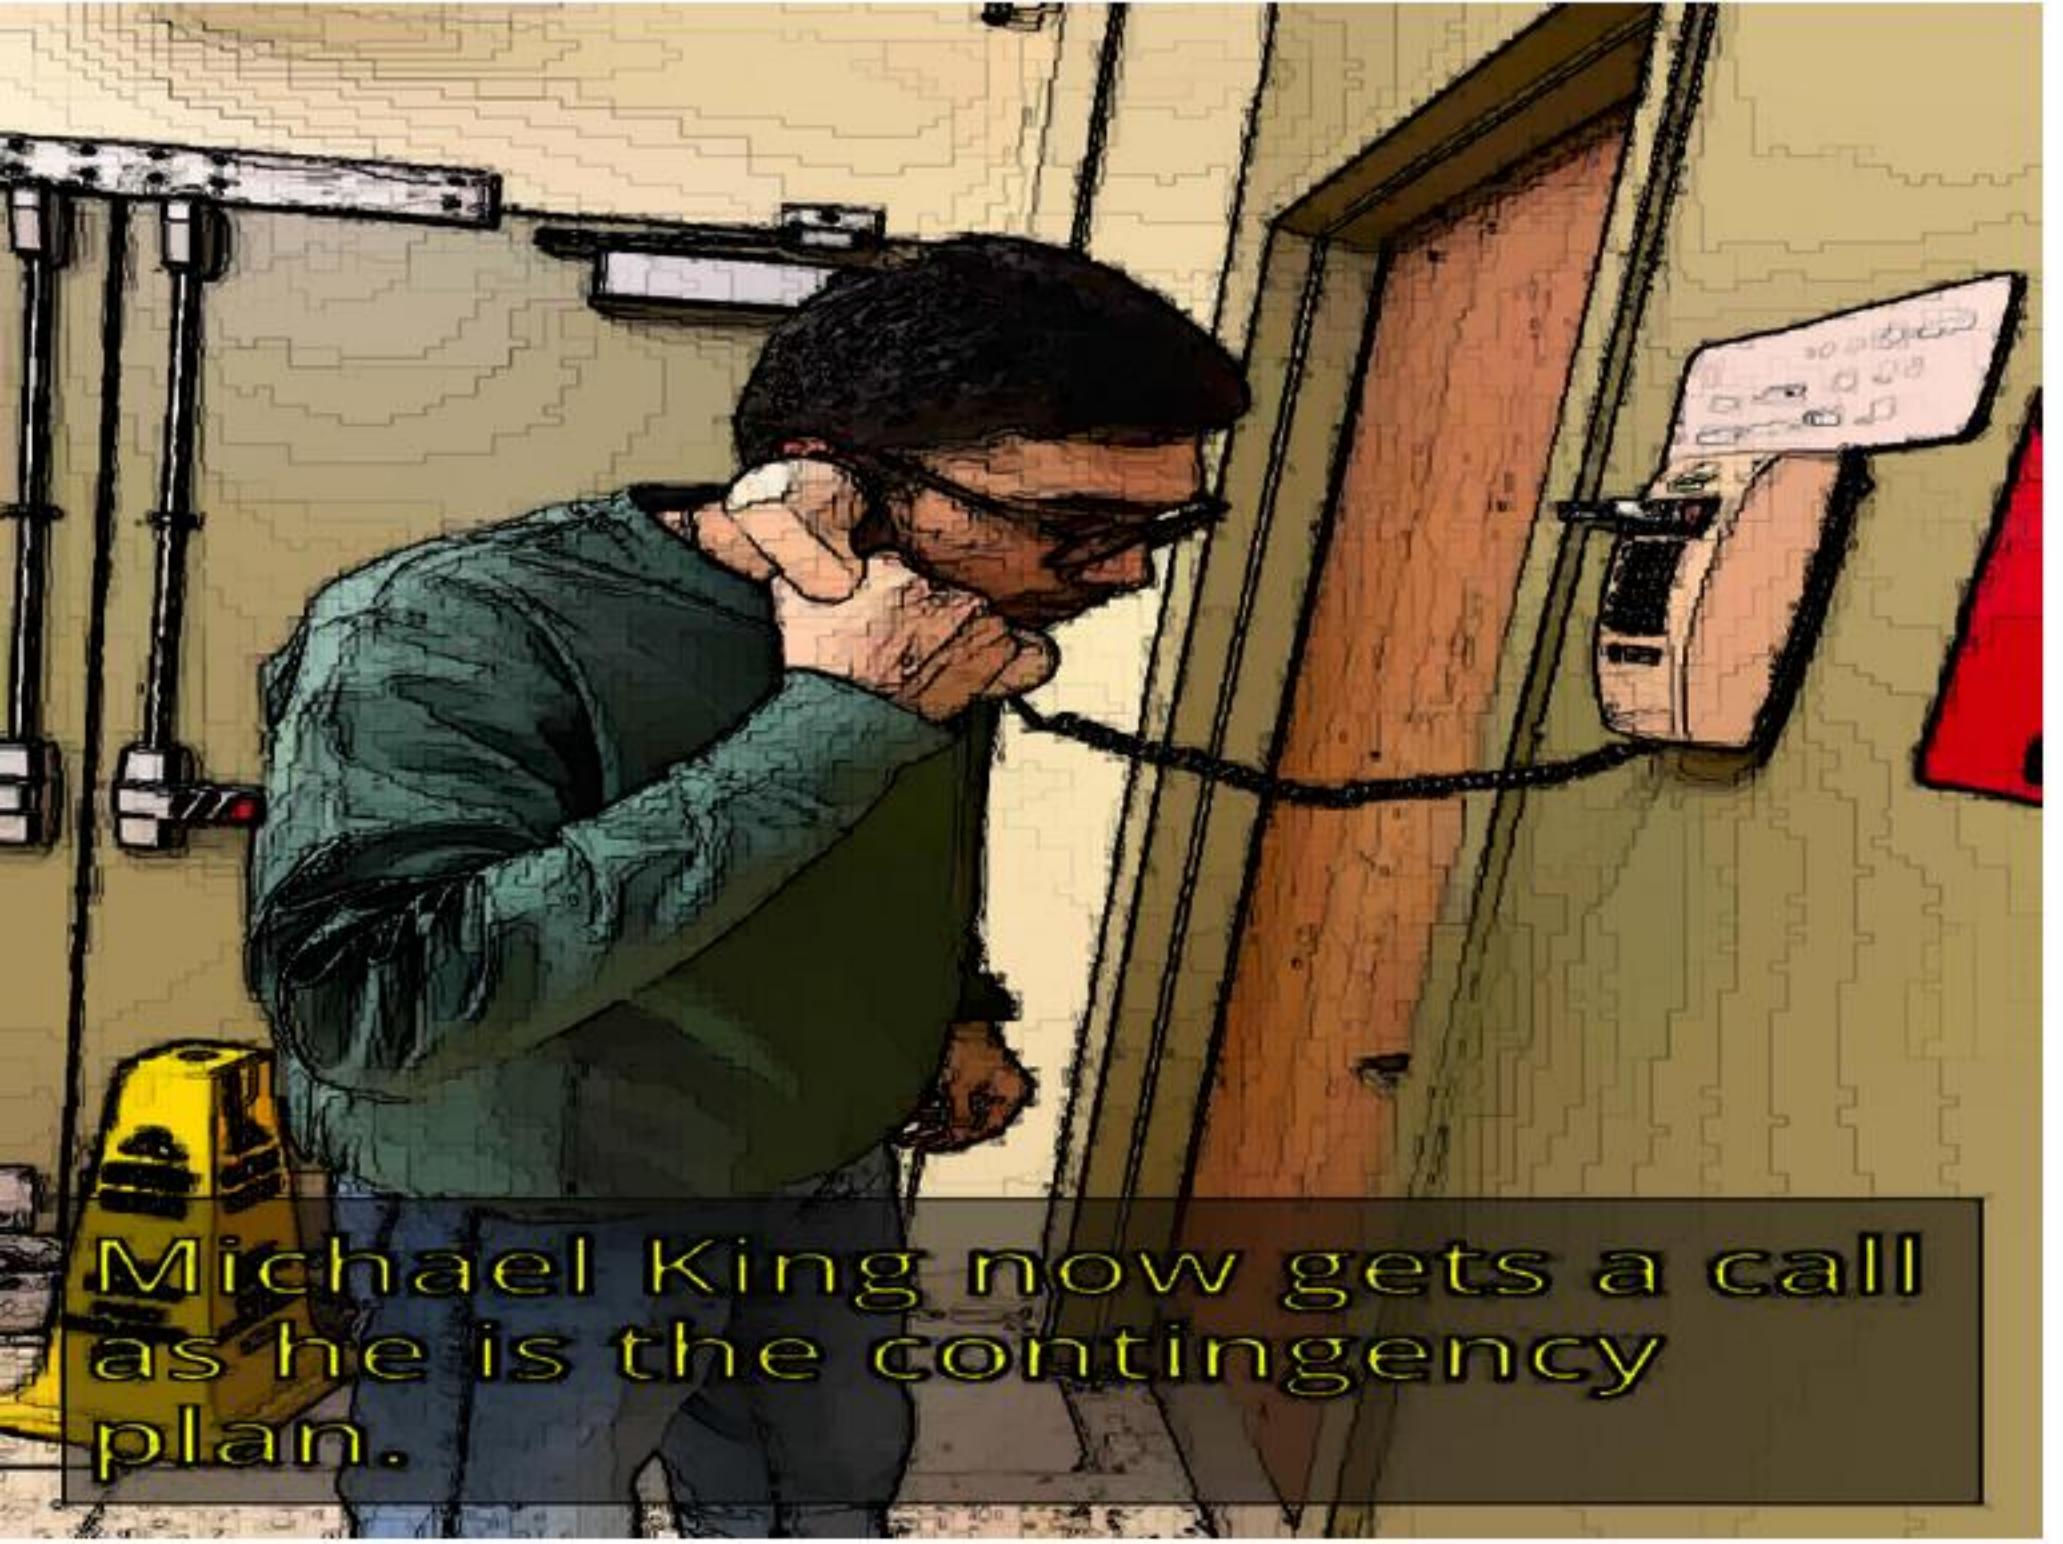

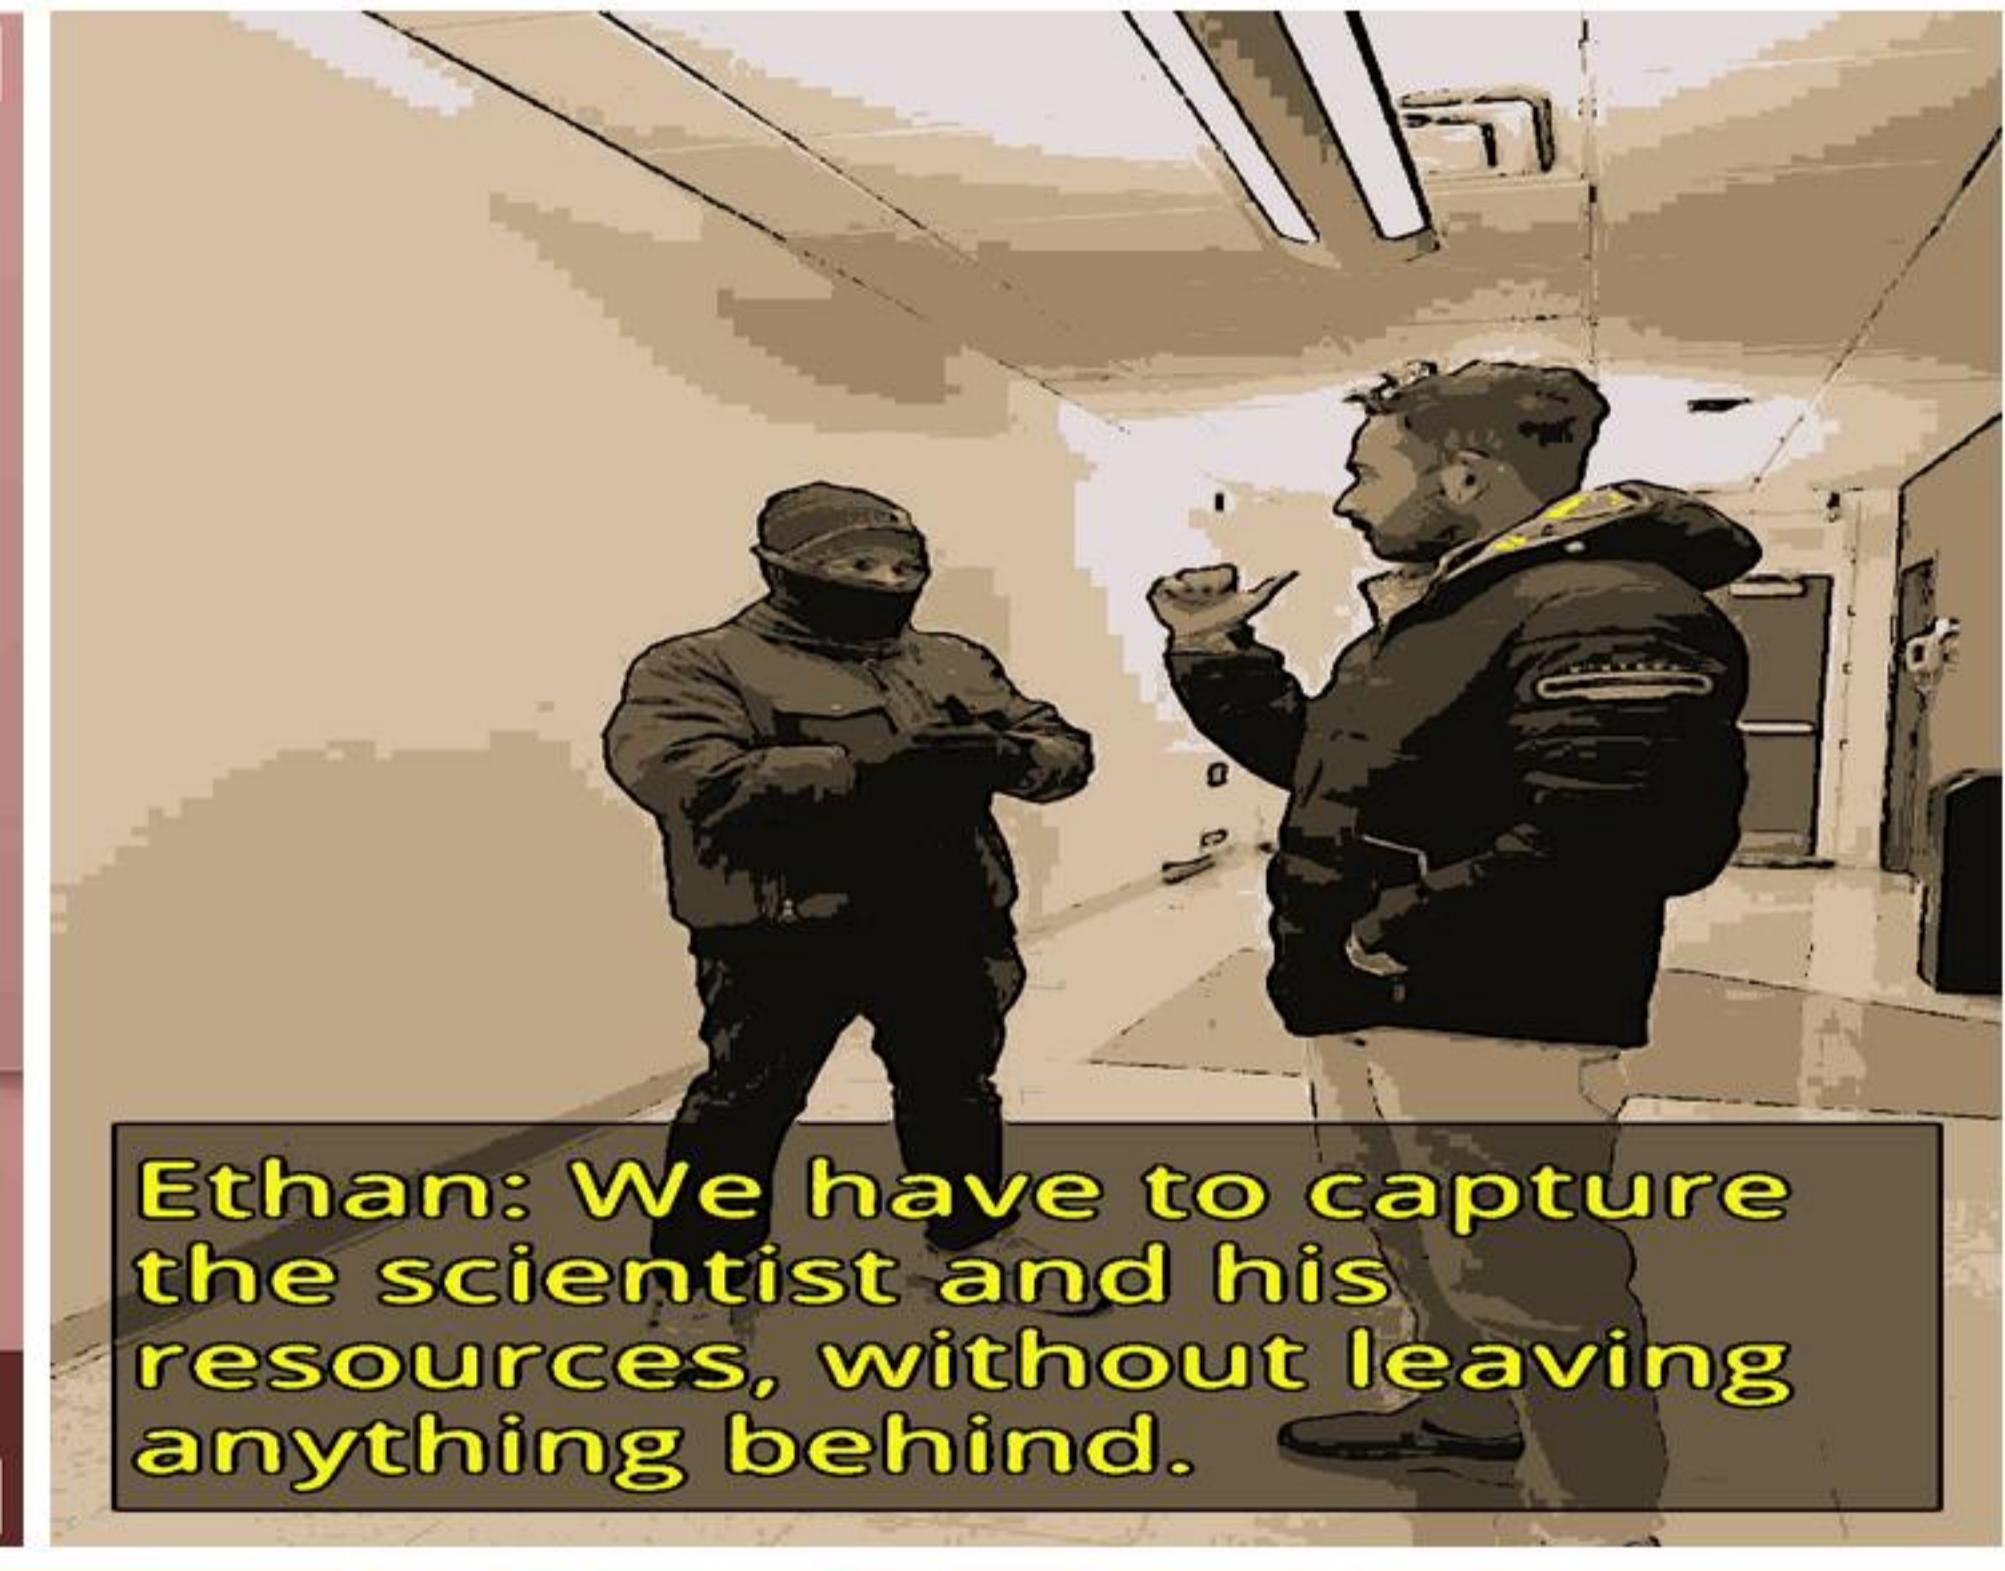

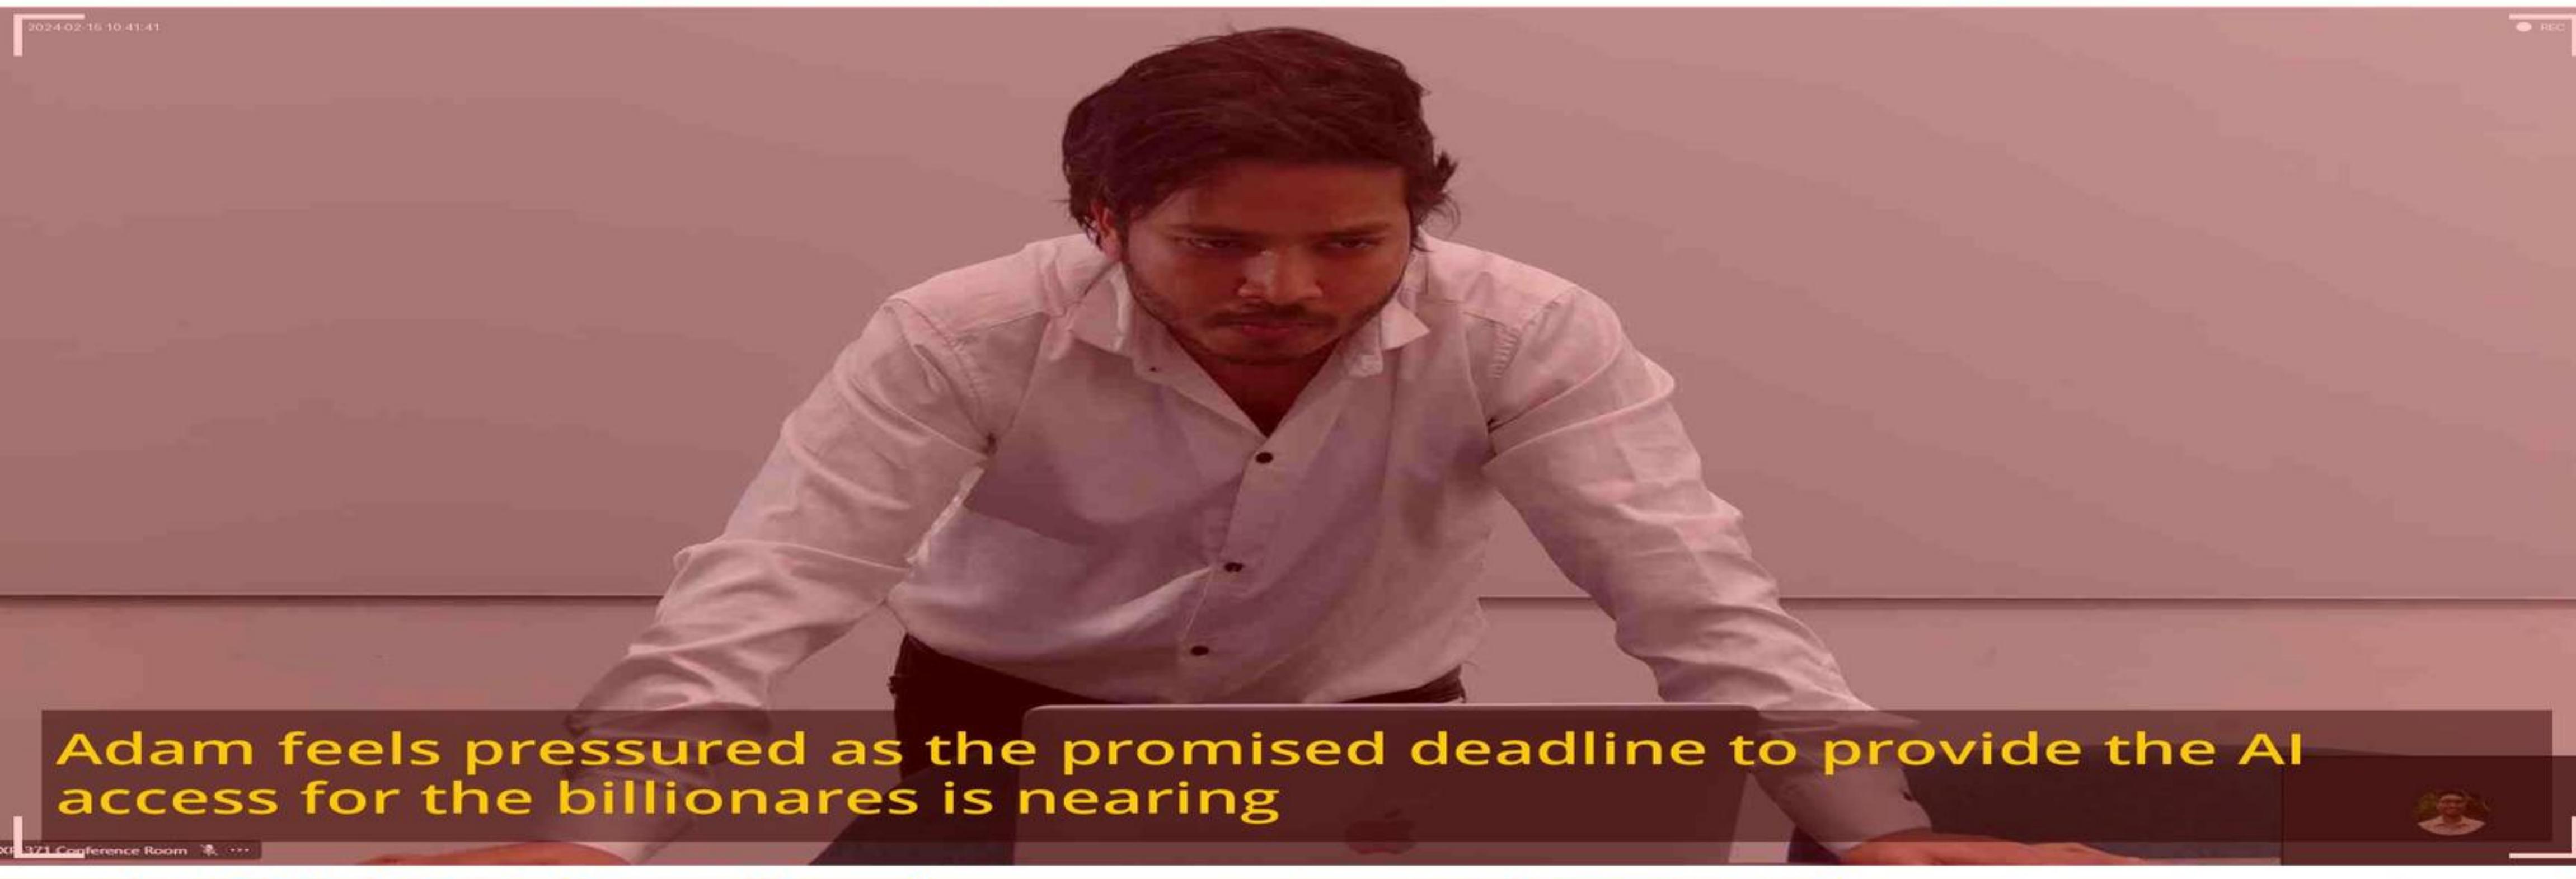

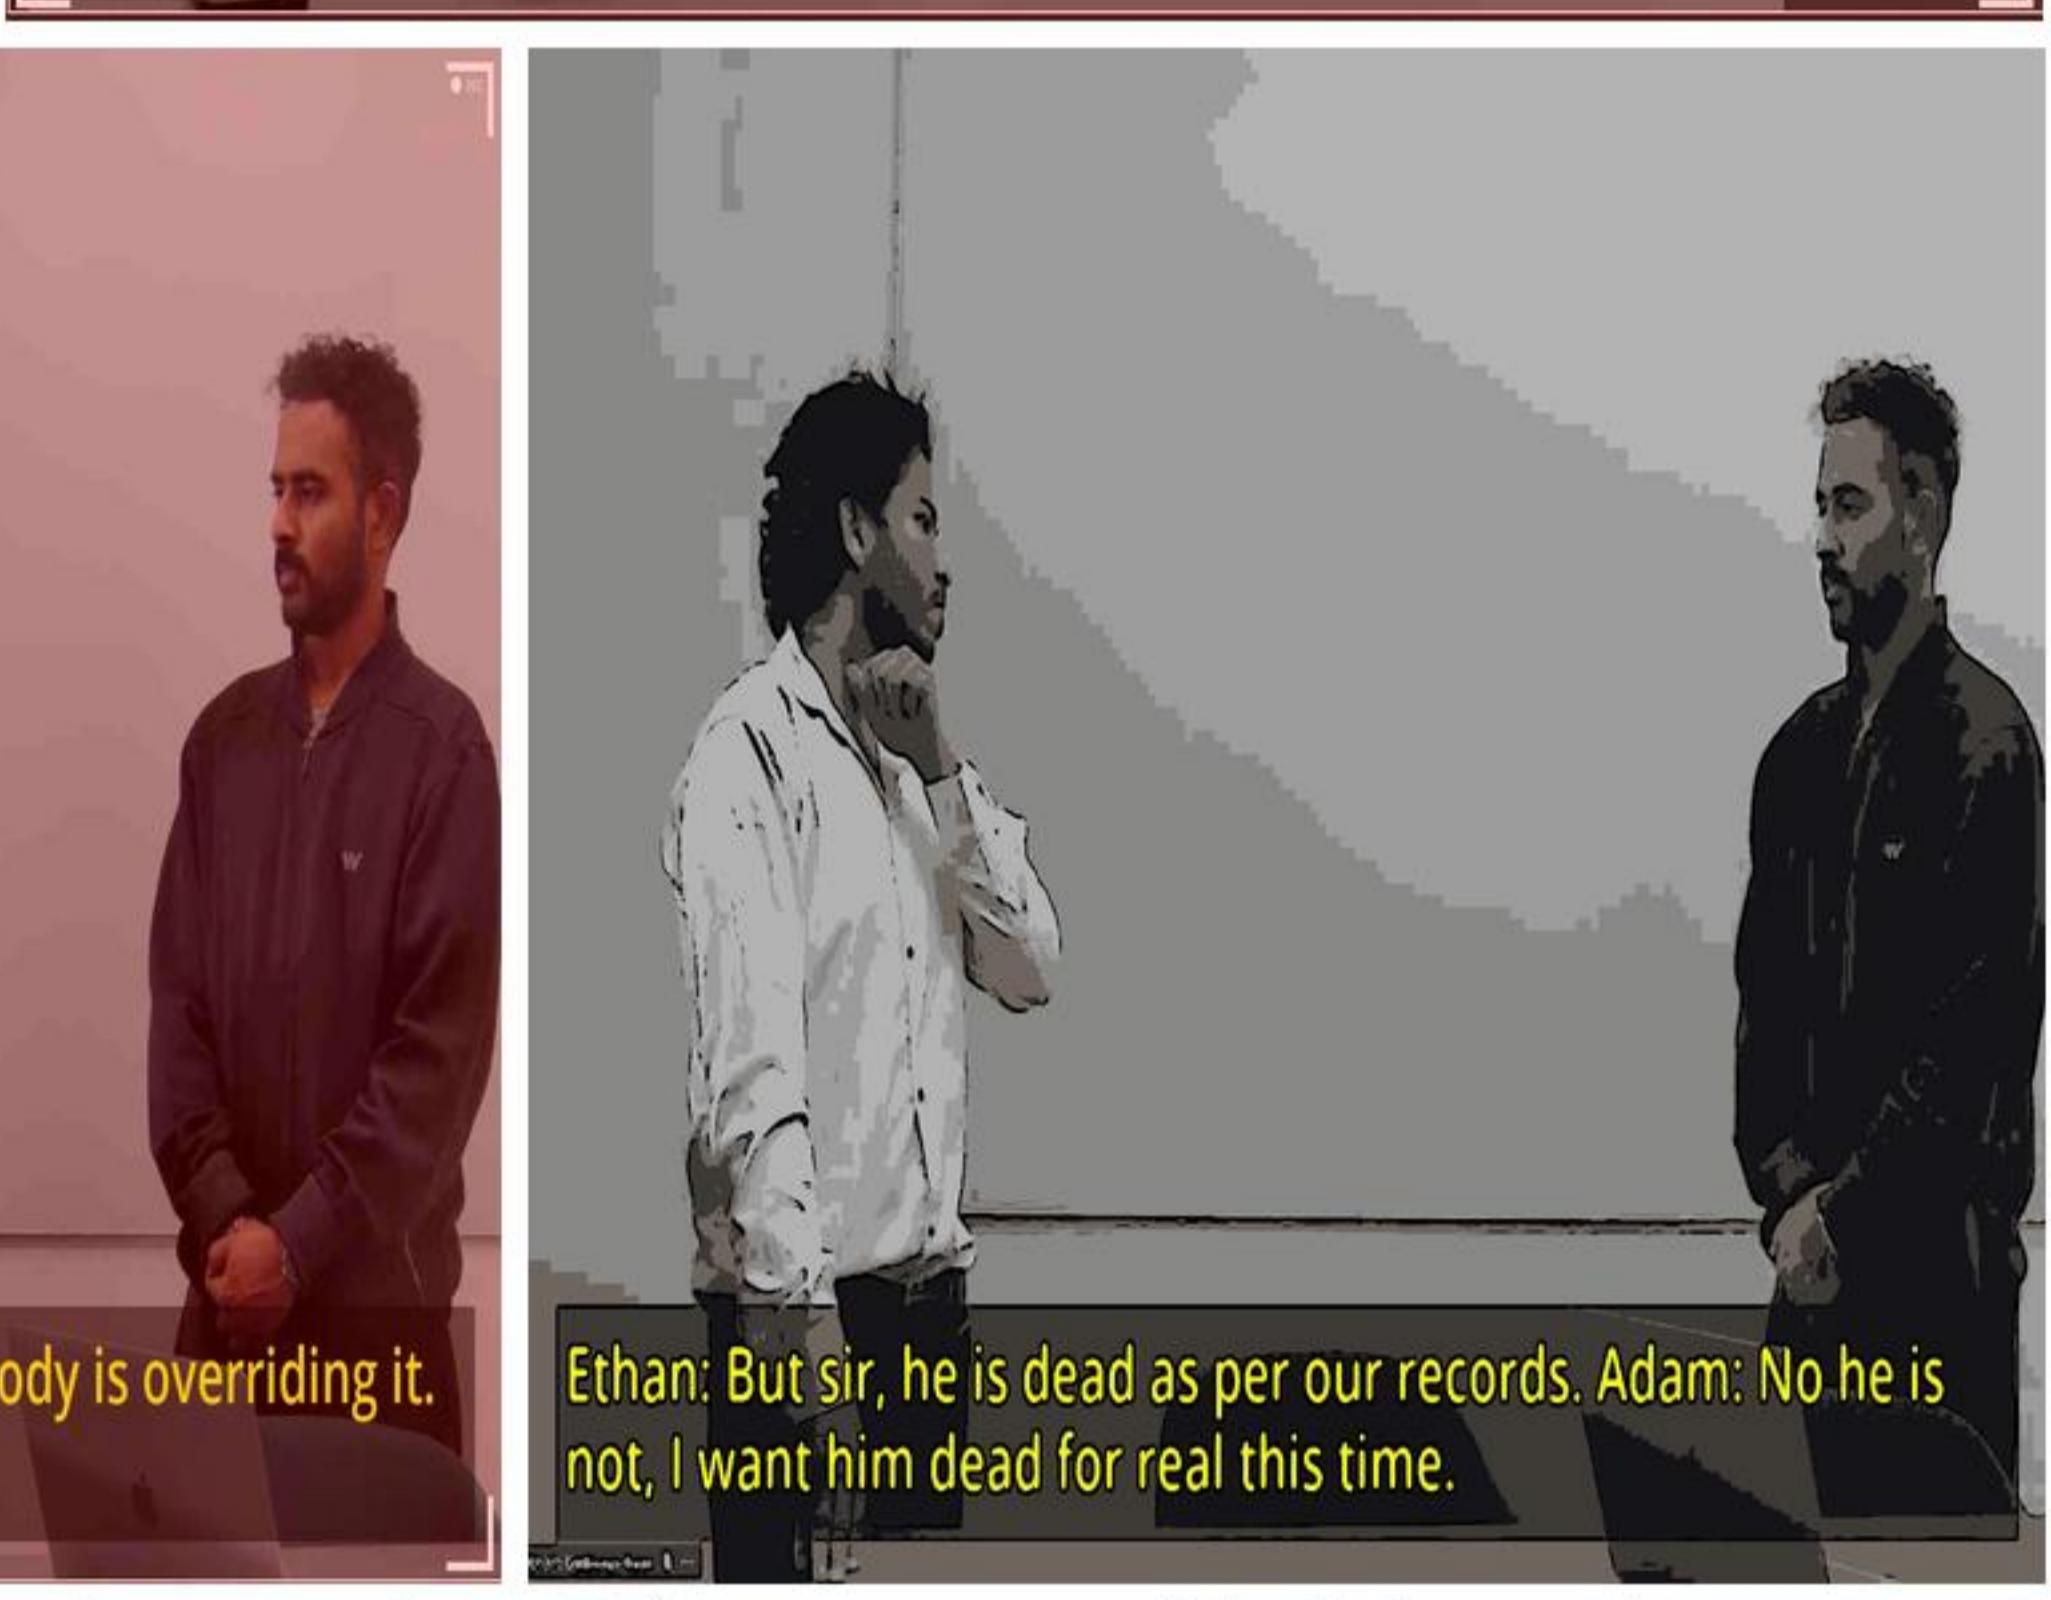

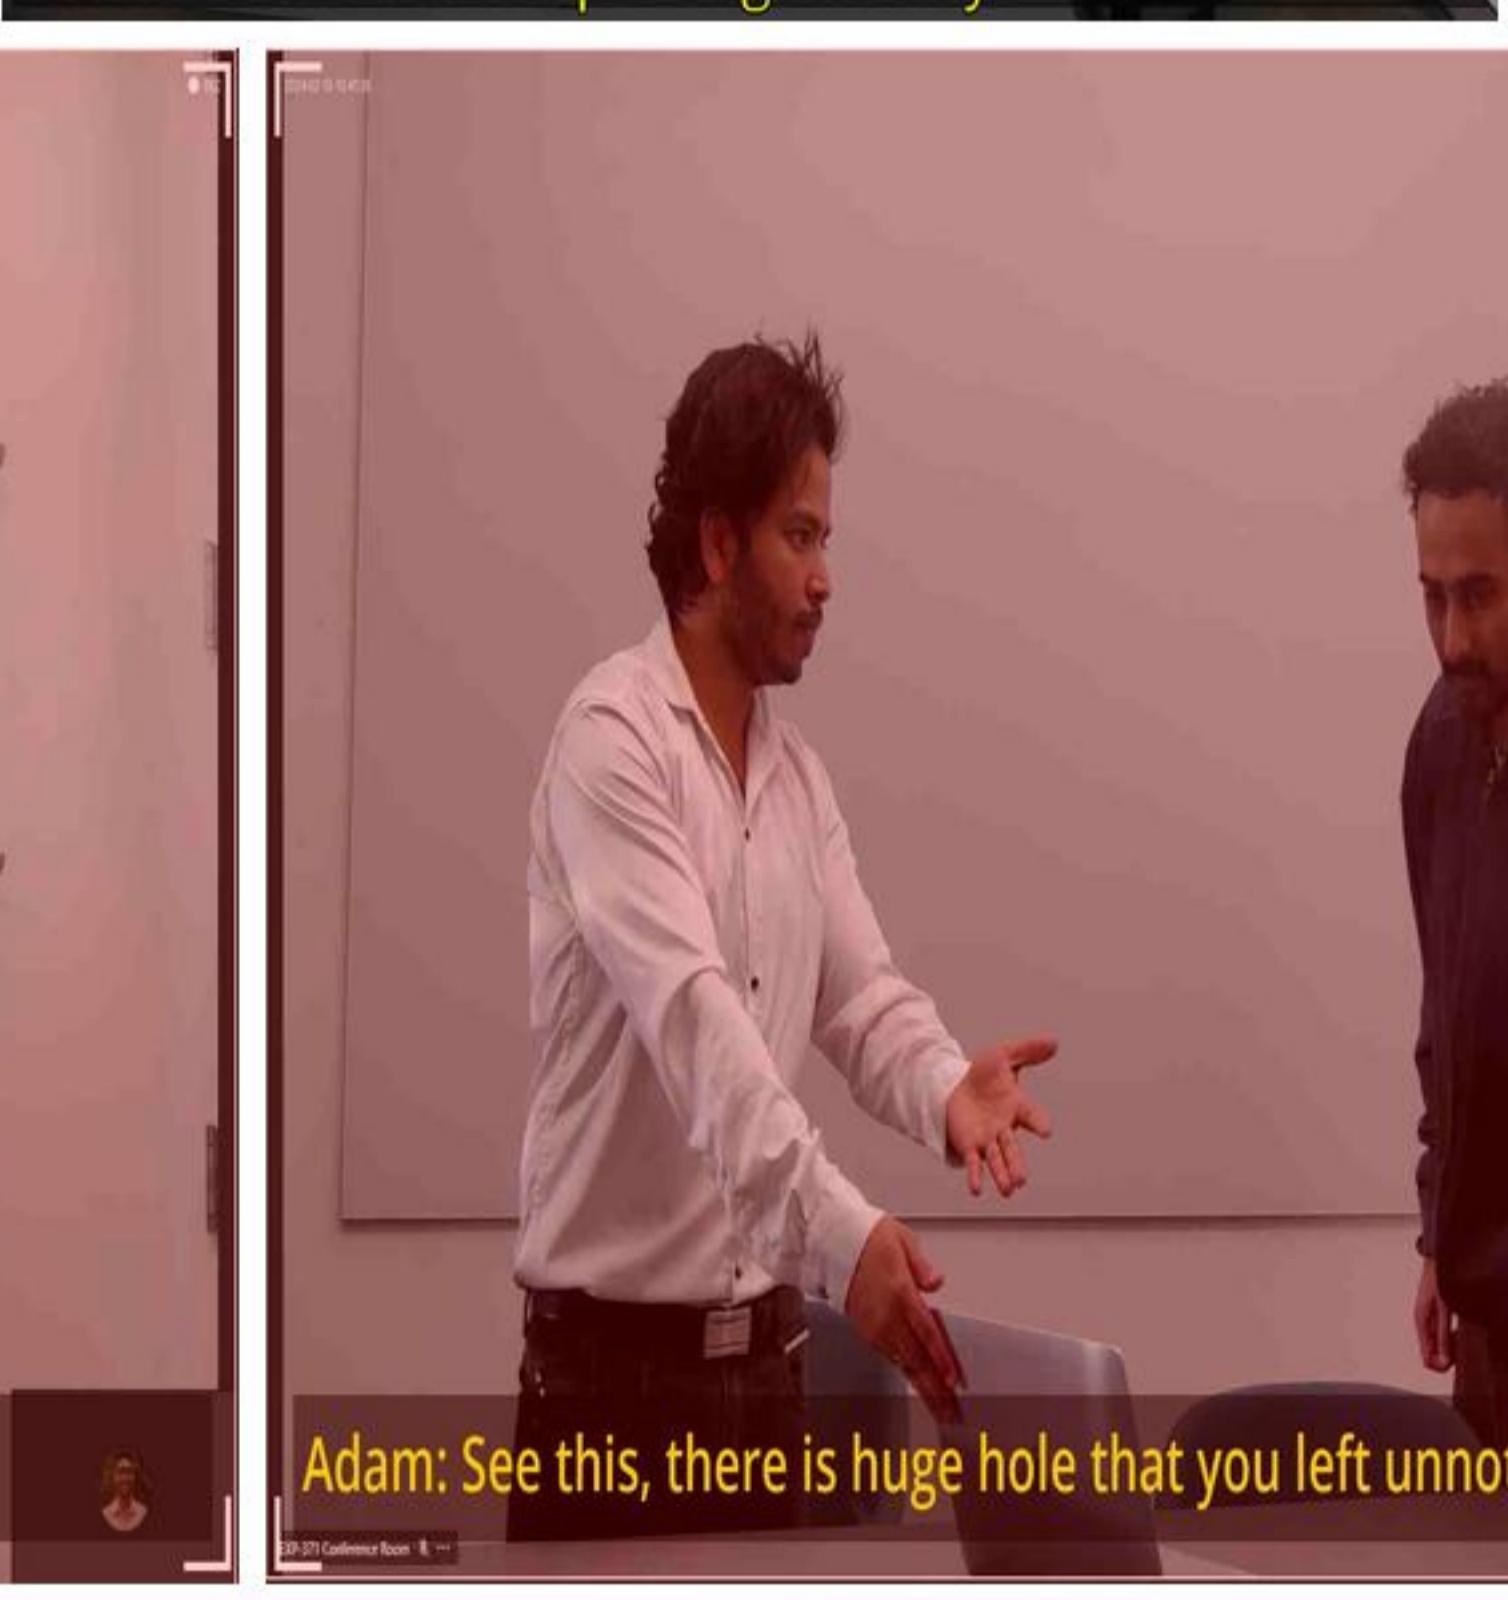

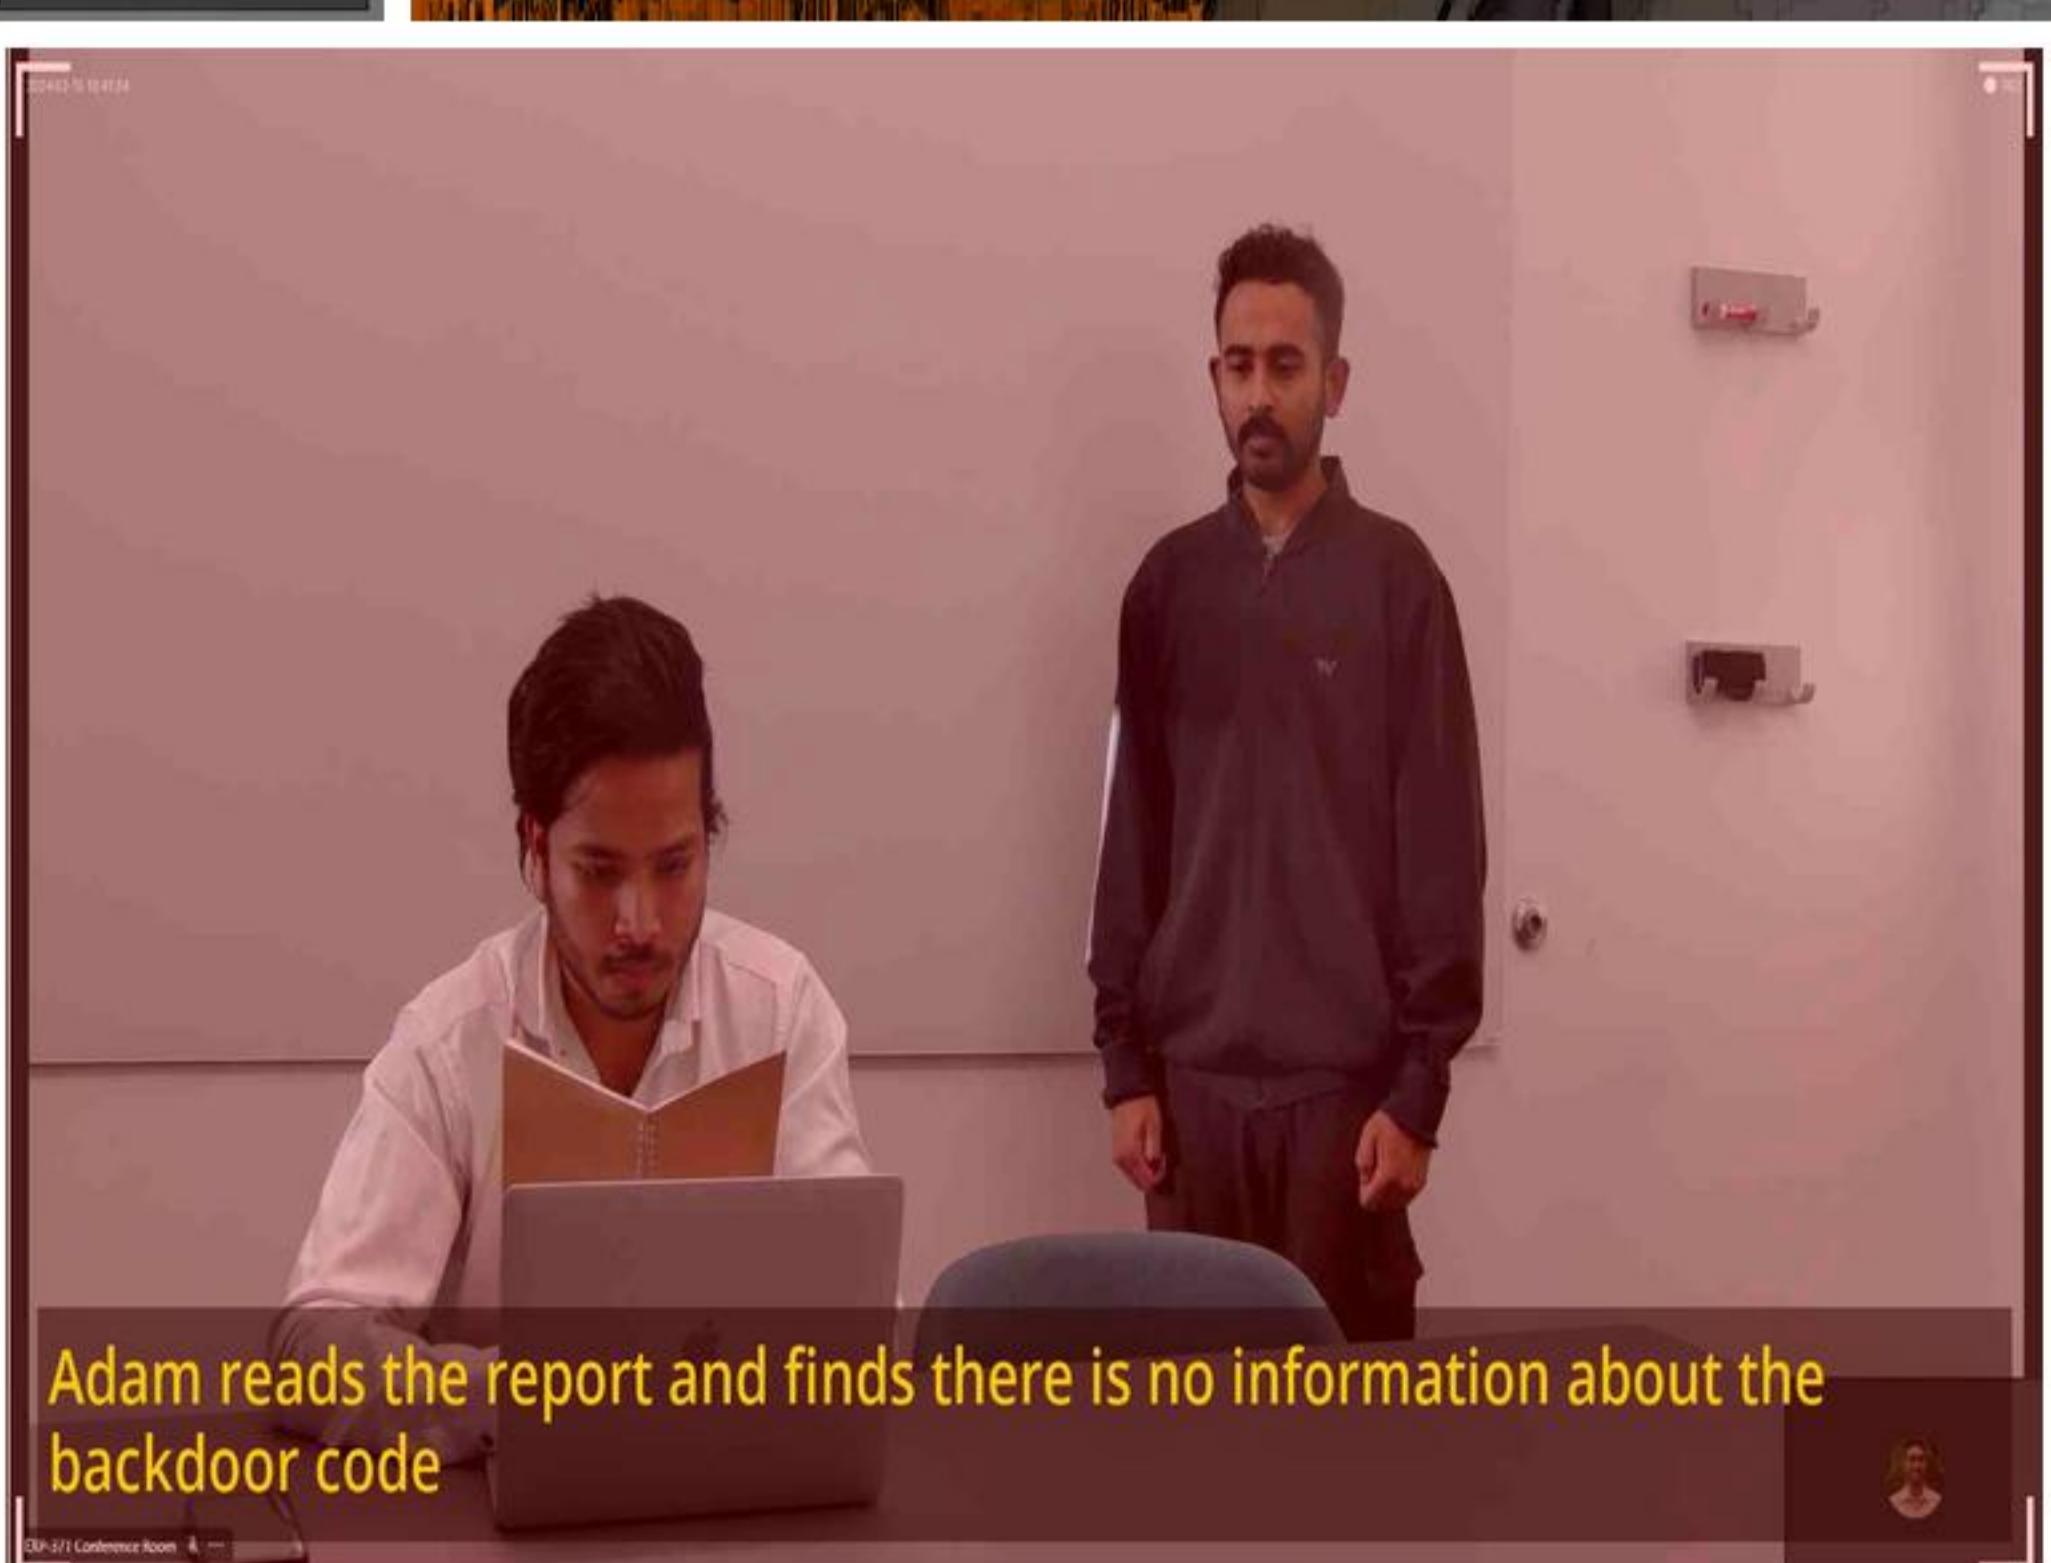

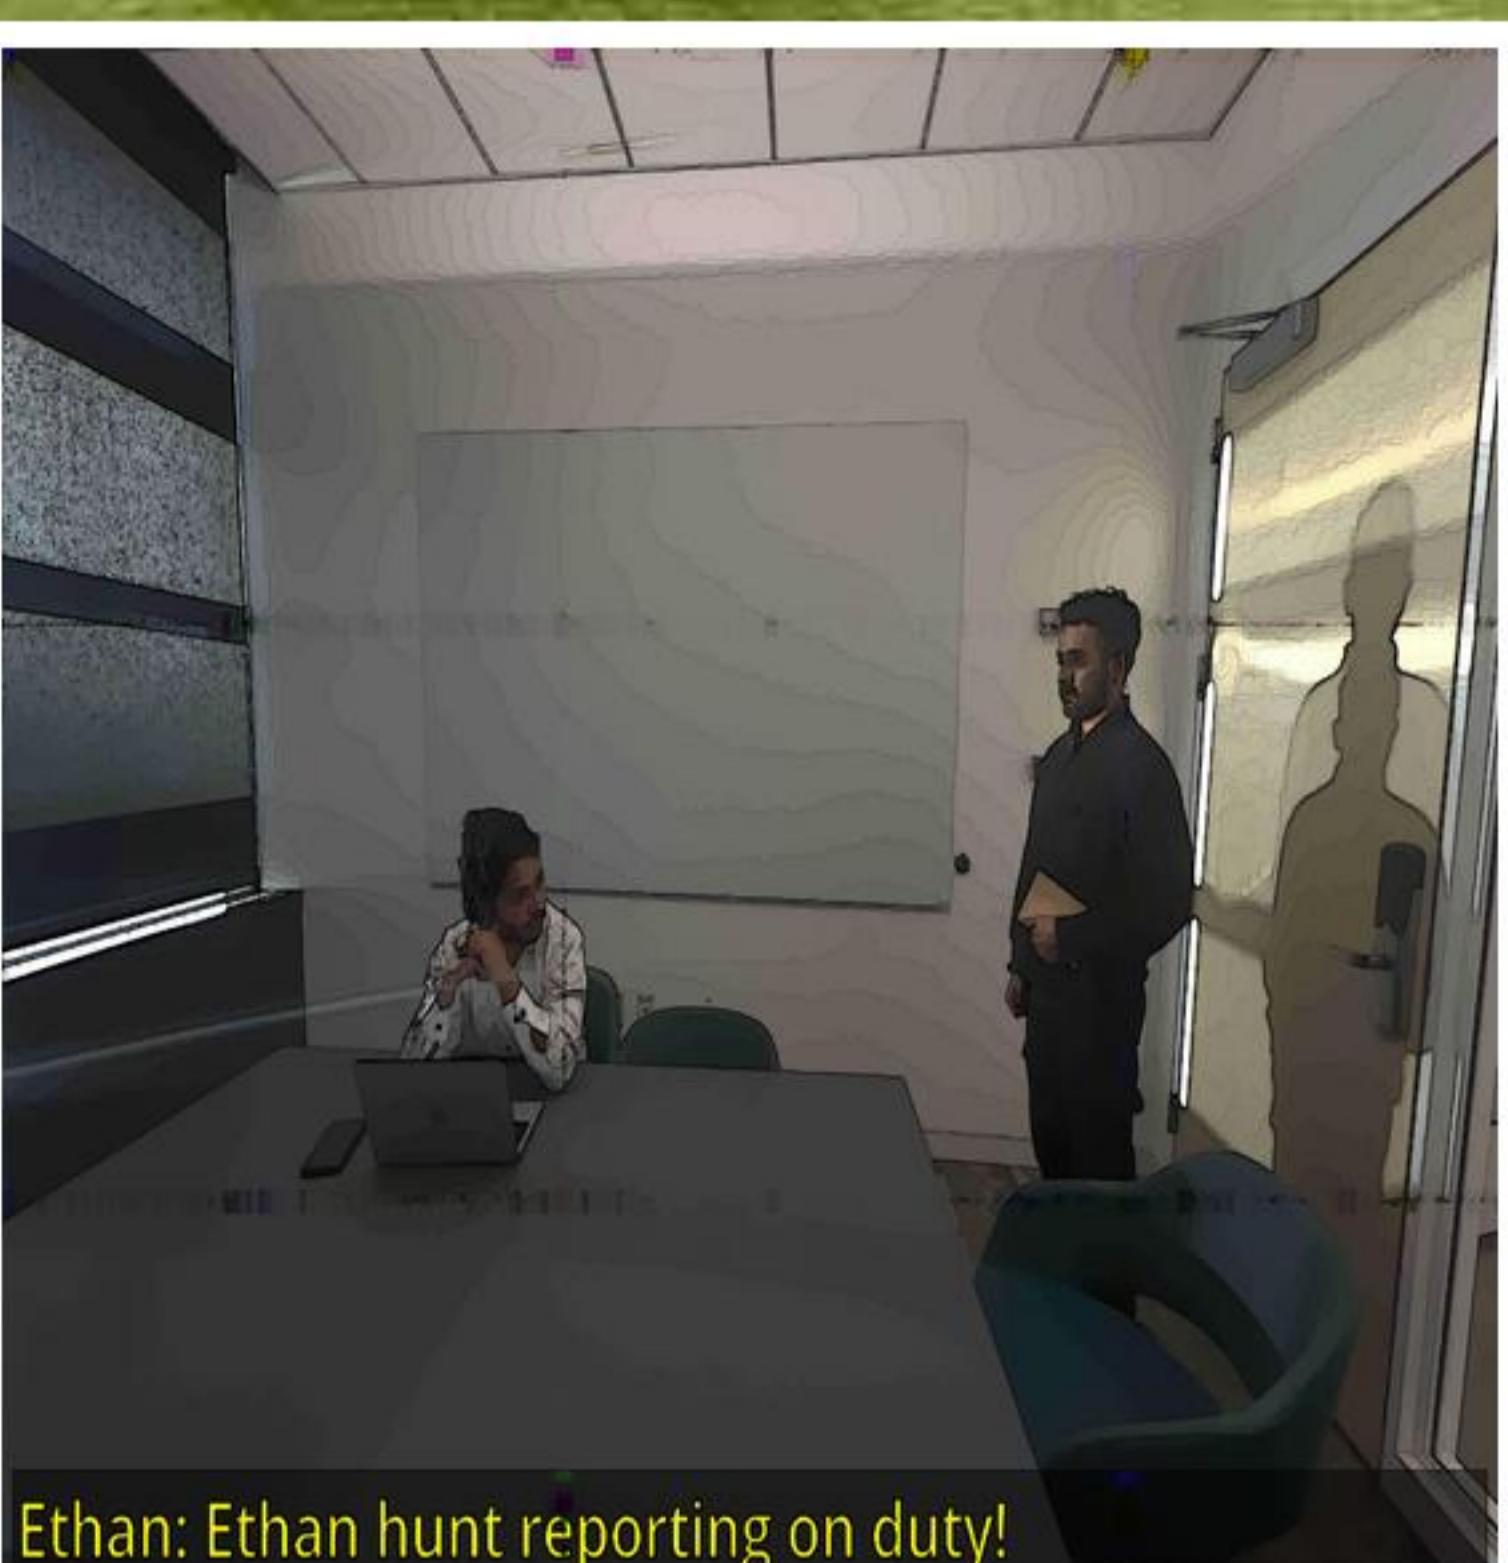

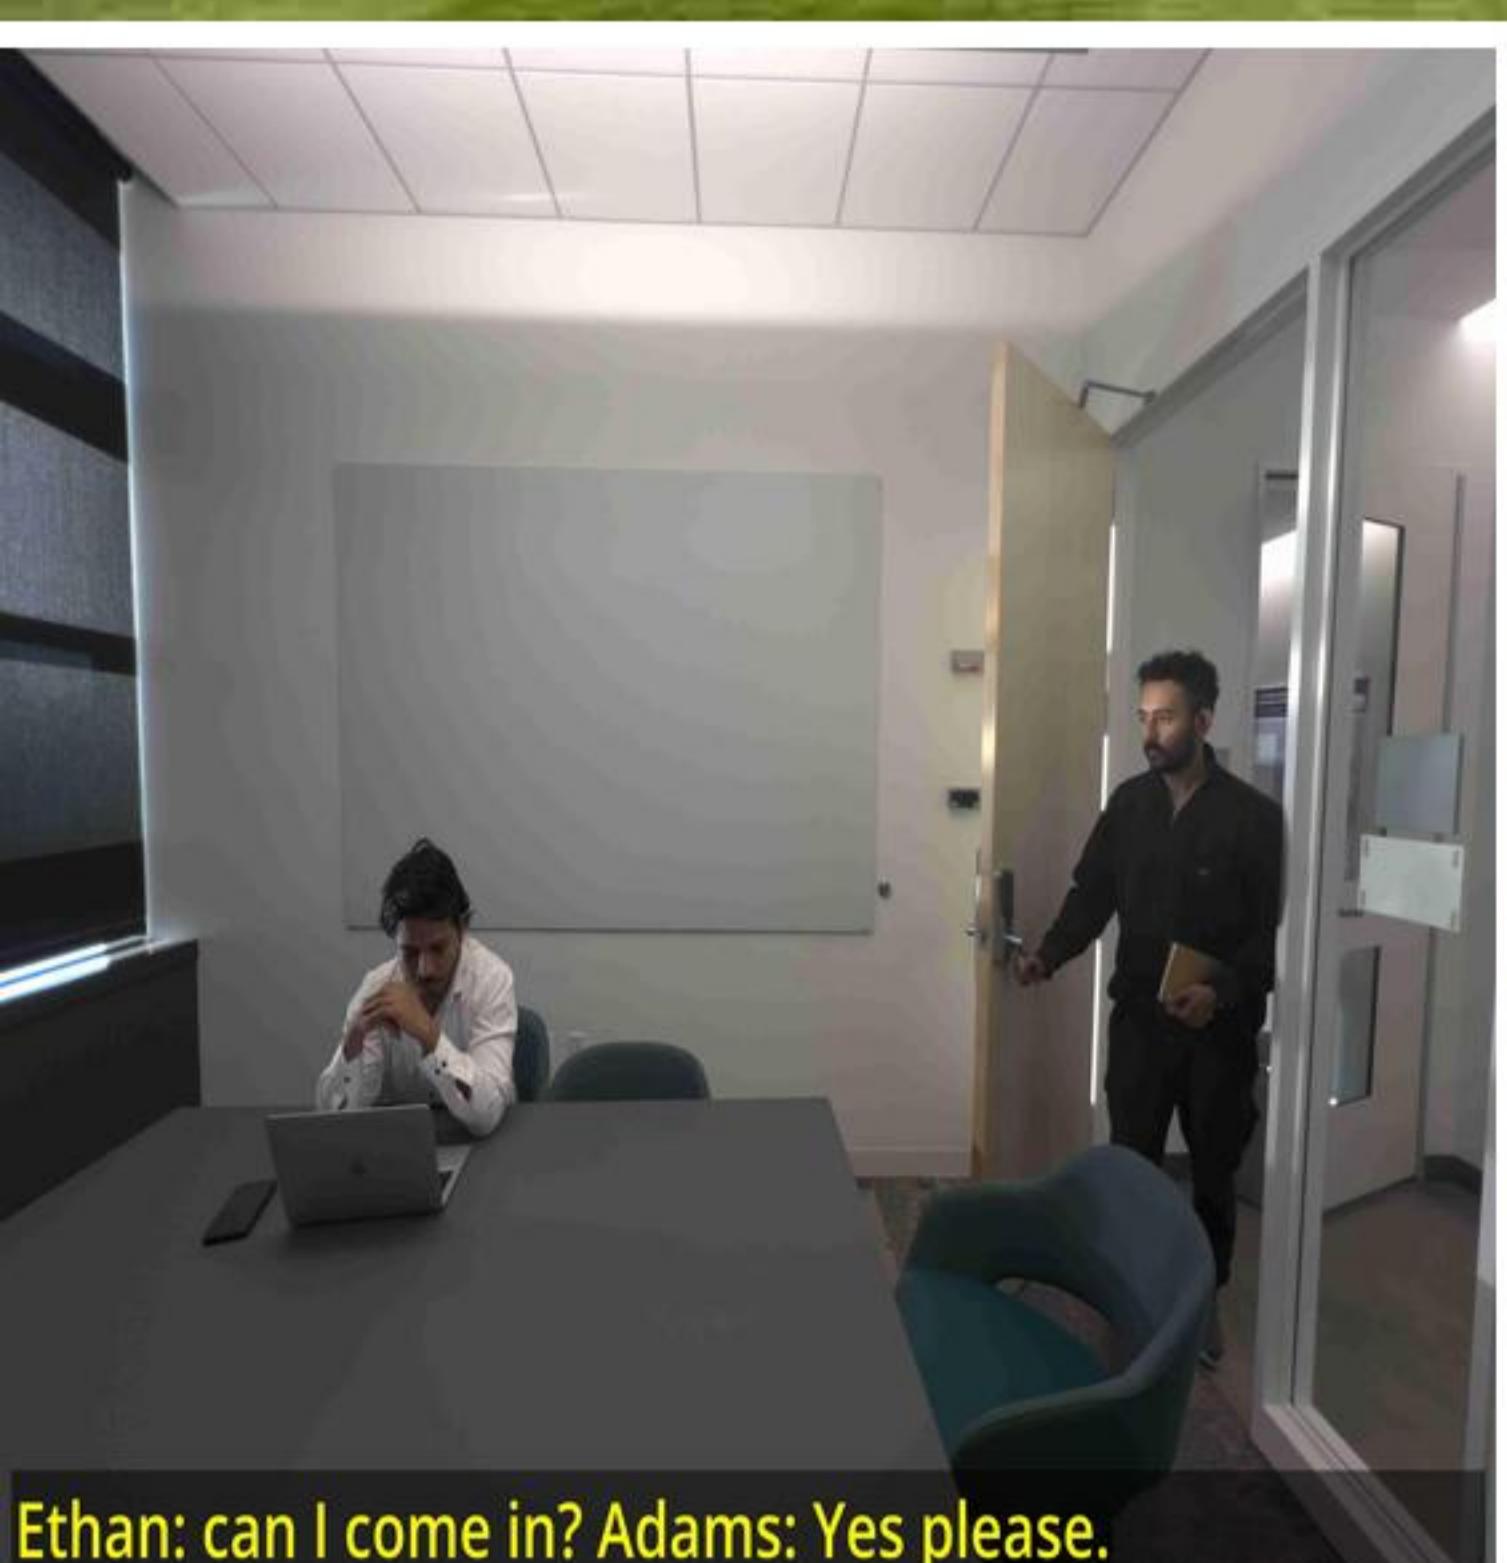

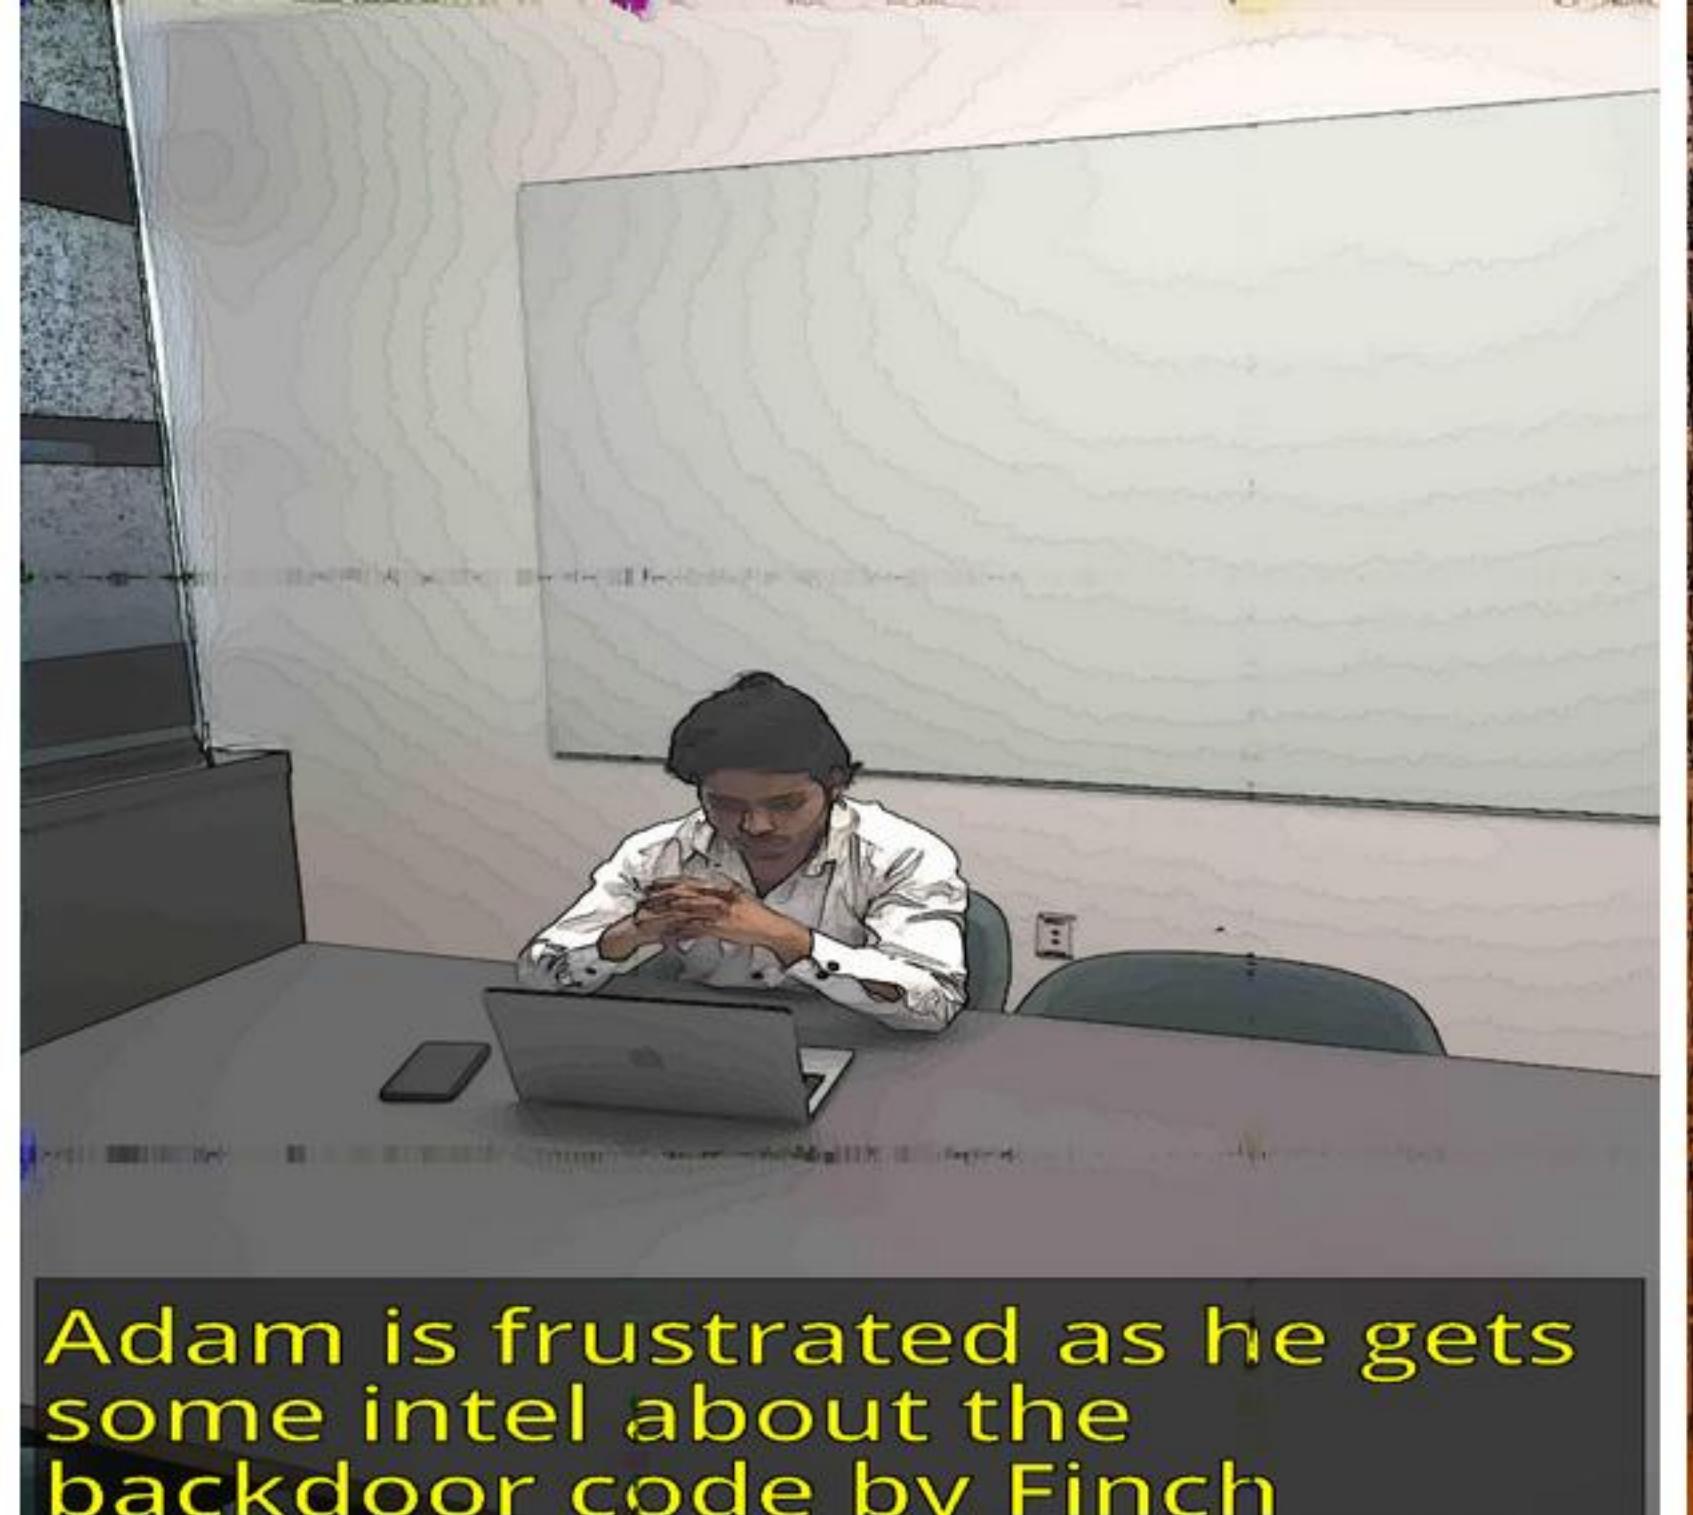

Ethan calls his PA and schedules to remove the AI access to Scientist and move it to a safe place.

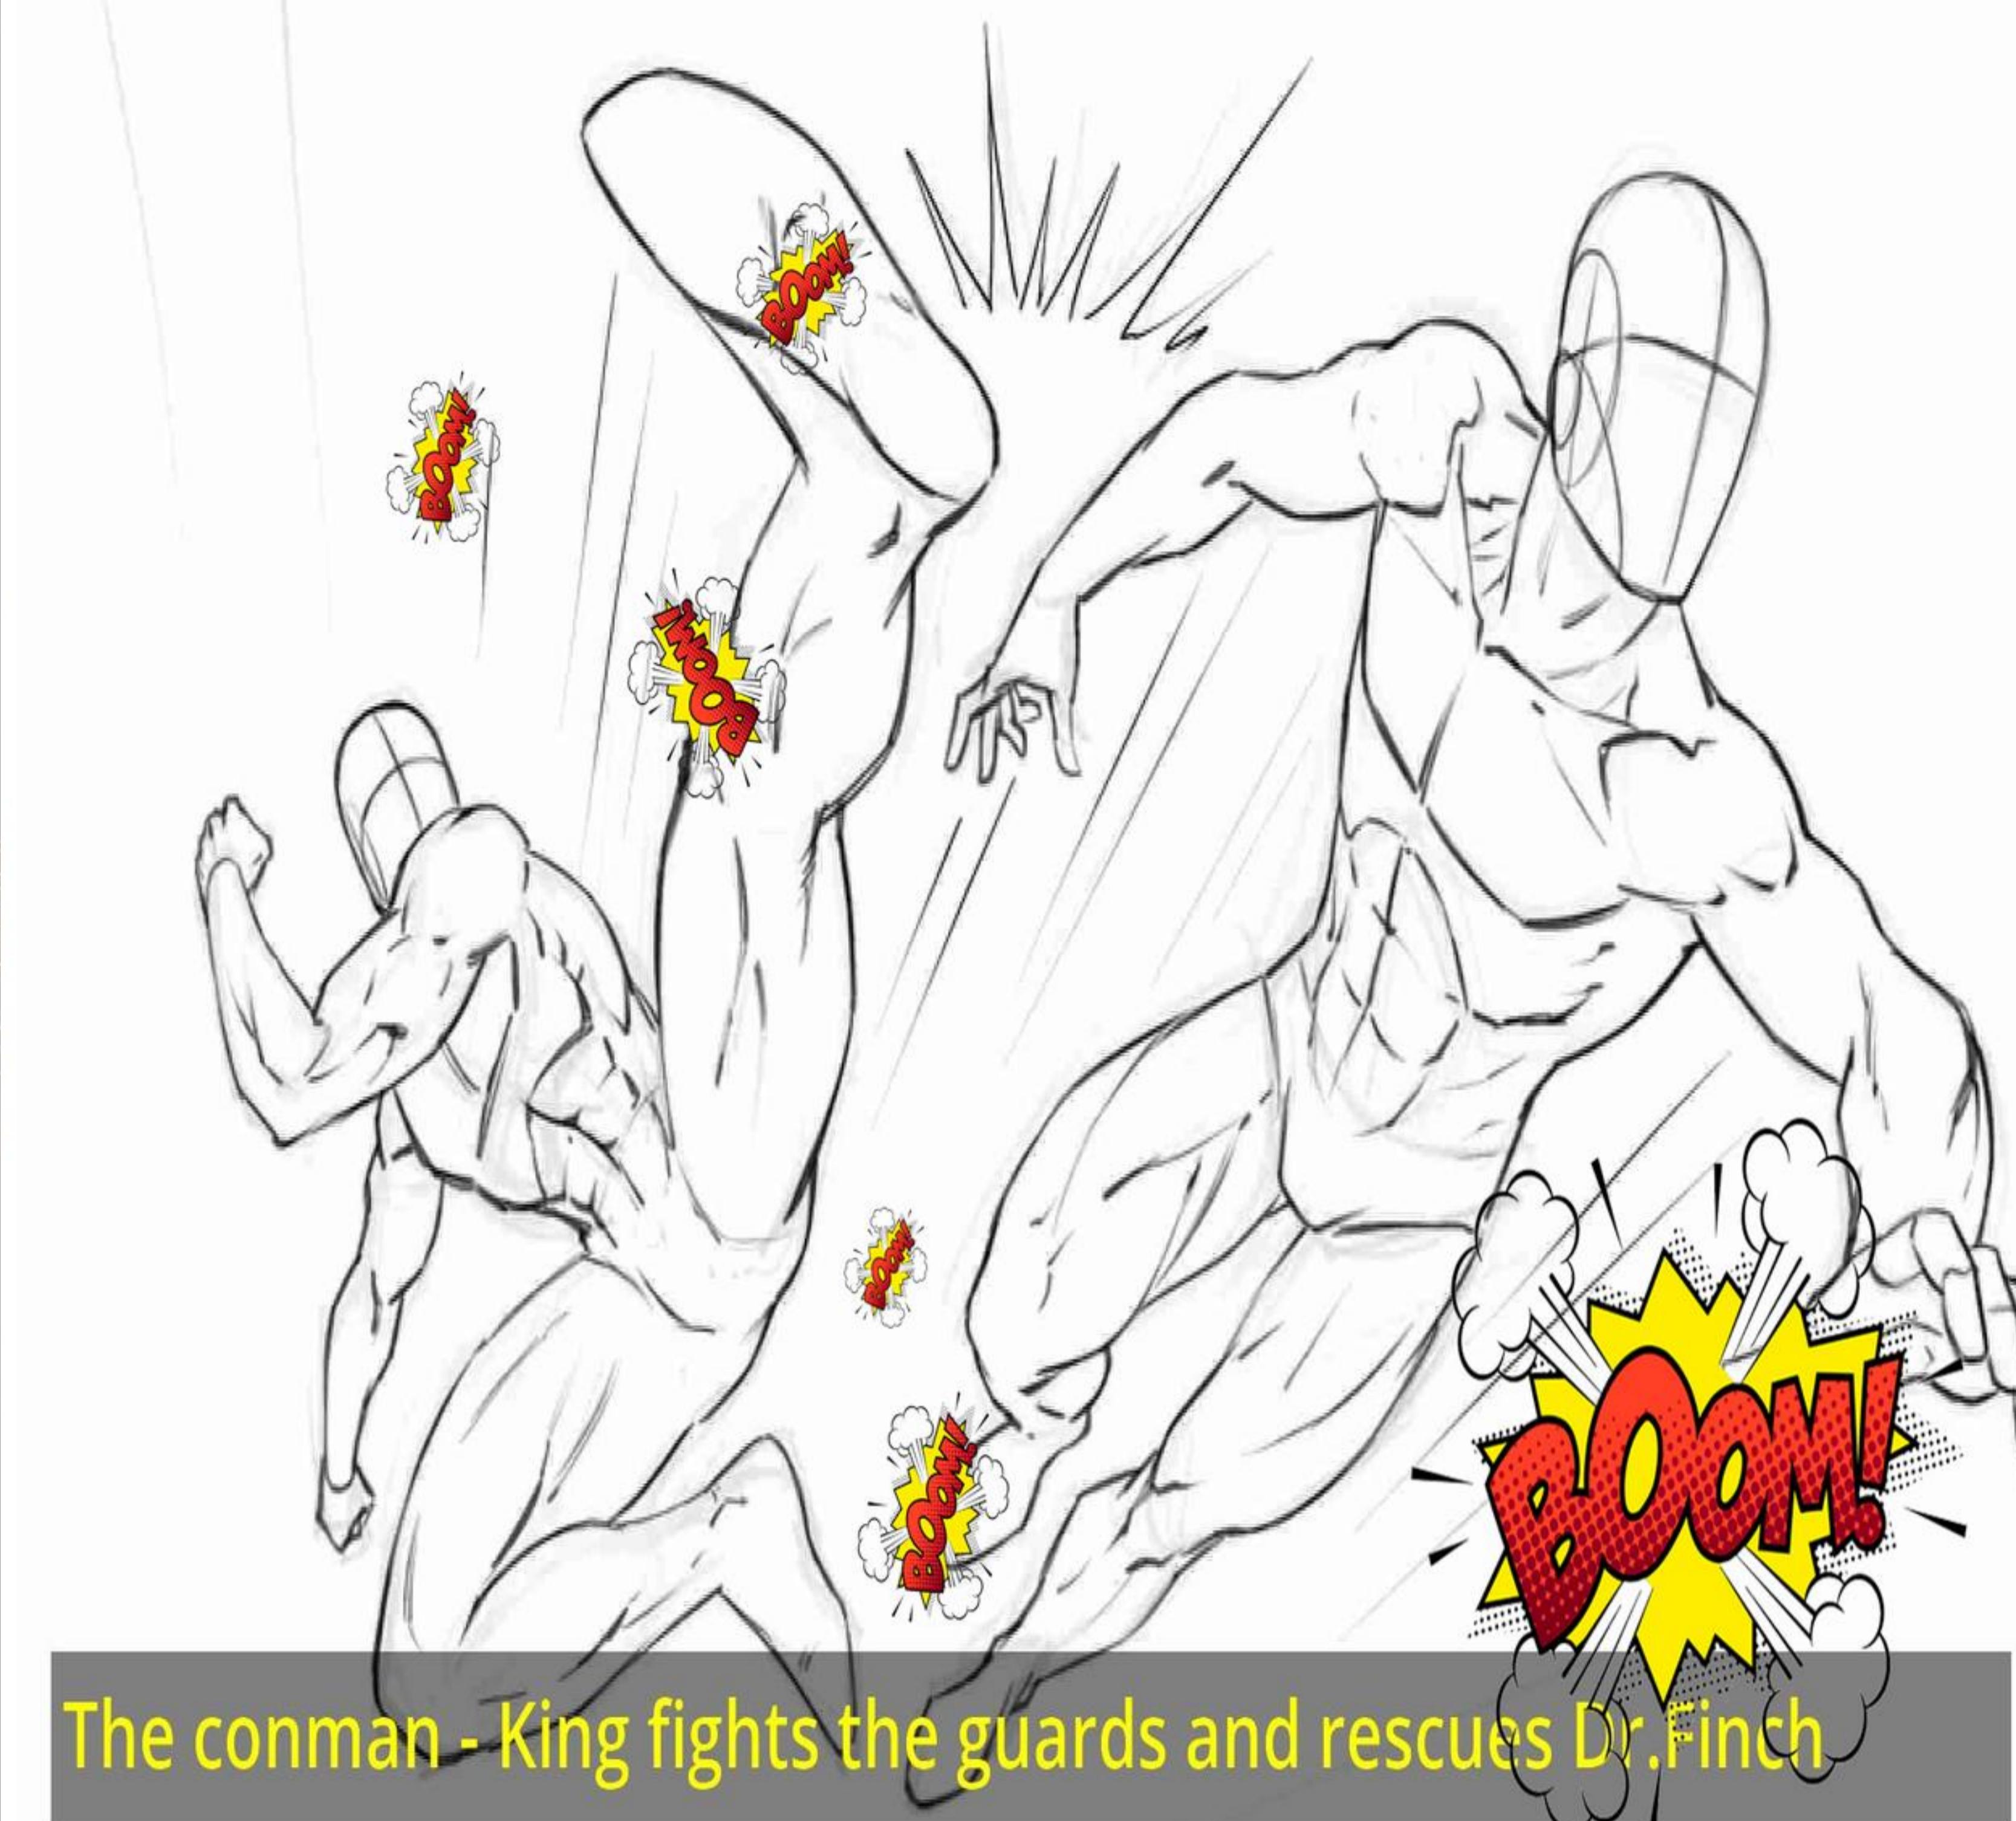

King finds out where Dr.Finch is kept in custody

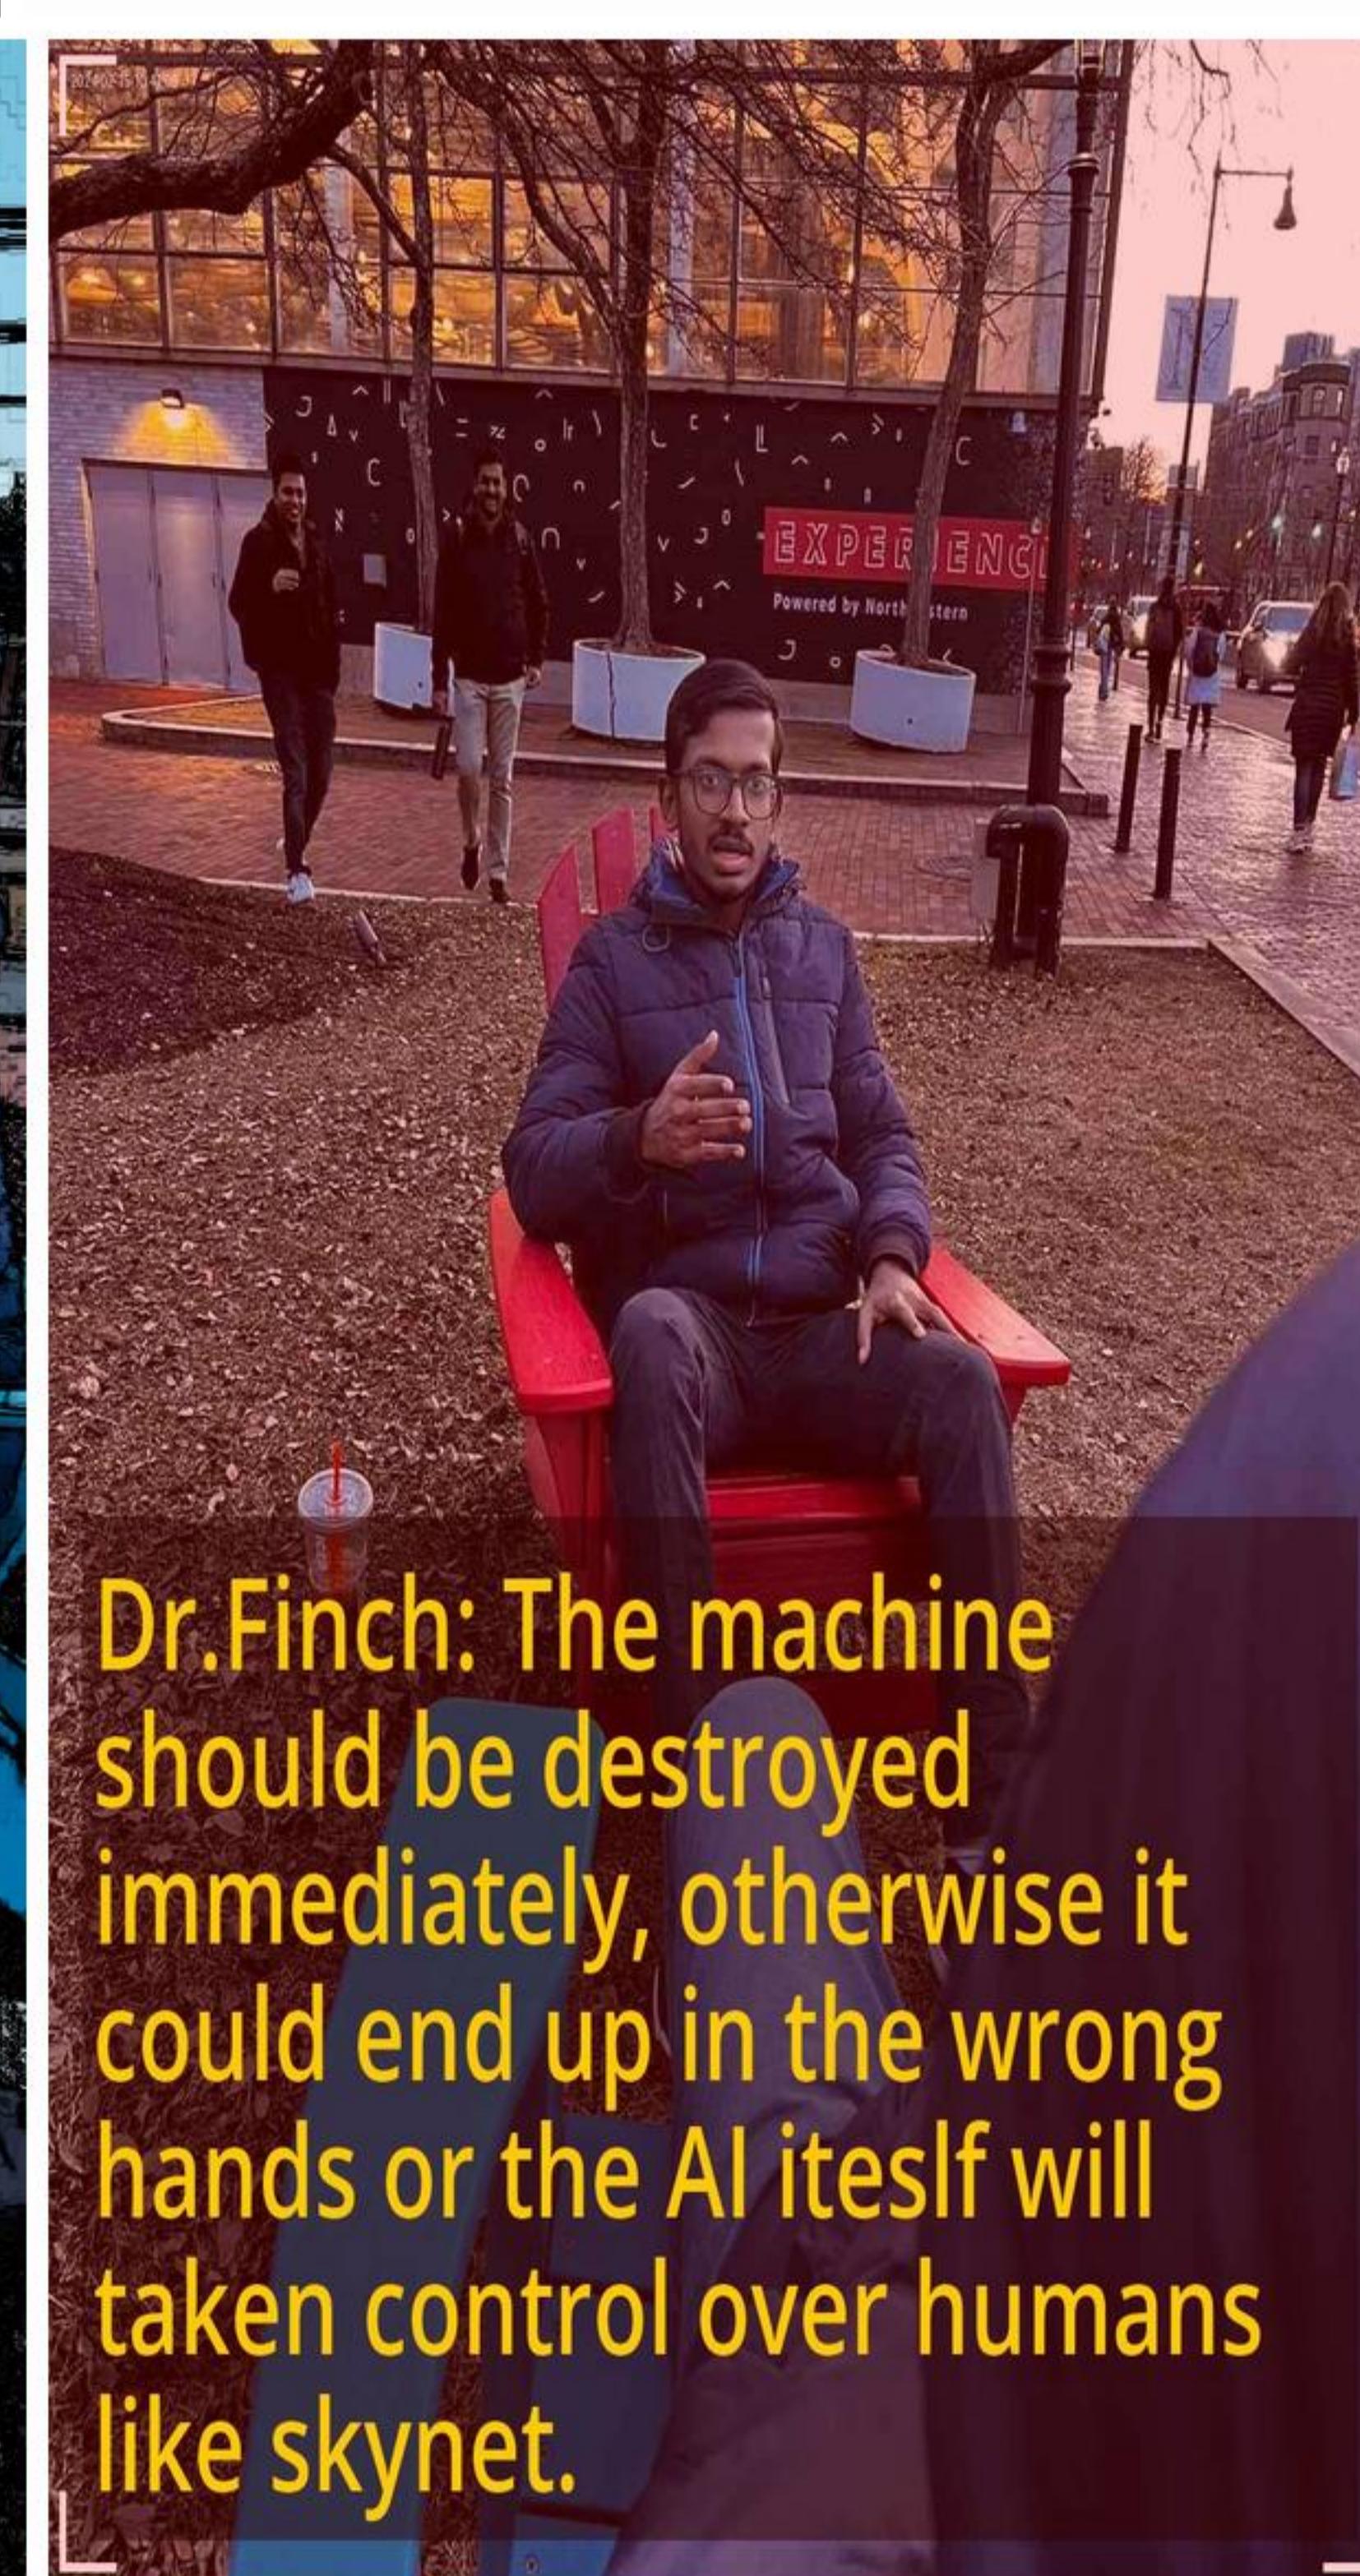

The command - King fights the guards and rescues Dr.Finch

They both move to a public place to dicuss on what to be done next

Dr.Finch: King thanks for all your help. I am going to put an end for what I have created.

Dr.Finch: The machine should be destroyed immediately, otherwise it could end up in the wrong hands or the AI itslef will taken control over humans like skynet.

King: But we can save a lot of people with the information the machine gives us. Do you want to let down all the people who can be saved?

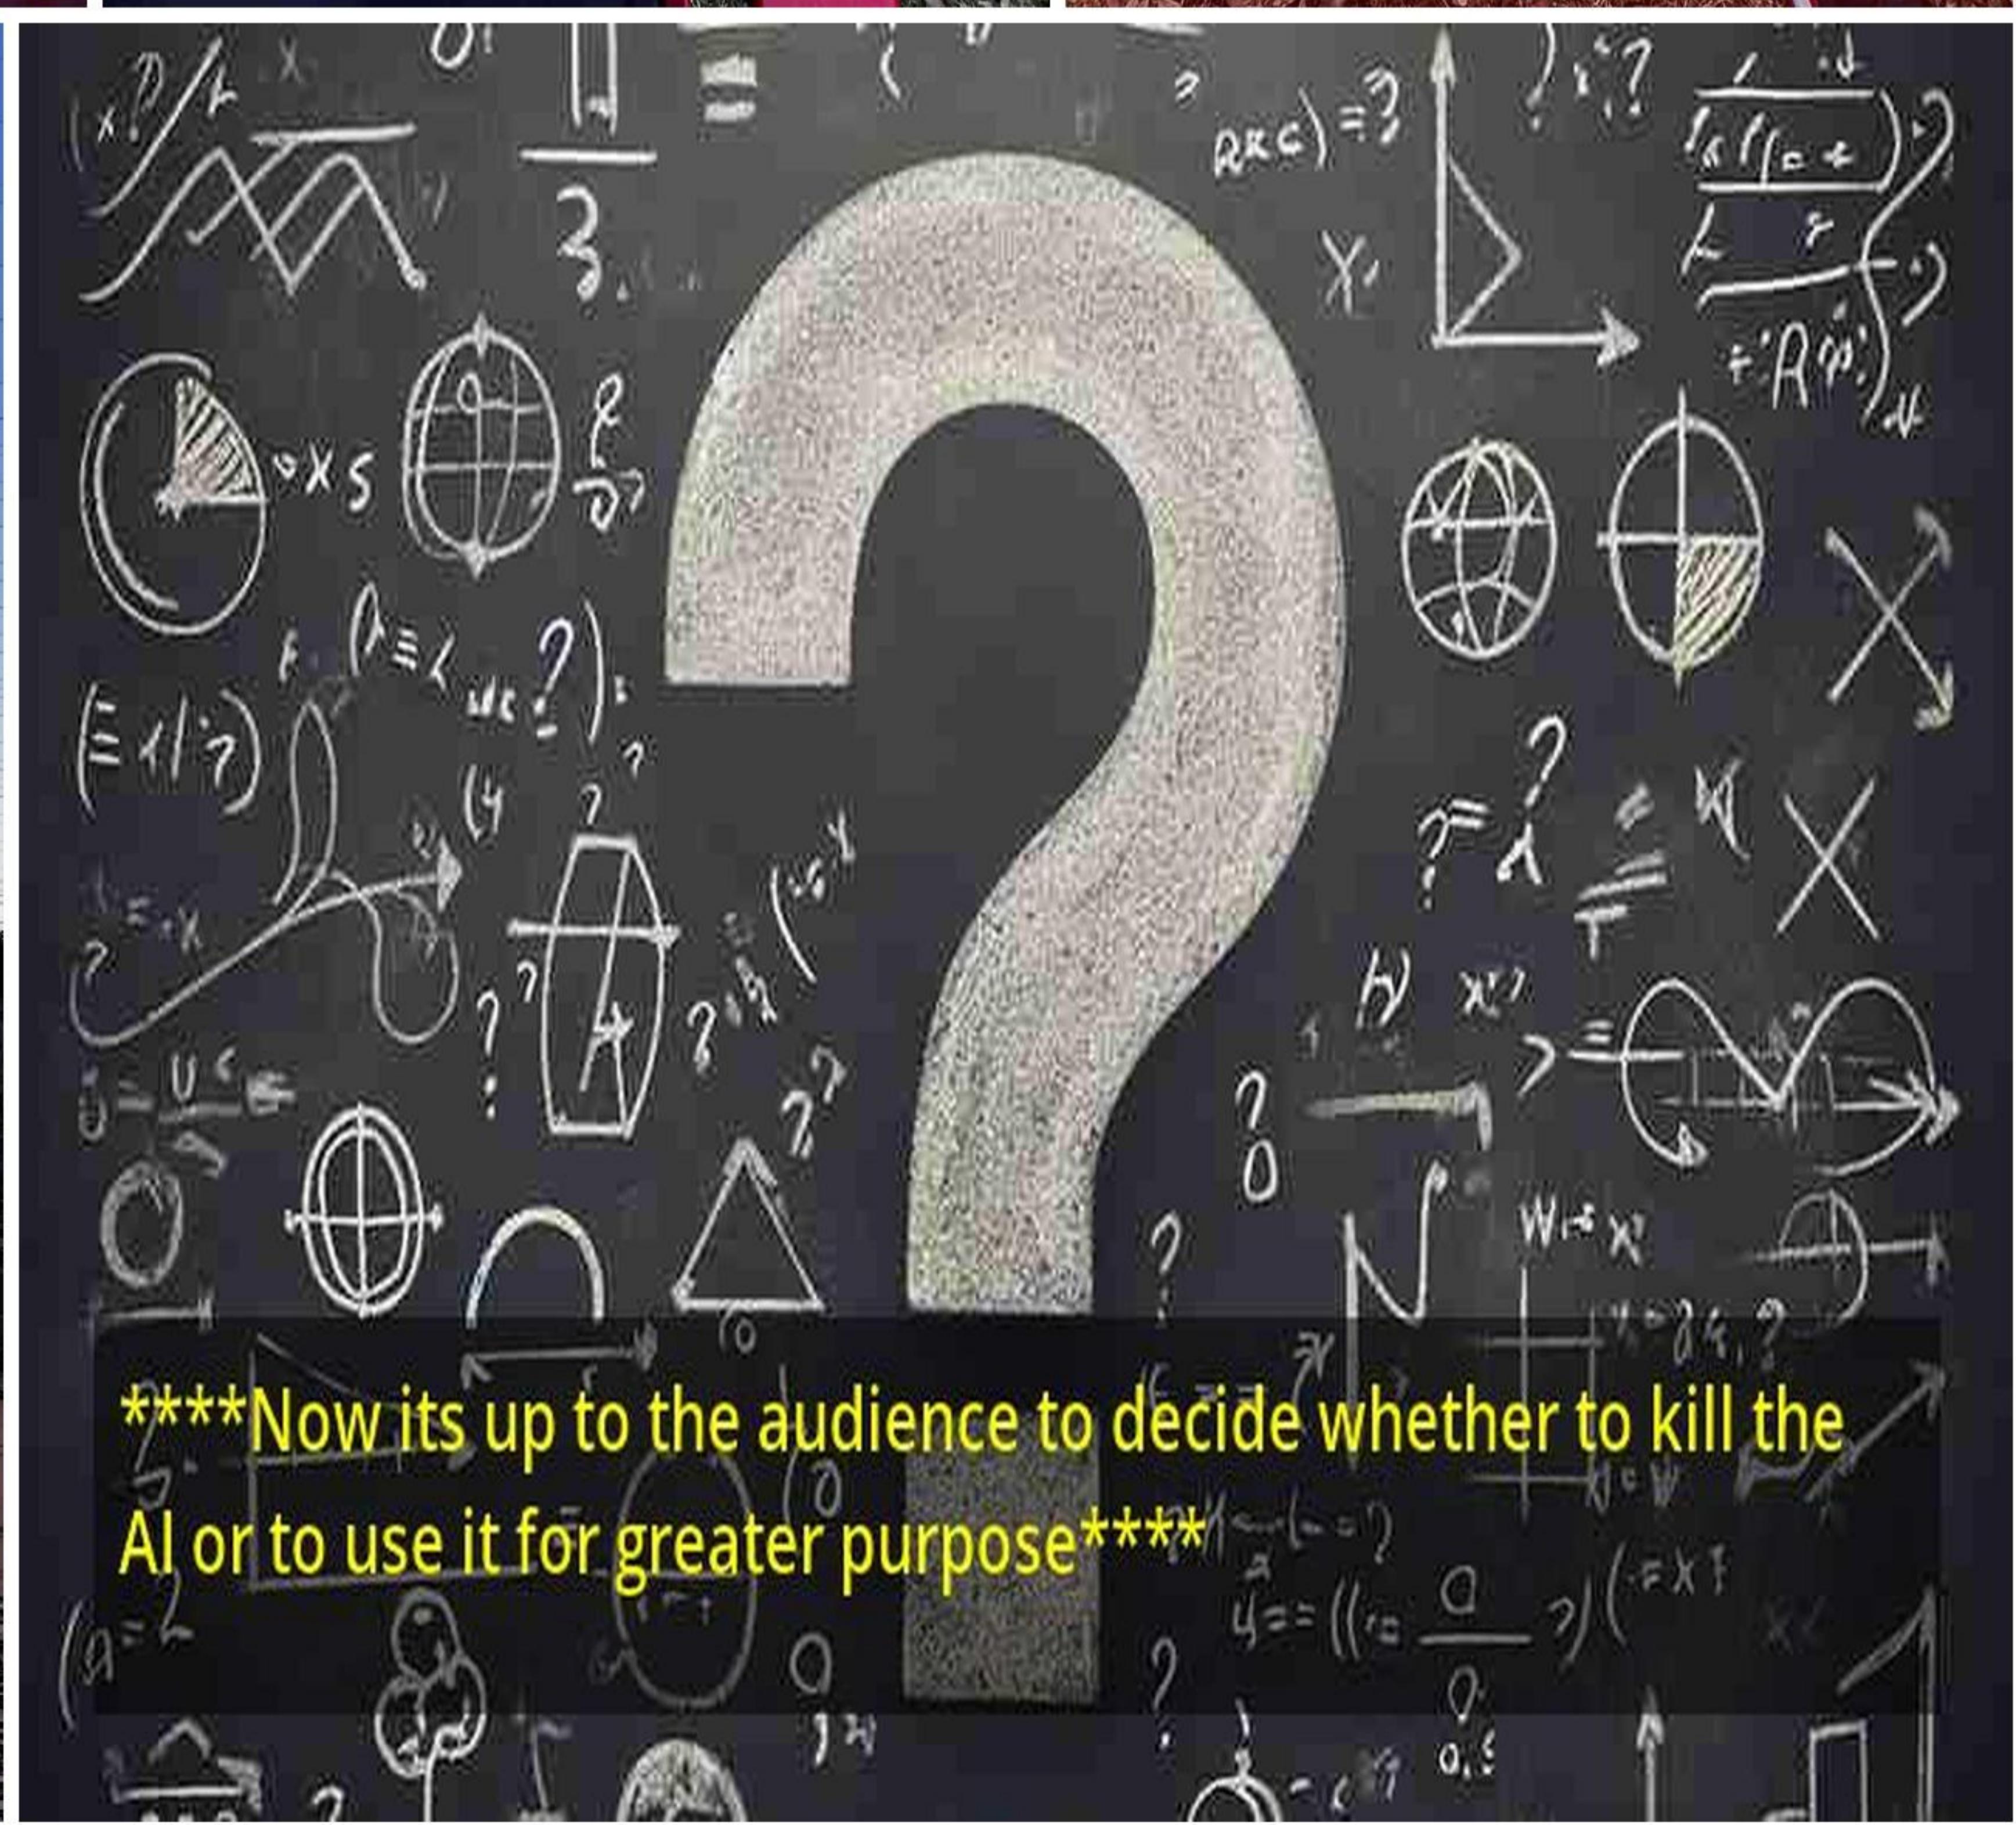

Dr.Finch: You don't know the power of AI. It is capable of anything.

King: But you are the creator of it, you can control it.

Finch: Probably, but a machine is just a machine. It even orders to kill me and you if it finds that we are ready to comprise it. That's how its programed.

****Now its up to the audience to decide whether to kill the AI or to use it for greater purpose****
